indeed written by Hitler and taken from the wreckage of one of the last aircraft to leave

Berlin in 1945.

The extraordinary press conference, punctuated by scuffles

and loud arguments over

Professor Hugh Trevor-Roper). After an examination of the documents, Lord Dacre expressed his satisfaction that they were authentic. At that time *The Sunday Times* pro-ceeded with publication of a report on the discovery of the diaries and announced that extracts would appear next month. If Lord Dacre and other historians feel that they need time for further investigation, everything possible within the power of *The Sunday Times* will be done to provide them with these facilities.

"I understood in Zurich that the documents had passed through the hands of one person, a Wehrmacht officer who obtained them from the aircraft and that this man - who is still alive - passed them on to Mr Heidemann, Lord Dacre said. "I now discover this is not so and that I must have

"Stern is relying implicitly on Mr Heidemann. I am sure that he worked hard on this but anyone can be mistaken and I cannot regard this evidence as being as firm as it was."

Lord Dacre said he stood by what he wrote in The Times on Saturday. He did not think his personal reputation was at stake or depended on the diaries' authenticity. "That does not worry me. If I an wrong, I am wrong. If I am right, I am right, I am

right."
But the lack of any direct link between the books and the plane crash made it all the more urgent for historians to examine the complete text and check for obvious absurdities.

Lord Dacre said he was surprised that in the past three years no German historian had been given a chance for critical evaluation. He also complained, to the embarrassment of the Stern editors beside him, that the "normal methods of historical verification had been sacri-

ficed" to journalistic treatment. However, his retreat fron his decisive stand last week did not mean that he believed the

> movement. The Earl of Selkirk, a former Conservative minister, Lady Bir, of the Labour front bench, Lord Evans of Claughton, of the SDP-Liberal Alliance, and Lord Godman, a former chairman of the Housing Corporation, have tabled an amendmen, to delete the controversial clause 2 from the Bill, and are thought to have a good chance of success.

the plan because, they say, it will diminish the stock of rented housing available for poor and deprived groups.

About 100,000 homes owned associations, including the Guinness and Peabody trusts could be affected

Lady Birk said yesterday that if the clause was allowed to stand it would mean that houses built by charities to help those in greatest need would be sold at an effective loss and they would no longer be available to help those who still desperately needed rented accommodation.

"The whole basis of these housing associations was to help people in need, not those who could afford to buy the homes at big discounts. With discounts now going up to 60 per cent apparently, there will be even less left to spend on replacing the stock," she said.

In the second reading debate Lord Goodman said if the Lords had a useful function to a good chance of success, exercise it should have no hesitation in seeing the end of the clause in the recent Lords this "appealing clause 2."

Labour gets ready for June election

By Paul Routledge Labour Editor

Opinion among senior abour politicians and union leaders over the likely general election date is hardening in favour of June.

That was the consensus emerging from the TUC-Labour Party Liaison Committee yesterday when the two wings of the labour movement met to discuss joint policy making in the run up to the campaign.
Shadow cabinet members, representatives of the Labour

Party national executive and union leaders seized on the gloomy survey of employment prospects published two weeks ago by the National Economic Development Council (NEDC) as useful political ammunition against Mrs Margaret That-cher's Government.

The report showed that many industries were threatened by a "tidal wave of imports" which if not checked, would lead to a big balance of payments crisis, the liaison committee said in a statement.
"The NEDC report, based on

industry's own assessment, totally refutes the bogus and precarious optimism of the Government and the CBI about prospects for British industry on unchanged policies."

Mr Len Murray, the TUC general secretary, said the Government should not be allowed to let the report "disappear".

On defence, Mr Denzil Davies, MP, said Labour should present itself as the party with a strong but non-nuclear defence policy and the one which was working on a policy to provide alternative employ-ment for workers facing dis-placement by defence industry

spending cuts.
Union leaders and Labour politicians are now looking forward to the May 6-7 strategy conference in Surrey where the labour movement will plan the exact form of polices to be put before the electorate.

TUC fees to rise

The TUC is putting up its affiliation fees by 26 per cent to stave off a threatened £1m deficit next year caused by falling trade union membership.

The increase, approved yes-terday by the TUC's Finance and General Purposes Com-mittee, will take effect in two stages and is designed to leave the trade union movement's national centre with a current account reserve of £400,000 at the end of 1985

More than 100 unions paying 47.5p a head affiliation fee will be asked to pay 55p from January 1, 1984, and 60p from the beginning of 1985.

The higher subscriptions are likely to bring in an extra £750,000 next year, taking the TUC's annual income to the £6.5m mark.
The TUC's full general

the two-step subscription increase at its monthly meeting tomorrow. Figures for 1979, Labour's

last year of office, showed 12,172,508 people belonging to affiliated organizations. That fell to 11.6 million in 1981, and Il million last year. Figures to be released in September will show a further fall to about 10.5 million.

Disorder warning over Roach inquest venue

The inquest into the death of type of inquiry that attempts Colin Roach, the black youth the scale of a public inquiry, Mr the entrance to Stoke Newington police station, London, in January, will be very far from the full public inquiry that some High Court was told yesterday.

Mr Raymond Kidwell, QC, for Dr Douglas Chambers, the coroner who is to hold the inquest, said that the Home Office had told Hackney Borough Council and others that the inquest would be a full, independent, public inquiry into the medical and circumstantial causes of the death.

But the inquest was "a very, very long way away" from the sort of inquiry they were seeking he told Mr Justice Woolf Such an inquiry would involve considerable liberality over who could appear before it, would include final speeches by those represented, and would result in a long report, instead of the inquest jury's verdict of a few words.

It was because they had been told that the inquest was in some sense a substitute for that Kidwell said. But it was and would remain an inquest.

The court is being asked to rule on whether the inquest should be held at St Pancras are seeking into his death, the Coroner's Court or at the larger venue of Hackney Town Hall, as the local borough, the Greater London Council and the Roach family are urging and whether the Hackney Black People's Association should be represented at the inquest. Dr Chambers argued in an

affidavit that the court had proved adequate for other cases attracting publicity and notoriety, including the death of Joe Orton and the death of Kevin Gateley at a demon-stration in Red Lion Square in

Chief Superintendent Allan Burgess, of the Metropolitan Police, said in his affidavit, there had been "a chronicle of disorder" in Hackney since Mr Roach's death. He feared the likelihood of disorder if the inquest was held at the town

Prince seeks path switch at Highgrove

The Prince of Wales has asked Gloucestershire County Council to move two footpaths away from his Highgrove estate to prevent sightseers from looking into the grounds.

Since he moved into the 180acre Highgrove estate at Doughton, near Tetbury, nearly three years ago, sightseers have filed along the narrow country paths which skirt the property.

The application, which has been made through the Duchy for Trade, strongly denied in the of Cornwall's office to Glouces commons yesterday that the tershire County Council, asks Government had any plans to for the footpaths to be closed run down the role of the and two others to be opened several hundred vards away.

The application is being supported by Mr Leonard Soper, the chief constable, who is responsible for security at the estate. The police said: "With the footpaths running so close to the main house they do pose a slight security problem. In the past there have been a lot of sightseers and photographers trying to get a glimpse of what is going on in the grounds."

The Cotswold District Council has agreed to support the plan. The Rambiers Association which normally objects to such moves has also agreed because of the promise of the new

Scotland to have a new music academy

From Our Correspondent

A new Royal Scottish Academy of Music and Drama is to be built in Glasgow at an estimated cost of £16m. Mr George Younger, Secretary of State for Scotland, announced yesterday. It is expected to be completed by 1987.

Mr Ainslie Millar, chairman of the board of governors. described it as a tremendously exciting moment, and said that he had been involved since 1965 in trying to get the

building under way. He said that the design of the building, on a site at Hope Street and Renfrew Street, had been described by the Royal Fine Arts Commission for Scotland as a fine example of contemporary architecture. The architect is Sir Leslie Martin of Cambridge.

To mark the academy Pro-fessor Robin Orr, a former chairman of Scottish Opera, is to compose an opera. It will be based on Tom Stoppard's play On the Razzle. Professor Orr has already composed Weir of Hermiston and Full Circle, for Scottish Opera.

The 360 students at present

at the academy had a teaching staff of 60. Mr Philip Ledger, the academy's principal, said. It was hoped that the new academy would have 270 students of music and 130 of

Mr Ledger said that he was convinced that the new facilities of the academy were going to be formidable and he was certain they would attract students and staff not only from Scotland but also from further afield.

The facilities will include an opera theatre and large concert hall. The drama school is to bave a large theatre and seven workshops.

The academy's present site is at St George's Place in the city centre, where it was established in 1888. The Treasury is meeting the full cost of the new academy.

Minister rejects call for 25pc tax band

FINANCE BILL

The tax system increasingly mir-rored the class division in society Mr Robert Sheldon (Ashton-under-Lyne, Lab), an Opposition spokesman on Treasury and economic affairs said at the beginning of the debate on committee stage of the Finance Bill:

He was moving an amendment to reduce the income tax on the first £750 of taxable income to 25 per cent from the present 30 per cent. Mr Sheldon said that all tax changes introduced by the Government had increasingly mirrored the class

They were seeing an increasingly rigorous attitude applied to one class of society and an increasingly relaxed attitude to the other. Those two reactions could not be without

rvere social consequences.

They had to consider the overnment's belief that reductions in transition would recreate the market economy. The idea had been that the rich would provide jobs; that tax relief would provide both incentive and reward and the good old nineteenth century would be

The lower paid had been promised lower taxes, but in their case they had failed to materialize. The reductions in higher rates had been intended to reduce tax avoidance, but he noted that tax havens were flourishing as never before. Tax avoidance schemes were being produced with ingenuity and the Government's enthusiasm to curtail them was rather less than ad been shown by the previous association, a professional service body, which is funded by the Government.

The Labour Government had moved towards a smooth progression in tax rates by having rates of 25 per cent, 33 per cent and 40 per cent. If this Government had

Sheldon: Tax system reflects division in society.

rroceeded in a similar way instead of abolishing the 25 per cent rate, it might have had the advantage of redeeming one of its promis

help the lower part.

By abolishing the 25 per cent the
Government had shown that it did
not care much for those on lower
incomes and that most help was oing to the wealthy.

There could be no justification for taxing those who received the lowest incomes at 30 per cent just because they were pensioners, wives or happened to have made the error of being aged less than 21. Why should those people be marked out for an increase in taxation from 25 per cent to 30 per cent simply because the Chancellor decided they did not particularly need the

The Chancellor completely failed in this category to whom the extra money was essential. They were the most disadvantaged in society and most appreciated the small differ

ence in their incomes. At the same time as he was doing that the Chancellor was giving relief to the highest paid. Rarely in the fiscal history of the United Kingdom had there been such a stark contrast between what was given to the wealthy and what was given to the course from the room.

given to the weatrry and what was taken away from the poor.

The argument had been put forward that it was better to help the low paid by raising thresholds rather than by a lower rate of tax. But increases in allowances one year, in part if not all, would be eroded by

inflation. Many of those let out of the tax net would be drawn back

Mr Richard Wainwright (Colne Valley, L) said Treasury ministers were wholly out of touch with the psychology of the ordinary working

They lived in a fantasy world shared by the Prime Minister in which they believed that a reduction in the rate of taxation on a reasonable week's pay would automatically be followed by a great surge of effort, imaginative business decisions and risk taking, as if there was a tremendous amount of untapped effort.

That was a wholly disproved fantasy, it was a figment of Treasury

Mr Frank Field (Birkenhead, Lab) said the Government should support the amendment as it would be one way of helping to redeem its election promises. The Government that would but taxation. But for those on low incomes the tax burden had risen and more low paid neople were paying tax.

Mr John Horam (Gateshead, West, SDP) said high taxation was being paid by people on very low incomes, those least able to pay. So he

Mr Dale Cambell-Savours (Workington, Lab) said that after five Budgets the rich had paid less and less and the lower paid and those paying the standard rate of tax had picked up the bill.

In total the Government since 1979 tad handed out to rich people nearly £3,000m in tax concessions. This was equivalent to a £5 increase in child benefit for every child in the United Kingdom

Mr William Hamilton (Central Fife, Lab) said the Government was elected to look after the wealthy and penalize the poor. That was what Conservatism was about.

Mr Leon Brittan, Chief Secretary to the Treasury, said the amendment would reinstate the lower rate band at a cost of £850m in a full year.

at a cost of 2500m in a null year.

The tax threshold in the financial year 1983-84 would be 6 per cent higher in real terms than in the financial year 1978-79. The percentage of income going on income tax was lower than in

1978-79 for people on three-quarters of average earnings and above.
Of course the position of national insurance contributions led to a different outcome. But most people would regard it as desirable that the increase in benefits in real terms that had also taken place during the period should have taken place and, therefore, had to be paid for.

When the Government was in a position to reduce the tax burden, it was felt, rightly, that priority should be given to reducing the tax burden. on industry rather than on the individual. That was reflected in the reduction of the national insurance surcharge from 3½ per cent to 1 per

able to improve the position for the individual and that was why the allowances had gone up to the

Most important, real net earnings, take-home pay, were substantially higher than in 1978-79 for tax payers at all levels.

It was desirable that any money available to assist those in the lower range of the tax scale should be used to increase allowances rather than to introduce a reduced rate band which

carners.

The amendment was rejected by 245 votes to 170 – Government majority, 75.

Mr Peter Archer, chief Opposition spokesman on legal affairs (Warley, west Lab): Does he appreciate that the British public are being invited to buy German made Ford and Vauxhall cars under the impression they are buying British? Would he take steps to ensure that identifying marks on cars are displayed compulsorily and so that the purchaser knows what it means?

Mr Rees: He must appreciate there are European regulations which must be taken account of before his solution is adopted.

Whitehall brief

Tremors in the corridors

Whitehall Westminster and

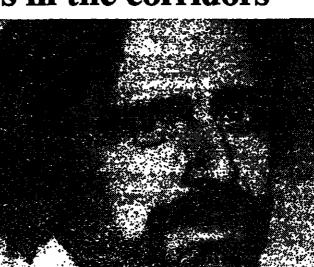

Academe sent representatives to Southampton University last week to try to decide if Britain had passed a constitutional milestone since 1979. Given that we do not put such things on paper, or surround them with statutory masonry, it is usually difficult to know. The question posed was: had the new clutch of departmentally related select committees of backbench MPs, established

nearly four years ago, tilted the Whitehall-Westminster balance of power in favour of our elected representatives? Mr Gavin Drewry of Bedford College, London, one of the most assiduous select committee watchers, had the ingeni-ous idea of adapting the Mercalli scale for earthquakes as his means of measurement. After all, Mr Norman St-John-Stevas, midwife of the new bodies when Leader of the House, had made great claims for them as "the most import-

ant partiamentary reforms of the century". Mr Drewry placed their impact somewhere between I and V on the Mercalli scale (which stretches to XII): "Committees may produce some vibration, which causes delicately poised objects to sway and is felt by many indoors, but by few outdoors. Few are

"Small earthquake at Westminster, not many disturbed" is hardly the kind of headline Mr St-John-Stevas had in mind. But it is early days yet. A new Commons standing order creating a scrutiny capability is a icence for reform; it does not guarantee its achievement. The concensus at Southamp-

ton, bar one or two pessimists, was that the St-John-Stevas reform cannot be undone. It is a seminar in a personal capacity Stevas, had he been present, substantial fall in council promising basis on which to and not as a government could have purred at that point.

build. Although the commit-spokesman, disclosed that, in tees have operated within their first year of life, the traditional constitutional committees had absorbed boundaries, delineating, for example, the kind of information it is proper to demand of ministers and civil servants. There has been more, but it was more of the same. Mr Drewry, however, de-

tected one important constitutional change stemming from the new committees: "It is significant to have civil servants' views and interpretations set out in cold print for purposes both of current policy debate and future reference small dent in the minister's personal monopoly of answerability to Parliament'

The committees are still in the process of changing Civil

One official, attending the have to reflect that. Mr St John-

committees had absorbed 12,000 Whitehall man-days, which, when converted into cash, amount to between £1.3m and £1.5m. ("Peanuts", a member of the Commons Clerks' Department said under his breath.) But the burden fell on the same officials who were doing the work in the real world", the civil servant explained. The language struck several non-Whitehall participants as

revealing. It was pointed out that nowadays select com-mittees were the real world and had already become a permanent feature of Civil Service life. Indeed, the official said, switching tone and vocabulary, the mittees were accepted as a part of government and staffing

349 London Road, Camberley, Surrey, GU15 3HQ.

It's your choice with flexible Fair Share Endowment

Plus, you get the protection of high life cover-as much as two to three times higher than that provided by similar endowment plans.

Lloyd's Life will pay your first month's contribution-up to £50if you enrol before 9th MAY1983.

Every discerning investor wants to get the most for his money. And as a responsible and caring family person, you want to protect the ones you love.

That's why Lloyd's Life designed their flexible Fair Share Endowment to meet the needs of investors with growing families. Not only do you have the freedom to decide what to do with your. endowment, you get exceptionally high life cover to protect your family during those crucial years...often two to three times the

amount of cover provided in similar plans you'll see elsewhere! The insurance benefit you receive is based on your age at enrolment, your sex, and the premium you choose. And you can have peace of mind in knowing that this benefit amount is guaranteed for the full term of your plan, from the very moment you first enrol, If you should pass away before your policy matures, your beneficiary will receive either your life insurance benefit or the cash value of your plan-whichever is higher And there's more...

The flexibility of a plan that's tailored to your changing needs.

As your family grows or as your needs change, this endowment is designed to give you complete flexibility. You set aside what you like... from £10 to £50 monthly.

You decide when to take out your money-with a full tax-free lump sum payment after 10 years, at full maturity when you reach age 65, or any time in between. In fact, should you need to cash in your flexible Fair Share Plan before 10 years, you may do se at an earlier date. Your plan will start to acquire a cash value after a period which will depend on your age when you apply (7 months at age 55, up to 33 months at age 18). However, values in the early years are unlikely to be high and we recommend that you allow your investment to continue for at least 10 years in order for you to enjoy the very best advantages. Not only that....

There are three contributors to your plan-You, Lloyd's Life and the Taxman.

We're so convinced that this is the endowment plan for you that we pay the entire amount of your first month's contribution (up to £50) out of our own pocket. Plus, as long as you invest in the plan, the Paxman will contribute to your savings... because the flexible Fair Share Endowment is a "qualifying" life insurance policy.

What's more, when you cash in your plan any time after 10 years or at its full maturity when you're 65, your benefits are all tax-free!

High returns from the Multiple Growth Fund can put profits in your pocket.

The flexible Fair Share Endowment lets you share in the success of the Multiple Growth Fund, which is managed by Lloyd's Life's

bloods the Assurance Limited is the insurance company formed by Lloyd's of London, brobesty the best-known insurance institution in the world, and a major contributor to the Lifeted Ringdom's overtees invisible earthings. Lloyd's Life complements Lloyd's Candom's internationally renowned range of insurance services by offering long term file assurance, armuity and loyestment contracts.

Even if the Multiple Growth Fund were only to achieve a 6% growth rate, the 29 year old man described in the headlines above could expect to receive £36,641 at the maturity of his plan. However, since July '74 the fund has averaged more than twice this rate of growth. Find out what you can expect

your endowment to be worth...with no risk and no obligation! As we mentioned, the regular monthly amount you contribute to your

plan is entirely up to you. (Of course, your insurance benefits and the cash value of your endowment will be based on your selection.)

An example of how your savings can grow. You can set aside a regular amount each month, from as little as £10-up

to as much as £50. It's entirely your choice
To give you an idea of how your savings can grow, we've worked out a ble based on a man's net monthly contribution of £30. (A woman's benefits would be slightly higher). The estimated cash values in this Table are based on a net annual growth in the Fund of 8% and cannot be guaranteed. Although values can go down as well as up, the Multiple Growth Fund has performed consistently well since 1974 as shown in the graph. This example growth rate is therefore considered to be cons parison to past performance.

The table shows you the high level of guaranteed life assurance you would have from the first day your plan goes into effect, the estimated cash value of your endowment after 10 years, and its estimated maturity value when you reach age 65. Remember, this £30 contribution (net) is actuelly nt to £35.30 (gross). The difference is made up by the taxman. For an actual projection based on the amount you wish to invest and on your current age, simply return your completed Request for a Personalised

military aid to the country.

Mr Deane Hinton, the attributed the guerrillas's success to the rejuctance of Congress to send aid to train and equip new army units.

An extensive tour of central and eastern El Salvador over the weekend showed that many people believe time is on the insurgents' side.

A 10-mile section of the coastal highway that connects San Salvador to the rest of the

country was in rebel hands on Saturday. Along part of the road, between the Lempa river and the town of Jiquilisco, rebels lay in wait for military vehicles. Burned out buses and lorries littered the roadside, and nearly half the utility poles along the highway had been

San Salvador (NYT) - The to urge approval of the Admin-Manuel Cortez, the senior generally limited themselves to defending the village. Outlying areas were full of guerrilla

> Early this month, rebels killed 42 soldiers and captured 12 others in the fortified town San Jose Cancasque in Chalatenango province. A week later, another guerrilla unit killed six men and captured more than 70 on the San Vicente volcano in the central part of the country.

A modest counter-attack by the army in Chalatenaugo produced little visible success, and an operation on the Guazapa volcano north of San Salvador, where hundreds of querrillas were based, collansed when troops withdrew before striking against rebel units they

had apparently surrounded.

The army has been all but paralysed for the past three months by a continuing leadership crisis, which culminated last week with the resignation of General Jose Guillermo Garcia as minister of defence. American officials hope his successor General Carlos Eugenio Vides Casanova, will change the command structure.

The army clings to the traditional tanda system of promotions, in which officers are given command only after they have served a given number of years. Resistance to destroyed or damaged.

In Jiquilisco, Lieuteuant strong.

EEC will fight US 'trade imperialism'

reed in Luxembourg yesterday that they must work together to combat what one diplomat described as "American economic imperialism.

Several member states were concerned that the United States was seeking to dictate to them what EEC policy should be in certain key areas, particularly on trade with the Eastern

Mr Francis Pym, the Foreign Secretary, started the subject off at the meeting by expressing his dismay at the failure of the Reagan Administration to re-spond to EEC pleas to alter new signed to extend the control of US law to control

This law, the Export Administration Act, as used last year celled today's meeting with Mr Richard Burt. The US Assistant ov Presideni Ke an acrimonious argument was Eastern block the United States this embargo lifted, although would "reconsider military talks are continuing between the commitments." Mr Burt did come, he would not see any ministers. He would be directed to the Greek diplomat: two sides on how to regulate East-West trade.

The Administration is meanrange of circumstances.

EEC Foreign Ministers agthe power to stop any companies exporting American high technology to the Eastern Block, and any company which dis-obeyed would not be allowed to export to the United States.

Britain has only a trickle of regular trade with the Soviet Union and would suffer little in financial terms from an em-bargo. But like other EEC companies it is increasingly vorried by American attempts to increase its extra-territorial

The EEC Commission is to continue to raise the matter in Washington, while member states are to join the campaign in an attempt even now to force a change of mind. Contacts so law to cover overseas far have not been particularly subsidiaries of American com- auspicious, however, and the subject may well be raised at the

China seeks | Archangel's to improve its Eastern block ties

China is putting out feelers to all the Warsaw Pact countries for an improvement of mutual relations. Two high-ranking diplomats will visit East Germany, Poland, Hungary, Czechoslovakia and Bulgaria next month, around the same time as Mr Hn Yaobang. Secretary General of the Chinese Communist Party, visits Romania and Yugoslavia. Mr Chen Xizhen, head of the Department of Soviet and East Enropean Affairs and a Deputy Foreign Minister, will go to East Berlin, Warsaw, and Budapest,

while one of his deputies will visit Prague and Sofia. Although these visits will be sheduled as "embassy inspections", the two men will be available for talks with their counterparts or more senior leaders in the Warsaw Pact

China now officially recog nizes those countries as "soci st" after a period of nearly two decades when they were viewed as mere pawns of the "revision-ist" Soviet Union.

Yugoslavia, Romania (and mtil a few years ago Albania) were China's only friends in East Europe in the aftermath of the Cultural Revolution, and it is natural that Mr Hu should visit them early in his tenure as head of the Chinese Communist

A new trend is the cultivation of the five other countries, with which China is again opening cultural, commercial and sporting ties. These are seen as a prelude to the reopening of inter-party relationships, if the Soviet Union permits it.
Whereas Moscow is

pursuit of improvements in its own relations with Peking. It may not approve of China's going "behind its back" to be friendly towards the satellite

On the other hand, Mr Yuri Andropov, the Soviet leader, may want to avoid an appearance of dictating the degree of relations with China which the East European states may have. The Kremlin would object strongly to any other member of the Warsaw Pact achieving the

degree of equidistance which Romania has established between Moscow and Peking. So the most likely prospect is a gradual improvement of re-lations between China and East Europe in ways considered harmless to the cohesion of the

the dissident troubles in Matabeleland were not inspired by the Patriotic Front but stemmed from "frustration, lack of security and employment," and lack of careful planning in demobilizing former guerrillas.

Gunmen murder police chief at From Kuldip Nayar Delhi

Sikh extremists shot dead yesterday Mr Avtar Singh Atwal, a Deputy Inspector-General of Police, in Amritsar outside the Golden Temple, the holiest Sikh temple. A passer-by was also hit by bullets and killed as the gunmen

came out of the temple firing bursts from their Step guns. The police officer's six-yearold son was also injured in the shooting, but his wife escaped unhurt

Mr Atwal was on the extremists hit-list because he was conducting inquiries into various acts of violence by militant Sikhs.

The police officer's assassination comes in the wake of a ban by the highest Sikh spiritual authority on all types of arms within the Golden Temple premises. The Government believes that the Golden Temple is being used by the extremists, who are campaigning for religious and political concessions, to hide their arms and to shelter culprits.

statue to take wing for repair

Rome - The famous statue of the Archangel Michael which dominates Castel San Angelo in Rome, will take wing in June It will be swept away by helicopter for a year's restoration work, Peter Nichols wites. The statue is too big to carry

through the staircases and chambers of the castle without damaging ceilings and walls.

It was placed there in 1752 and is at least the fourth known to have existed since Gregory the Great had his famous vision in AD 590 of the archanged sheathing his sword, which marked the end of a period of plagme in the city.

Malta warning to British

Valletta - Dr Carmelo Mifsul Bonnici, the leader-designate of the Maita Labour Party and Mr Dom Mintoff's potential successor as Prime Minister, has warned British workers that it was they who would suffer if they attempted to keep British ships from using the Malla drydocks for repairs.

Maltese workers would boy cott British goods, he said pointing out that Malta imported many millions of pounds worth of British goods annually He was referring to the Cunard Countess which is to be relited

Lebanon withdrawal first priority for Shultz

From Robert Holloway

There was a hint of a modest change in American attitudes towards the Middle East yester-day when Mr George Shultz began his maiden tour of the region as Secretary of State. Officials accompanying Mr Shultz confirmed that his first priority was to try to bring about an Israeli withdrawal from Lebanon, which the Egyptian Foreign Ministry, in a statement to the press, de-scribed as a test of American credibility."

Speaking to reporters at Cairo airport. Mr Shultz confined himself to generalities. He did not refer to Mr Reagan's plan for self-determination for the Palestinians in association with Jordan, but US officials said that the Reagan Administration now recognized that Lebanon was "the place to start" if the plan were to succeed. Israeli radio yesterday quoted Mr Shultz as telling reporters on

work at it, they said, provided there was hope of accomplish- Mr Shultz declined to comment ing something reasonably soon. On reports from Tunis that the If the Shultz mission turns central committee of Fatah, the

sledge-hamer to crack a nut but the Mayor, considered a rising star in Democratic Party politics, was taking no chances. She was leaving no stone unturned in her effort to fight off the challenge to her leadership coming mainly from a group calling itself the White Panther

Party.
The Panthers, a small band of social mavericks, surprised everyone by coming up with 35,000 signatures - twice the number required on petitions seeking to oust the Mayor.

The recall move was begun in opposition to Mrs Feinstein's sponsorship of a tough gun control ordinance, which was passed but later overturned by the courts.

The group said they needed arms as protection against the police who harassed them because they were trying to practice their communist-type beliefs in the city.

gained support from the city's huge homosexual population who were angered by Mrs Feinstein's veto of city benefits for live-in lovers, as well as a

Mayor Feinstein: A. valuable rehearsal

iant rights organization seeking stronger rent controls; and small groups with various complaints against the Mator.

But that support fell away in recent weeks mainly because the Panthers refused to work with anyone who did not regard gun control as the key issue. This diluted the opposition's efforts as big business rallied to support the Mayor with big

donations to keep her in office.

So far, 70,000 absentee ballots were sent out - and 45,000 have been returned. "We would like to see the Mayor win 60 per cent of the vote," one of the Mayor's top campaign strategists said. Mayor Feinstein's stock in

San Fseacisco is very high Last week, she jubilizatly announced that the city had landed the plum 1984 Democratic convention, which means millions of dollars in income for the city.

Tonight, the Mayor is expected to be still in office and observers here say the recall may not, after all, be such a waste of time for her. Many consider it a valuable rehearsal for November, when she intends to seek another term

Prince lays wreath in honour of Anzac dead

From W. P. Reeves

The royal tour took a suitably olemn turn yesterday when the Prince and Princess of Wales attended an Anzac Day cer-emony in Auckland.

Anzac Day commemorates the New Zealand and Australian participation in the abortive Gallipoli landing in 1915, and is a day of remembrance for

all the country's war dead.

The Prince, in the uniform of a commander of the Royal Navy, laid the first wreath at the cenotaph below the steps of the imposing Dominion War Memorial Museum. It was a grey overcast morning with

grey overcast morning with intermittent showers.

The Archbishop of Canterbury, Dr Robert Runcie, giving the main address, said Gallipoli was not all tragedy and folly. The place pointed to a certain nobility of the spirit. "War always signals a failure in human society," he said. "But as Christians we believe there is as Christians we believe there is some soul of goodness in things evil, would man observingly

He added "Even if we get our economic policies wrong we shall not perish as a people, but if we get human relationships wrong and lose our respect for other people and admiration for hose who have given up life, health or their future for others we shall destroy ourselves.

Later in the day the rain lifted for a royal garden party at Government House in Auckland attended by a hundred

Irshad Rao By Caroline Moorehead On February 18 Mr Irshad Rao's third prison sentence in Karachi Central Jail ended but the former editor of the banned weekly paper Al-Fatah is still

He has had two nervous breakdowns in prison and his sight is failing. Doctors report that he cannot be given adequate treatment in his sent conditions.

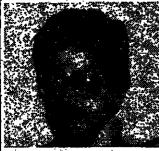

It is now more than two years plainclothes policemen raided Mr Rao's home and the offices of Al-Fatah, confiscating

Mr Rao, who had once beer chief executive in charge of publications for the banned Pakistan People's Party, was arrested under a martial law order that prohibits political activities and the "excitement of disaffection toward Pakistan's armed forces".

The first five months of Mi Rao's imprisonment were spent in solitary confinement, during which he was reported to have been interrogated so violently that he had a nervous breakdown, resulting in hospital

In September, 1981, he was at last tried: the court found him guilty and sentenced him to one year's imprisonment on charges of printing objectionable litera-ture and creating unrest.

Since the spring of 1982, Mr Rao's health has been deterio-rating rapidly. Though only 36, his nervous system is said to be paralysed as a result of the harshness of his imprisonment During a second nervous breakdown, he lost conscious ness and stopped breathing.

Mr Rao: Two nervous breakdowns in jail.

E

It took Norwich Union, with their understanding of people and their needs, to create a whole new generation of individual pension policies.

Here they are pensions for the managing director and his key employees plus everyone who is selfemployed; professional man, actor or builder All the pensions are designed to pay off handsomely in the 21st century or even before. Norwich Union's investment performance is legendary.

If you're looking for a pension, why lookfurther?

FOR CHAIRMEN, DIRECTORS AND KEY EMPLOYEES.

New: Individual Pension Plan. Modern version of what used to be called a top hat scheme. A company can reward valuable members of its staff with a cash fund to buy benefits on retirement.

These can include all senior people provided they are not self-employed, and the Plan is highly tax-effective.

New: Unit-linked Individual Pension Plan. A unit-linked version of the former which, like it, can be entered into anytime during the individual's employment, even only a

few years from retirement.

Obviously, the longer it runs, the more the recipient will benefit from Norwich Union's investment skill.

FOR THE SELF-EMPLOYED.

New: Personal Pension Plan. An up-dated personal pension plan which allows the recipient to take, on retirement, income and a tax-free

The total fund can be used to buy a pension from any company.

New: Unit-linked Personal Pension Plan. A highly flexible unitlinked policy also specially suitable for the self-employed and those without a company pension.

Premiums can fluctuate with earnings and even stop altogether. With all unit-linked policies investments can go down as well as up, but Norwich Union's performance record is your reassurance.

Both these plans allow policy holders generous tax-relief.

FOR SELECTED EMPLOYEES.

Coming Later: Controlled Cost Pension Plan. This may be offered

to selected groups within a company, say skilled workers.

It is intended to supplement the state earnings-related pension by building up a fund to provide cash or pension.

The company has total control over the level of payments.

LOAN BACK.

All the above policies excepting the Controlled Cost Pension Plan can be used for loan facilities.

With such a wide choice of policies you'll need the professional advice of a broker, accountant, financial adviser or Norwich Union Branch.

Or perhaps you'd like further details first. Write to the Production Manager (Life) at Norwich Union. Surrey Street, Norwich NRI 3NG.

Two Swissair pilots stand trial for Athens crash Athens (AP) - Two Swissair pilots went on trial here yesterday accused of negligence The accident occurred on October 17, 1979; when the Swissair DCB airliner arriving in the death of 14 passengers on their airliner, after overshooting

the runway at Athens airport four years ago. A total of 154 were on board.

Charged with multiple man-slaughter and endangering air traffic are a former Swisszir captain, Fritz Schmutz, aged 54, and his co-pilot Martin Devringer, aged 37. If found guilty they could be sentenced to up to five years imprison-

This is the first time for foreign airline pilots to go on trial in Greece after a fatal air accident. A Swissair spokesman said: "It is the first such legal proceeding Swissair has faced in its 52-year history".

from Zurich landed in heavy rainfall, overshot the slippery runway and burst into flames Fourteen of the passenger trapped in the rear of the aircraft died in the flames and another 19 were injured, several

The official inquiry report laid blame mostly on alleged pilot error, but it pointed out that lights on the runway did conform to international civil aviation patterns and could have confused the pilots.

The report also alleged that firefighting crews arrived late, and failed to enter the aircraft to rescue the trapped passengers.
The trial continues.

In an extract from his new book, Paul Johnson identifies the emergence of the Third World as a

political force, reinterpreting the UN role in Suez and the Congo

The priest of relative morality

ing le tiers monde, was based upon verbal prestidigitation, the supposition that by inventing new words and phrases one could change (and improve) unwelcome and intractable world stage beckoned? Banding opened Nasser's eyes to the opportunities the age offered to an expert publicist and sloganizer, especially one prepared to play the anti-colonialist card.

There was the first world of the West, with its rapacious capitalism; the second world of totalitarian socialism, with its slave-camps; both with their hideous arsenals of mass-destruction. Why should there not come into existence a third world, arising like a phoenix from the ashes of empire, free, pacific, non-aligned, industrious, pacific, non-aligned, industrious, purged of capitalist and Stalinist vice, radiant with public virtue, today saving itself by its exertions, tomorrow the world by its example? Just as, in the nineteenth century, idealists had seen the oppressed proletariat as the repository of moral excellence – and a prospective proletarian state as Utopia – so now the very fact of a colonial Until the early 1950s, the Americans - so now the very fact of a colonial past, and a non-white skin, were seen as title-deeds to international esteem.

world celebrity and he chose it as a nations. brilliant opportunity to introduce Chou En-lai to the world, But the many other stars included U Nu of Burma, Norodom Sihanouk of Cambodia, Mohammed Ali of Pakistan, Kwame Nkrumah, Africa's first black president-to-be, Archbishop Makarios of Cyprus, the black Congressman Adam Clayton Powell, and the Grand Mufti of Jerusalem.

It was calculated that 1,700 secret police were in attendance. Some of those present were subsequently to plot exuded a secular religiosity. to murder each other; others to end their lives in jail, disgrace or exile. But at the time the Third World had not yet publicly besmirched itself by invasions, annexations, massacres and dictatorial cruelty. It was still in the age of innocence when it was confidently believed that the abstract power of numbers, and still more of words, would transform the world.

Among those present was the Egyptian president, Gamal Abdul Nasser, a handsome newcomer to the new humbug but already an accomplished rhetorician in his own right. He was an archetypal member of the "Bandung generation": adept at words, but not much else.

Once in power, Nasser was soon corrupted by it. Bandung completed his corruption, as it did for other young nationalist politicians. Why sweat at the thankless task of keeping a poor

Paul Johnson's A History of the Modern World from 1917 to the 1980s will be published by Weidenfeld and Nicolson on April 38, price £16.50

The new entity, which progressive country fed and clothed when the French journalists were already term- world stage beckened? Bandung

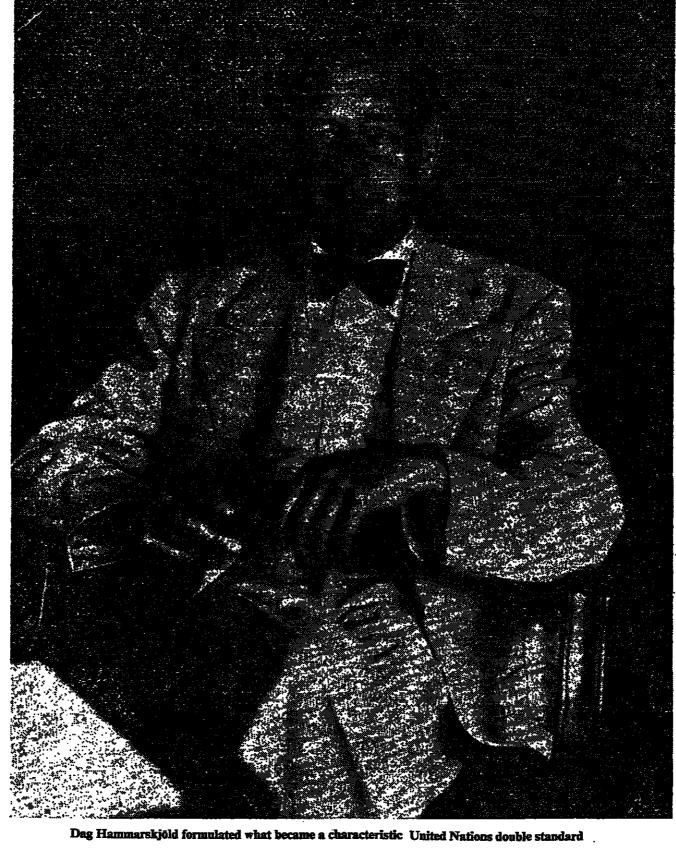

Suez is often said to have dealt the final blow to Britain's status as a great world power. That is not true. The status had been lost in 1947. Suez simply made it plain for all the world to see. The real loser in the long term was the United States. Eisenhower appeared to act decisively, and he got

Until the early 1950s, the Americans had controlled the UN. Their first mistake was to involve it in Korea, as title-deeds to international esteem.

An ex-colonial state was righteous by definition. A gathering of such states would be a senate of wisdom.

The concept was made flesh at the Afro-Asian Conference held between April 18 and 24, 1955 in Bandung, at the instigation of Indonesia's President Sukarno. Some 23 independent states from Asia and four from Africa were the Western democracies should have from Asia and four from Africa were the Western democracies should have present, plus the Gold Coast and the dropped the UN and concentrated Sudan, both soon to be free. The instead on expanding Nato into a

Instead, after much bad temper, the powers appointed a senior Swedish diplomat called Dag Hammarskjöld. A worse choice could not be imagined. He came from a highly successful family of public servants in a nation uneasily aware that it had grown immensely prosperous by staying out of two world wars. He was guilt personified and he was determined that the West should expiate it. Severe, well-read, humourless, unmarried, he

the old UN Meditation Room, a plain and unpretentious chamber, into a dark and dramatic cavern, with striking perspective and lighting and, in its centre, a vast rectangular block of iron-ore illuminated by a single shaft of light. What did it symbolize? Relative morality, perhaps. It was Hammarskjöld's manifest intention to cut the umbilical cord which linked the UN to the old wartime Western alliance, and to align the organization with what he regarded as the new emergent force of righteousness in the world: the "uncommitted" nations. When Eisenhower turned on Eden at Suez, broke him, and handed the whole problem to the UN, he gave Hammarskjöld exactly the opportunity he had been waiting for.

The Secretary-General set to work to oust the Anglo-French force and the Israelis and replace them with a multi-

Hence, though affecting impartiality, he threw his weight entirely behind the Afro-Asian camp. That meant treating Israel not as a small and vulnerable nation but as an ence was by grace and favour of Egypt: outpost of imperialism.

calling on Egypt to allow Israeli vessels through the Canal. At no point did Hammarskjóld make any attempt to get the resolution implemented. He repeatedly declined to condemn Nasser's seizure of the canal, and other arbitrary acts. So far as he was concerned the Israeli attack and the Anglo-French intervention were wholly unprovoked acts of aggression. The Soviet invasion of Hungary, which took place under cover of the Suez crisis, he treated as a tiresome distraction. His friendliness to the Egyptians throughout, and his cold hostility to Britain, France and Israel, nation UN peacekeeping contingent. made it plain where his emotional

sympathies lay. He set his heart on the public humiliation of the three powers and he got it. In deploying the UN emergency force, to move into the vacuum created by the three-power withdrawal, he insisted that its presrtpost of imperialism. as he put it, "the very basis and There was on record a 1951 UN starting point has been the recognition resolution, passed before his time, by the General Assembly of the full and unlimited sovereign rights of Egypt". It had therefore to be withexercised by Egypt in 1967 as soon as it believed itself strong enough to destroy

Hammarskjöld thus bequeathed another Middle Eastern war to his successors. More important still. however, was his demonstration of the way in which the UN could be used to marshal and express hatred of the

Right: Lumumba, Hammarskjöld's doomed protégé, captured by Mobutu's troons in December 1960, three months

before his death

DOWN

divided Africa. Only Tanzania, Zambia, Gabon and the Ivory Coast backed Biafra. The other African states supported the Nigerian regime, most of them because they feared similar secessions which they calculated would work to the advantages of the "imperialists". The political philosophy of African nationalism was based upon a theory of colonialism which was not merely false but fundamentally and systematically misleading. It was bound to lead to disillusion and war.

Unfortunately, in the watershed years 1959 to 1960, when the colonial powers began to pull out of Africa at a rapidly accelerating rate, this false

rapidly accelerating rate, this false theory became the prevailing wisdom of the UN. The critical moment came when Belgium was persuaded against its better judgment to pull out of the Congo on June 30, 1960. Belgium had rum this vast and valuable though accipitive region with excessive politirun this vast and valuable though primitive region with excessive politi-cal paternalism but, from 1920 onwards, with increasing success. What the system had produced, in its last frantic years of impending abdication, was a crop of professional arbiticians, all concealing deep tribal

politicians, all concealing deep tribal affiliations beneath a veneer of European-style ideology. The three most important, Joseph Kasavabu, the President, Patrice Lumumba, the Prime Minister and Moise Tshombe, premier of Katanga, the richest of the provinces, were bitter tribal and populist rivals. All three were volatile personalities but Lumumba was by far the most unstable. He was a former postal clerk and brewery worker turned full-time political agitator, and now Minister of Defence as well as head of the government. The Belgian legacy was fragile enough but it might conceivably have lasted a few years. Lumumba, however, chose the indeaffiliations beneath a veneer of Euro-Lumumba, however, chose the independence ceremonies to make a rabblerousing attack on white rule; five days later on July 5 the garrison in Leopoldville, the capital, mutinied and threw out its white officers, prior to surging forth to loot, rape and kill Europeans and Africans alike.

Europeans and Africans alike.

The Belgians waited for five days, while the terror spread and increased, and while Hammarskjöld, at UN headquarters in New York, did nothing, though his own UN staff in the Congo were thrown out of their hotel rooms at gunpoint by the exultant mutineers. Only on July 10 did the Belgians send in their own troops to restore order. Immediately troops to restore order. Immediately Hammarskjöld saw his chance, turned angrily and decisively on the Belgians, and on July 13, in front of Security Council, denounced their troops as a threat to peace and order.

If Hammarskjöld had done nothing and allowed Belgium to restore order, and allowed Belgium to restore order, the crisis might have been quickly resolved, with the minimum of bloodshed. Instead the Secretary-General immediately set about creating and deploying a UN army, taken not from the Security Council powers (as the UN Charter clearly intended) but from the non-aligned states from whom Hammarskjöld drew his following

In this forlorn endeavour, Hammarskjöld paid scant regard to the drawn at Egypt's simple request, a right Cold, detached, consumed by an overwhelming ambition masquerading as an ideal, he thought in terms of a political abstraction, not human beings. He formulated what became a characteristic UN double-standard: that whereas the killing of Africans by whites (as at Sharpeville in South Africa on March 21, 1960) was of international concern and a threat to peace, the killing of Africans by Africans (or of whites by Africans, or of Asians by Africans or all three races by Africans) was a purely internal matter outside the purview of the UN. Thus the UN became identified with a form of inverted racism, which was to cost an incalculable number of African lives over the next two decades.

Even in Hammarskjöld's time the toll was heavy. His UN army became a source of further instability rather than the reverse. His protégé, Lumumba, tried to set up his own secessionist state, fell into the hands of the Congolese army, now controlled by a former NCO, "General" Mobutu, was tossed to the Katangese and murdered. The Secretary-General lost his emotional detachment and became obsessed with the need to revenge the death of the king he had failed to make by using his UN troops to expel the whites from Katanga and change its regime, the first instance of what might be termed imperialism by international bureaucracy. But in the process he made the error of leaving the abstract make-believe world of his UN offices and descending into the real world of the Congo basin. It cost him his life when his aircraft hit a tree near Ndola in September 1961.

Having just come back from a first visit to Venice. I can testify that the

place is not nearly so depressing as you might think from reading Death in Venice or anything by Ruskin, listening to Wagner's Tristan, the last nine acts of which were composed Venice, or watching Don? Look In fact, I encountered in

Venice perhaps the most cheerful set of people I have ever come across in many years of wandering through the airport lounges of the world. There were eight of them, and I first saw them in Harry's Bar, a cheerful but expensive spot off St Mark's Square where guests from the exclusive off-shore Cipriani's Hotel can go straightaway upon landing without

Just one Canaletto, give it to me

attracted my attention to them was that after having dined, paid and left, they came back again half an hour later for another equally cheerful dinner. Bemused by the idea of anyone, no matter how well-heeled or hungry, going through a meal twice in one evening. I ventured to ask one of them if they were part of some gourmet or perhaps gourmand dining club, or even engaged in some wager.

"You could say that," he answered in a soft American accent. "We're a research team for a new American publication.

Testing a new anti-dyspepsia pill? Seeing if you can get into Italian restaurants without booking? Trying to get a

Mail Order Fashion by Suzy Menkes

Postman's knock with that touch of class

Mail order in Britain is as much customers to send for a class divider as how you hold samples of fabric and your knife or how you speak.

The figures are vast and they cannot come in to indigestible like the glossy browse. catalogues. One in three adults in Britain buys from a catalogue each year. Total sales add up to two thousand million pounds. In 1979, mail order outpaced retail sales in department stores. One in four parcels handled by the Post Office is a mail order

Yet I would wager that virtually no Times reader ever sees one of the hefty catalogues from the big six groups which account for 80 per cent of mail order sales (which have actually been hit hard by the recession).

Upper-class mail is the new and growing sector. It means small companies selling directly to the public and not offering the credit facilities which were and the reason why it is dominated by the C and D classes, who don't have friendly bank managers and credit cards.

Middle-class mail order sells on a different kind of credit: on particular need (especially in the children's clothes or for awkward sizes). These customers are then in the words of Finn Kennedy of Clothkits looked after and cherished".

The secret of selling directly to your public is to find it. Gening (or sometimes buying) a likely customers is essential and that is where the shops that are already in the market place can score.

This season sees the launch of Laura Ashley's first imagebuilding catalogue for their clothes (as opposed to the existing furnishing catalogue). Against a suitably pastoral varied brochures and catalogues backdrop, and interleaved with pictures of Welsh washerwomen market they all rely very pegging out sheets (you can buy heavily on sophisticated clothes those too), this is a catalogue to photographed in rural settings, underline the Ashley image of with more straw per picture rural escape. You buy it from than I see in a year. This

(Send large sae to Inca, 45 Elizabeth Street London, SW1.)

between the companies who are trying to promote an image and the credit facilities which were those who are just offering a the orginal point of mail order service. Thus Mothercare's catalogue remains a practical portrayal of the merchandise (although the Conran con-nexion may change that). The Pollyanna catalogue suggests rather a particular life style. the good will generated by small "We have tried to veer away companies, mostly fulfilling a from the chain store image of playing safe," says Pollyanna's Peter Cull, who distributes 200,000 catalogues and operates one London shop.

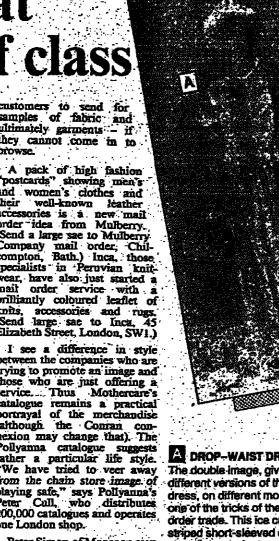

> Peter Simon of Monsoon says that his catalogue is deliberately designed to draw customers to their 15 shops. This season shows a radical change from the gently photographed ethnic clothes in romantic locations that was the hallmark of the first three catalogues, and Mr. Simon admits that he will be going back to image-building for

One strong thread links the their shops or from bookstalls country bias parity reflects the for 50p.

Ever since Terence Conran Lady Northampton's apper-succeeded in turning the Habi-tar catalogue into an arbiter of by mail through magazines) is taste and style (annual sales just one example of the well-

of a glossy magazine from that we were a middle-class for sale at £1.25. For that you get general articles on royalty, wine or dieting, a lot of full page ads, and extensive and expensive mail order. They are already boasting a circulation bigger than that of Vogue.

At a less lavish level, there is the "newsletter" sent out to existing customers, often to existing customers, often to excourage them to come into the shop, rather than actually to order by post. Paddy Campbell in Gees Court, London, who runs a small shop based on personal service, her personality and her own designed clothes, sends out newsletters inviting a small stop based on as well as children's clothes) aree a testament to their success, and also its key.

The double image, giving two different versions of the same dress, on different models is one of the tricks of the mail order trade. This ice cream striped short-sleeved cotton dress has a square-cut top and dropped gathered mid-calf skirt. In two colour variations of pink/mauve/blue with white or greeh/yellow/mauve with white. Self-coloured beit not shown. Sizes eight to 14, from the Monsoon Diffusion range £14.85 from Monsoon shops in South Molton Street, Covent Garden, and London NW3, W.8, Cambridge, Guildford, Oxford, Salisbury, Beth. Colour catalogue available from 75

clothes are for happy, scruffy families, who see themselves as part of a club", says Mr

"They tell us that if they see

someone else wearing Clothkits,

they wave happily to each other because they recognize a bond?.

I was brought back to the idea of people wearing clothes as a wrote about last week. Many of the smaller catalogues are presented by people who have seen a market gap. As shops withdraw from lines that can't be put into mass production, small businesses take over the service of producing a hand-smocked child's dress or dance leotards for tall women. (Bro-chure from Long Tall Sally 21 Chiltern Street, W1. Send sae).

We are becoming not a nation of shopkeepers, but a nation of fashion individualists. And as a mail order supplier says, it is far cheaper to make your clothes and print a simple brochure than to set up shop with fixed overheads and not enough help from your friends.

(500 pages) before you reach the area that most people think of in terms of beauty: the face and how to cherish and adorn it.

Leslie Kenton says she is writing about beauty of the body and of the spirit and her theory is that you should find a happy way of living, a comfort-able way of standing and learn the searct of coping with stress before you start on the powder

This theory is very persuasive, and the format of the book discussing first your feelings about yourself and exercise for the body - is sensible...

The author tends to offer every theory going. Surely medical opinion discounts the dea that vitamin supplements are necessary for western women eating a normal diet? If any woman has ever lost weight after having "cold water after having "cold water sprayed up and down the fronts and backs of her legs and hips

range was introduced (exclusively to Harrods) last week. Whatever you do about your

soul to improve your appearance, you need to stop your skin looking like old shoe leather. Juvena makes some strong claims for "Unitiogen", the biological activator in their skin care products. The aim is to accelerate skin regeneration, and thus make an aging skin function as a younger one. Their

style at home. I was surprised that men are given so little space, although there are some brief but sensible words about getting children's hair cut. John Swannell's glamorous photographs and especially Judith Cheek's graphic illustrations (see below) spell out a clear message. Hair Care by John Frieda, £1.50 from Marks and Spencer stores.

Hidden talent in the second division

The Neglected National Gallery

National Gallery

Stephen Cox Nigel Greenwood

Young Blood

Riverside Studios

William Wegman

12 Duke Street

During the press preview of The Neglected National Gallery, a show which temporarily transfers 25 pictures from the "secondary collection" in the basement to the Board Room in the - we hope - unneglected part upstairs (until May 31), someone suggested to the director, Sir Michael Levey, who is responsible for the selection, that the distinction between primary and secondary pictures is "Primary is pictures I like; secondary is pictures other people like". Sir Michael demurred: "Actually, I often tend to feel that it is the other way round." If we are honest, we must all sometimes have felt that. While we are dutifully trying to produce the prescribed response to some war-ranted masterpiece by Raphael or Rembrandt, we secretly recognize that this Vuillard or Sargent really means a lot more to us. Of course we are not saying therefore that the painters' order in the accepted hierarchy should be reversed, but all the same. . . . All the same, what? Are we

accepting that there exists some objective criterion, above and beyond individual judgment, which dictates that this is a great painting, like it or not, and that is a charming minor work, even if, given your choice at the end of the day, that is what you would rather take home with you? I suppose the weight of history is behind the division between those paintings now considered worthy of a place on the main floor of the National Gallery and those tucked away downstairs. But at least in the National Gallery they are all on view, there is, strictly speaking no reserve collection. We can all, if we wish, make up our own minds. And of course tastes change with the times.

Delaroche's once-famous painting of The Execution of Lady Jane Grey was supposed to have been completely wrecked in the Tate flood of 1928, but it was so intensely unfashionable at the time no one bothered to make sure until the 1970s, when it proved to be very little damaged and was grandly replaced up aloft in the National Gallery along with the Ingres and early Degas. The large Israels of Fishermen Carrying a Prowned Man which is almost the first thing you see in the Hague School show at the Royal Academy straight from the National Gallery's basement, and it will be interesting to see if it goes straight

It would be a mistake, however, to see the present show as one of candidates for elevation to the first division, secondary about to become lt is rather another stratagem for getting us to look with fresh eyes at what is, or could be. already familiar. Cleaning has brought ter Borch's Portrait of a Young Man up a treat, so in a sense it is not

familiar. But such pretty things Boudin's Laundresses by a Stream Lepine's Nuns and Schoolgerts walk ing in the Tutleries Gardens of own favourite) Otto Scholderer slightly Whistleresque portrait of his slightly Whistleresque portrait of his wife, a harmony in greys, have been transformed only by a change of context. The small painting of Narcissus, heavily influenced by Leonardo and possibly by a follower of Boltraffio (or even, after cleaning by Boltraffio himself) is strange and haunting whoever painted it, and makes very well the point that finally authorship does not matter so much. authorship does not matter so much. Never mind primary or secondary: do you enjoy it? That, at least, is something we should all be able to decide without looking at the labels.

It can be one of the advantages of looking at very recent art in London's commercial galleries that the same lack of preconception applies. Naturally, if we are looking at a show of, say, recent Henry Moores, we have a fair idea that we are supposed to be impressed, because everyone knows-he is the greatest living sculptor (though of course we still have every right not to care for these particular examples). But, with most artists younger and less enshrined, we are left to our own devices. We can check in the catalogues (if there is a catalogue) on the track record, but in the end it comes down to the same questions. Do you enjoy it? Would you like to live with it? Does it provoke any emotion in you, even of

outright hostility?

In this connexion. I have been most struck of late by the exhibition of recent sculptures by Stephen Cox at Nigel Greenwood in Sloane Gardens weil May 14. It is entitled Expenses. until May 14. It is entitled Fragments from a Grand Tour. Italy 1981-83. and represents the artist's responses to a whole complex of stimuli, sensuous and intellectual. One part of Cox's design, apparently, was to work in all the stones mentioned in Vasari's Lives. Another has been to reexamine the works of classic sculptors, from Ancient Rome to the Counter-Reformation, and evoke it through the distorting glass of Cox's own sensi-

Thus in the Ecstasies series we have the characteristic deep red and intricate mottling of Rosso di Verona used to suggest some detail from a baroque altarpiece - flying draperies. clouds upon which cherubs might perch, or in Disc the flaming egg of

creation. Other stones suggest something less excitable: the cool greyish surface of worked Calecata gives rise to the shattered *Tondo: Nuvole*, while the honey-coloured honeycomb of Traverune summons up visions of wrecked villas with murals worn away by time. In View from the Loggia - a sort of museum installation putting. the surviving fragments in their original relationship to one another there is a further teasing touch of illusionism, for is the view itself that we glimpse a piece of mural decoration or a modern artist's rendering of what lies beyond the fragmented architecture? Beyond the objects themselves there are resonances, created by a well-stocked smad as well as a very sharp eye. Cox sais the kind of art that does not go, as it were, in one eye and out the other, but stays around afterwards to tease and haunt

I am not so sure about all the artist the memory. in the Young Blood show which

encouragingly reopens the Riverside Studios after their recent problems (until May 15). The notes which accompany the show become almost apoplectic in their efforts to find some kind of links in this, on the face of it, very disparate group of young hopefuls. But it hardly seems necessary; on the whole the work speaks for itself, though one cannot always feel quite clear about what it is saying. I am not at all sure, for instance, about the intended meaning of Jonathan Froud's installation Like Papa Used to Make, which spreads a map of Italy across the floor and up a wall made catirely out of bircooked spagheto and the packets it came from certainly one cannot be certain whether the faintly obscene effect of a bloated Sicily spewing our spaghetti at

THE SILENT SPORTS CAR R - E - T - U - R - N - S

BENTLEY MOTORS LIMITED - CREWE - CHESHIRI

The Guardian said of the Bentley Mulsanne Turbo that it is "almost indecently fast."

It travels from 0 to 60 mph in 7 seconds. It will travel from 60 to 90 just as quickly.

even when accelerating through 100mph. to its top speed in excess of 135mph.

Such a remarkable performance is obtained by increasing the light alloy V8 engine's power output by 50% with a single turbocharger:

Consequently, Avon had to develop 235/70VR rated tyres specifically for the Bentley Mulsanne Turba

And a unique electronic knock sensor, which listens continually to the engine, was specially engineered and fitted to the car to prevent detonation.

Yet for all its increased power; the engine runs not one revolution faster and the traditional refinement of the carr has not been compromised.

It is as quiet to travel in as a Bentley has ever been.

It is also as comfortable at 135 mph. as it is at 50.

To say the Bentley Mulsanne
Turbo is rare is understatement.
No more than 125 people in Britain
will own one by the end of this year:

If it is standing still, you will recognise it by the famous radiator. This is the only Bentley ever to have its radiator painted the same colour as the body of the car:

badges on the front wings. If not, rest assured, the Bentley Mulsanne Turbo will go just as fast without them.

Enthusiasts for the marque say this car truly reflects traditions created by Bentley at Le Mans, Brooklands and Montlhery.

The makers simply state that in the Bentley Mulsanne Turbo, the Silent Sports Car returns.

THE TIMES **DIARY**

Douane roaming

If the threat of a strike by customs officers at Dover is carried through, do not be deluded. Stories of a free run for smugglers are put about only to tempt the gullible. In November 1977, as consumer affairs correspondent of this paper, PHS was dispatched to France for the express purpose of returning with as much duty free booty as a Citroen GS could carry. Orders were taken around the office, and I loaded up with 170 litres of French wine, 17 litres of spirits and a whopping bundle of cigars and cigarettes. No one else on the ferry would believe my claim that there would be no customs on duty when we arrived at Dover, and they were right. When we docked I was met by three senior officers who had patriotically remained on duty. They checked the size of every bortle, weighed the cigars, measured the cigarettes, and I ended up with a bill for £238. My whisky cost twice what it would have done at home.

Hermetic

An incident, about which the Ministry of Defence is curiously reticent ("we will neither confirm nor comment") occurred when the carrier Hermes was on its way back from victory in the Falklands last summer. Passing the mother ship to a Soviet fishing fleet, the Hermes crew were astonished to see their Russian counterparts lining the decks and raising a cheer as a professional salute for a job well done. "The incident is neither recorded nor recalled by anyone on board the ship", the MoD says - but I know otherwise.

More from the National Trust shop: a pottery mug. decorated with a perject, but blue, conslip and with a minute label on the bottom, "Made

At the mouth?

I do not know who or what they have been pushing out of TV-am most recently, but it has had a dire effect on the water of Camden Lock. Yesterday it was covered in a repulsive head of white foam. The official explanation was to lay the blame on "a load of rubbish", which is what some people have thought of the show so far.

BARRY FANTONI

Of course they are. How else could he and I both share the same view of that frightful Goebbels?"

Plane song

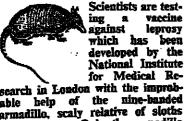

Announcing their new open-air scason in Regent's Park yesterday, officials of the New Shakespeare Company were apprehensive about plans to stage two eighteenth-century English operas there for the first time. The generic classification of the works as "pastoral" does away with the need for scenery, but if the heavens open what about the harpsichords, sackbuts, psalters, and tinkling cymbals? Prophetically, much of the ceremony announcing the new season was rendered inaudible by birdsong and overflying

No flap

Walter Slezak, the actor, whose obituary we published yesterday. was bequeathed an immortal title for his autobiography, published in 1962, by his father, the Czech tenor Leo Slezak. It was the most famous of all lines of unscripted Wagnerian dialogue. Slezak sang his Lohengrin aria greeting the swan drawing the boat which would transport him to heaven, turned to step into the boat and found that it had already gone. Turning to the audience he de-manded: "What time's the next

No kidding

A class of nine-to-ten-year-olds in a Surrey middle school were given a vocabulary exercise, naming the female and offspring associated with words such as: Ram? - Ewe, lamb. Fox? - Vixen, cub. Negro? - to which a pupil replied: "Negress, child." "Child" was struck out, and the teacher substituted "Picca-

for Medical Research in London with the improbable belp of the nine-banded armadillo, scaly relative of sloths and anteaters. Only the armadillo shares with man the susceptibility to leprosy, whose bacillae cannot be cultured in laboratories. Such incidents of cosmic serendipity (for man, if not armadilloes) are the best reason I know for saving any species of anything, however humble, ob-PHS much longer than intended.

Howard Davies on the wider issues raised by the White Paper on cable TV

Do we really need the BBC?

The much-delayed, yet comprehen-sively leaked White Paper on cable television is due to appear on Thursday. It will show that the freemarket sentiments which, for the most part, informed the Hunt Report have overridden Home Office caution and the Home Secretary's own instinctive feeling for paternalist regulation. Though there will be a cable television authority, the principles guiding its actions will be far from those of the BBC charter.

But important though the green light for cable is the White Paper, far from closing the issue, has sparked off a more wide-ranging debate on the future of broadcasting. Already the case for the dismemberment or even abolition of the BBC is gaining ground among the Prime Minister's advisers. And the Central Policy Review Staff (think tank) has been asked to consider the future of broadcasting policy. For once the analysis will go further than a sterile debate about the size of the licence

The argument within the Government on cable has become the most public manifestation of the struggle between those in the Conservative Party who want to extend the principles of the market into other, hitherto controlled, areas of national life and those more traditional Tories who see state control of broadcasting as part of the maintenance of standards. Mrs Thatcher herself sits uncomfortably across this divide.

In the case of cable the winner was never in doubt. Cable is, after all, newfangled, or hi-tech, depending on your vocabulary. It was hard to make a case for standards in something that has never existed. And even the most interventionist Tories doubt that the Government can successfully manage innovation.

The BBC is another can of worms. Though its self-serving arguments against unregulated cable were rightly rejected by the Government. an outright assault on the monopoly is a more tricky proposition. Yet it is not easy to see a rationale for the position we shall soon reach, with essentially unregulated "narrowcasting" and monopolistic broadcasting.

The authors of a recently pub-

lished Institute of Economic Affairs pamphlet* on the economics of cable television point out that many of the arguments used against government control of cable are applicable to the BBC in its current form. They recommend an independent review of the present method of allocating frequencies, which should consider the economic case against the BBC.

What is the essence of this case? Its proponents argue first that it is incumbent on those who support a monopoly to make a case for it. They point out that the original reason for establishment of a national system was one of administrative convenience. The argument that the BBC was necessary to prevent interference was always

outcrops in a shifting landscape.

symbol of the high standards of public-sector broadcasting - but can it continue to uphold this role as cable television nears?

bogus: it is quite possible to auction frequencies so as to avoid this problem.

The opponents of the present BBC structure argue that there are only two possible economic justifications for state control of broad-

The first is that the market, left to itself, may not generate the type and quality of broadcasting desired by the population as a whole because broadcasting benefits those who do pay for it. This is what economists call an externality argument. In other words, because the benefits from broadcasting do not flow only to those who pay for them, the cost-benefit analysis on the part of the payers may cause them to pay for too little of the service, since they do not capture the benefits that flow elsewhere.

Such an argument may apply, for example, to education. Even if your neighbours do not pay to educate their children it may be in your interests to do so if they are less likely to break your windows as a result. Yet you are unlikely to be willing to do so directly because it is hard to qualify the extent to which your windows benefit, as opposed to those of others in the street. So the end result: unless the local authority takes a hand and makes every one pay, is less education than people

It is possible to imagine such a resolves this problem.

case for news broadcasting. A democratic society should benefit from an informed electorate. The quality of decisions made by your illow electors may be higher if they know what is going on around them. Yet the argument is thin. A private newspaper industry provides adequate coverage at very low cost to the individual. Television and radio are clearly inferior media for the wide dissemination of detailed information and sequential argument. Television, in particular, in placing emphasis on performance skills in politicians, may well lower the quality of public figures and the electoral decisions made about

But in any event, the argument can apply only in the case of news and current affairs. What possible "externality" can be attached to the transmission of Blankety Blank at public expense?

The second argument for public broadcasting is that it is "a non-excludable public good." In other words, because it is practically impossible to prevent others watching - free - programmes for which one has paid, there is a heavy disincentive to pay. The result is, again, that the free market generates less broadcasting than the sum of individual wishes would imply. The licence fee - with the law behind it -

but it is bard to maintain that this leads inexorably to the creation of a monopoly. With cable, the argument clearly falls because a pay per-view system is perfectly possible. And in a dystem fended, by advertising, premise free-riders pay through her parchases of advertised goods. Continemore, what reason is there ampose that the BBC provides g sporoaching an optima level of broadcasting now either in terms of cost or viewer preferences?

It may have some success in answers the question of whether it is ng its programme budget. which was more than £470m in 1987-\$2 in a way that viewers or fisteners want. What is clear, though, is that the costs of different types of broadcasting bear no relation to

their audience appeal.

Many consider this entirely landable. But they should be clear about the essence of the economic transaction they favour. The BBC's cultural output is funded by a licence fee levied evenly on all television set owners. This is a most regressive form of taxation. The poor are obliged to pay a higher proportion of their income than the etter-off, to fund the unconstrained artistic endeavours of BBC drama producers, which largely benefit the

The principal beneficiaries of the arrangement are, as with any monopoly, its employees. Which is why the voices of these otherwise indefatigable guardians of the interests of the oppressed are seldom heard raised against this inequitable arrangement.

The economic arguments are therefore, unpersuasive. We are left with the view that there are wholly unquantifiable benefits, in terms of

No one seriously doubts that it is possible to make money out of broadcasting in this country, but would an entirely commercial service be one of which a government responsible for it would be proud? Cable will soon provide us with an operating model of an alternative broadcasting system. It has already revolutionized television in large areas of the US. And, as the IEA authors point out, the choice available to viewers in Manhattan. in quality and variety, makes a nonsense of the traditional "quality" argument for the BBC unless one is prepared to restrict viewers' choices imply to make them more likely to watch the "quality" product.
It seems that if Mrs Thatcher has

a second term there will be a radical reappraisal of public-service broadcasting. The present structure - conceived in an era of optimistic collectivism - is creaking, expensive and out of touch with its taxpayer-

Roger Scruton

You've just got to have a nice day

who knows the city can refuse? Some love it for its vitality, some for its charm; some for its modern offices, some for its Victorian factories; some for its culture, some for its vulgarity. A place that is loved for every reason is loved for none in particular. It is a mirage, whose pleasant prospect derives from our own subjective craving. By its universal permission, New York lends zest to appenie, and gratification to every small desire. It counts nothing human aften to itself, and makes only negotiable demands. You can take or leave the city, but it is adamant that you should take it of your own free will. Hence, behind the bustle and boldness of New York, the visitor experiences a rare kind of tranquit-lity. This New York peace is of

special interest, now that the term

"peace" has been captured by people with a motive to conceal its

New York peace is founded on conciliation. It acises because people actively pursue their own advantage. while propitiating those who are similarly minded. There is a common principle which urges the citizen to agree terms, even with his opponent - indeed, especially with his opponent. Everything that happens, happens by agreement. And therefore a lot happens. The social structure is bent towards agreement, about matters previously considered or decided. People move through the streets. primed for agreeable encounter. They make rapid contact, and as rapidly detach themselves, their hands and faces mobile with

excitement. American courtesies are largely to be explained by this public pursuit of agreement. We may complain of the manners which permit the instant use of Christian names, the immediate revelation of personal details, the frank discussion of everything that could conceivably become a term in some hypothetical contract. Even preliminary gestures can seem to us impertinent or insincere. Surely, we think, the airline hostess cannot mean it when she tells us to "have a nice day".

God could mean "have a nice da to all and sundry, but in God's voice, these words would express, not conciliation, but a most terrible command. American courtesies are never commands; they are preliminaries to an agreement. Hence the hostess does not tell us to listen to the safety instruction. She does not even ask us. She says: "We of United Airlines should like to share some important information with you". In other words: "I bring you a gift of knowledge; how will you respond?" The American instinct for contract immediately answers: With my second best attention. Terms agreed".

What I have just described might Review.

New York has asked to be expressed more pompously a celebrated and what man or woman the phenomenology of the market like experienced through the persuit of rapid contract. Hotesty at a premium; so are open activity, and the rights of man The neace is one of the consequence should not surprise us. For he transaction occurs without the consent of the parties. One may be chested; but never coerced on pressed or terrorized.

People can squeeze you first you or even gross you out but the cannot by to get on your back without being thrown out for the jerks, finits and weenies that they are, When Milton Friedman exhaits his countrymen to get the star of their backs, he merely reminds them of the fundamental principle of American existence: nothing is to happen except by agreement.

Friedman is not the only econ ist to have praised the market for its efficiency, for its equilibrium, for the tacit knowledge "that it contains But even if he is wrong - even if the socialists are right in their defence of a "planned" economy - that would not after my conviction that the market is the most acceptable mode of distribution. It is the means whereby peace is made real among strangers: and that is its value.

We should not worry if the market in equities or real estate does not appear quite like that. Those are merely the dubious out-growths of a minutely thriving organism. Ask yourself why auctions, cattle mark, fairs and markets are so attractive Ask yourself why people flock to. them, even when they have nothing to buy and nothing to sell. Ask yourself why these places have the character of festivals, in which expressions and gestures convey the highest animation and social readness. The answer is simple. They are places where we enjoy the spectacle of multiple agreement, places where strangers cooperate, regardless of their individual interests and aims.

Of course the market is imperfect as is every human thing. The socialists may be right, that it elevates freedom over justice, and means over ends. There is hardly a moralist who has not been offended by the profound amorality of the And of course there is a sense of the exchange. To make us which she does not mean it. Only the exchange of exchange into the congruence of the exchange is indeed to market; by its ability to transform simplify human existence beyond recognition. But to ingnore its true merit - as the most widespread and immediate experience of human peace - is to take a step in a dangerous direction.

It is, I believe, no accident that those political systems which have abolished the market have also come to understand the term peace" in a novel way: not as the ability to accept and conciliate one's opponent, but as the ability to silence him forever.

Geoffrey Smith

Look left, look right - then dither

An election manifesto usually serves a double purpose: it is both a prospectus and a treaty. It aims to attract the votes of the public, and itseeks to provide a basis on which the different factions of the party can unite by setting out an agreedprogramme for government.

The Conservative manifesto will this time be much more a prospectus than a treaty, largely because of Mrs Thatcher's dominant position. The Labour manifesto, on the other hand, will be much more of a treaty because the party cannot take its unity for granted even in the heat of an election campaign. If the recent policy statement The New Hope for Britain is anything to go by, Labour's platform will be deter-mined by the balance of power within the party rather than by the need to woo the electorate.

The Liberal-SDP manifesto will be different. It will have to be a treaty and it will also have to pretend to be a prospectus for government, because two parties are involved. But hardly anyone believes that the Alliance has a serious chance of forming the next government, so in this case the manifesto will also have to be a basis for negotiation if the Alliance holds the balance of power in the new Parliament

Some of those who have been involved in the joint discussions between the two parties are well aware of this. But not all of them: for some it is quite enough to think about getting agreement with their Alliance partners, never mind about potential coalition partners in the future. Yet the greatest significance of any particular item in the joint. programme for government is whether it would make it easier or harder for the Alliance to come to an arrangement with one of the other parties after the election, whether to form a coalition or some looser link. Dr David Owen may have

fluttered the dovecotes a bit last week by saying that Polaris should be extended until the end of the century as a British deterrent unless deep cuts in strategic forces are agreed at the Geneva disarmament talks. That is contrary to Liberal policy. But in saying what he did Dr are being prepared makes it much ment, merely drawing affection to a Parliament there will be a minorly disagreement. The two parties are government, on which the Aliance maited in their opposition to would be able to exercise and the parliament they both take the view that Polaris should be included in the

there is no settlement there.

That might in the longer term become a matter of great importance for Britain, but it is of much less immediate importance than whether cruise missiles should be deployed here. On this issue the Alliance. negotiators have agreed to be indecisive. They propose that if there is no settlement at Geneva the attitude of the Albance should depend upon how the talks broke down. This is a weaker position than the SDP adopted at its January council meeting in Newcastle: there is now no commitment to deploying cruise if the Geneva talks are unsuccessful. But it would leave the Alliance a free hand to agree with

either Labour or the Conservatives.
On other issues the Alliance
would find it impossible to do a deal with Labour on the basis of the policies set out in The New Hope for Britain. The Alliance could not go into partnership with a party is committed to withdrawal from the EEC and to an industrial policy of which provided for unlimited extensions of public ownership. Nor could it accept such a reflationary programme as is proposed in that document though that issue coald presumably be fudged more easily. The policy differences with the Conservatives.

Conservatives would be less acure.
The Alliance would certainly require some changes in Conservative economic policy and insist on a greater attachment to civil liberies. But the principal obstacle to a deal between the Alliance and the Conservatives would not be differences in policy at all: there would be strong resistance within the Alliance to becoming partners of the Conservatives, simply because they are Conservative. The Alliance would be reluctant to risk being tagged as right of centre.

There remains the possibility that the Alliance might do a deal with Labour on policies very different from those which seem likely 10 appear in the Labour manifesto That would probably involve a further split in the Labour Party. It is what the Alliance would like best; but it is a long shot.

The way in which the manifesion moderating but only a negative influence - able to block the policies Geneva negotiations; but they have of which it disapproved, but not to Home Affairs Correspondent only been able to agree to differ as to insist on those which it wanted.

Making the punishment fit the victim

courts nor prison can solve the problem of the rising crime rate. By the time that the criminal falls into the hands of the police, and in

But, as Mr Fauikner says, the development of non-custodial penalties has not reduced the proportionate use of custody. It has, he says, become increasingly questionable whether custodial sentences do in fact have any deterrent effect on the individual offender, or whether imprisonment can reform character

That questioning has already led to proposals within the prison service to replace Rule one - the

The change from concentration on the offender to efforts to deal with the situation in which crime arises - the key to the seismic disturbance - is reflected in Sir Kenneth's report to Mr William Whitelaw, the Home Secretary, on his action plan for the Metropolitan

One of the aims is to shift the emphasis from a fire brigade role against crime after it has been committed to a more "pro-active" role. This has come to mean intervention by police with the involvement of other agencies and to identify and deal with the situations in which it occurs. One example is the neighbourhood watch scheme, in which people look out for suspicious behaviour and liaise with police. Recognition by police that housing allocation policies, truancy or bad housing design can contribute to crime opens the way to interagency cooperation.

That is being matched at national level by a standing committee of officials from all the separate government departments whose policies can either encourage or prevent crime.

That cooperation springs from a new awareness that is finally overcoming traditional interdepartmental rivalry. It is now becoming accepted that the Home Office, the police, prisons and courts cannot by themselves, acting singly or in concert, carry out effective law and order policies. There is also the realization that all the pressures and perhaps policies in recent years have forced the law and order agencies into making a "demand-led response" - a phrase first articulated by Sir Brian Cubbon, Permanent Under Secretary, at a meeting of 60 civil servants and others, including Sir Kenneth Newman, in 1980.

Subsequent Home Office and police thinking has been directed to reducing demand. Thought is now being given within the Home Office to achieving that aim by new approaches in legislation.

An example is the Telecommunications Bill now before Parliament under which CB radio enthusiasts using illegal equipment would have to forfeit it rather than be taken to

Sir Kenneth Newman: less focus on Mr David Faulkner: is prison really

Up to now, the main thrust of opportunities for crime and to seek policy by successive governments has been to strengthen and extend the power of the courts and other agencies dealing with offenders and to make extra resources available to them. This has been accompanied by legislation and effort to achieve the reform, or at least the rehabilitation, of the individual offender.

or change behaviour.

"The police, probation service, the courts and prison service are all facing fundamental questions about their purpose and objectives."

very buttiess of the present system -which seeks to encourage offenders to lead a good and useful life.

community to reduce the

court for any criminal offence. The use of fixed penalties for a wider range of traffic offences is made possible by the Transport Act 1982.

Another use of fixed penalties might be for non-payment of television licence fees. In 1981 there were 70,000 convictions for nonpayment. A surcharge might be made for non-payment of VAT

instead of prosecution. New ways of dealing with social security frauds

are also being considered. Mr Faulkner said at a Southampton University lecture in January: "I have sympathy with the view that the scope of the criminal law has grown, is still growing and should be reduced." The most promising approach, in his view, is to question vigorously all proposals for new criminal offences. Anything up to 200 or more may be created in a single parliamentary session.

There are also cases in which civil rather than criminal action could be taken. But, as was shown recently in. the most publicized example so far, the Exit case, where civil action was taken instead of criminal, there can be controversy.

There is also scope, if limited, for de-criminalizing certain offences or, as in the Criminal Justice Act, reducing the use of custody. It stops immediate imprisonment for vagrancy and soliciting.

In many parts of the criminal justice system enthusiasm is growing for greater use of compensation or victims, perhaps with the aid of a mediator. Alongside greater concern and aid for victims, experiments in reparation are going on in several

places.
The Criminal Justice Act also embodies a change on similar lines to a concept of British justice going back to the twelfth century. The Act accepts the principle that the court's duty in a wide range of cases is to the victim rather than to the state. The Act breaks with precedent in allowing courts to make compen-sation orders instead of dealing with offenders in any other way. Pre-viously the order could be made only in addition to another form of

That important change and the prospective use of civil action instead of criminal modifies the notion - developed by Henry II that injury between people is not simply an offence against the victim but a breach of the King's peace and a threat to the security and well-being of the whole of society. Over the centuries, the Crown has taken more and more responsibility for dealing with offenders on behalf of

the victim and punishing them.

Privatizing such legal action would seem to be well in keeping. with the philosophy of the Thatcher government, as does neighbourhood watch, a return to the virtues of self-

THE STUFF OF DREAMS

In putting himself forward as "Prime Minister Designate" Mr Jenkins, aided by Mr Steel, has anointed himself with a constitutional nonsense. There is no such post, any more than thereis, constitutionally, the post of Deputy Prime Minister. The post of Prime Minister depends on an ability to command a majority in the House of Commons, and not on any hypothetical projection of popularity in opinion polls or anywhere else.

However the origins of this nonsense are only too clear. They date from the halcyon days of the Liberal-Social Democratic Alliance when its members could dream of forming a government. At that time it was felt necessary to overcome the duality of the Alliance - not to mention the tetrarchical nature of the SDP by identifying a single figure of prime ministerial calibre, without having to devise a procedure for electing him. Mr Jenkins seemed the obvious choice, even though the procedure itself terial style to that of the leader of contained its own inconsist an aggressive minority party in encies, certainly when embraced opposition. by two parties which believe in proportional representation. lates that the Alliance would Under proportional represen- suffer in the forthcoming electation a Prime Minister would tion if it had to field Mr Jenkins normally come from the leader as its leader when all market of the largest party in a coalition, research suggests that Mr Steel and not through such an old-

election was devised.

In the event many members of the Alliance, from both its constituent parties, feel that Mr Jenkins has not really earned the title which was put in his way. Mr Steel, on the evidence, can command more popularity, and would certainly fight a more inspired election campaign. That is now the more modest target of the Alliance, having implicitly discarded its hopes of forming a government

This disappointment with Mr Jenkins may not be altogether fair, since in the art of government, as opposed to the art of popularity, he has infinitely more experience than Mr Steel. But the game of political popularity does not need to be fair or unfair and even if Mr Jenkins had found the House of Commons to which he returned an agreeable place, which he has not, he would still have had difficulty adjusting his ministerial style to that of the leader of

Mr Steel presumably calcuwould make more of a splash. fashioned process as "emerging", He has had to devise a method which used to be the Tory of projecting himself more be much of a dreamer.

speciality until a leadership prominently in the elections without reneging on the public commitment to Mr Jenkins's preeminence as a prime minis-terial candidate. That preeminence, incidentally, which was used as a cogent argument by Mr Jenkins's canvassers in the leadership election may now be recalled ruefully by the supporters of Dr David Owen.

So Mr Jenkins will retain his dignity but it will be Mr Steel who is more often in front of the cameras. Behind him the two parties of the Alliance will fight on a joint programme of government, covering the essential issues which they would have to face as a government, and about which any potential supporter would be entitled to know. The parties also have separate shopping lists of policies for their respective aficionados.

That is the window dressing Behind the counter, however, most members of the Alliance Mr Jenkins included - will be struggling hard to retain their seats. In those circumstances Mr Steel is right to dominate the centre, secure not only in his hold over his constituency, but also in the knowledge that he is likely to be leading a larger group of MPs in the next Parliament than Mr Jenkins will. It may not be the stuff of dreams, but in his party political management, Mr Steel has never shown himself to

CND aims and Soviet propaganda Department of the Communist Party of the Soviet Union, which

From Mrs Caroline Gourlay Sir, I read your leading article today (April 21) with interest and feel myself that it is a pity that the CND is to be represented at the Prague World Peace Council, which will be little more than a Soviet propaganda

I am glad, too, that you pointed out that the vast majority of the rising numbers of CND members are not from the hard left. I know many who are not even socialist, though next time round they might well vote for the Labour Party.

What you might also have explored is the reason for this expansion which, I would suggest, is directly related to the increasing anxiety feit over this Government's apparent lack of concern for the fact that the arms race is out of control.

If Margaret Thatcher is concerned to halt the proliferation of nuclear weapons she has not managed to communicate as much to the general public. On the contrary, her record of voting against disarmament motions at the United Nations can only lead people to the conclusion that she does not take the negotiations seriously. Yours sincerely,

CAROLINE GOURLAY. Hill House Farm, Knighton, Radnor, Powys.

valuable measure through the House From Lord Chalfont

Mer Bruce Kent's letter (April 22) commenting on your perceptive leading article (April 21) is characteristic of the disingenuous sophistry used by the leaders of the CND to conceal their real political aims from the rank and file of the movement.

The red herring about the END (European Nuclear Disarmament) Convention in Berlin is, of course, a typical device to divert attention from the important fact, which is that CND is now to be represented at a meeting of the World Peace Council in Prague in June. It is therefore important that members of the campaign should know something about the WPC.

It is the most important of the Soviet Union's front organizations. It is controlled by the International

Finance for films

From Sir John Terry Sir, My friend Mamoun Hassan refers, in his letter of April 19, to the well known maxim of the American studios that only one film in 10 makes a profit. Today perhaps that might be one in six. In any event it is worthy of note that the National Film Finance Corporation has received profits from one in three of the feature films it has helped to finance, a record unequalled by any group in the private sector. So much for the charge of elitism!

The regrettable fact is that the corporation has throughout suffered, and is still suffering, from the very limited nature of its funds and it has therefore not been able to finance any of the large film enterprises which are the ones that from time to

Redlynch, Nr Salisbury, Wiltshire, time show really exceptional profits.

Mamoun Hassan refers also to the fact that Gandhi would not have been made without government support through the National Film Development Corporation of India. As I have been advising that body concerning Gandhi for over two years, I can confirm that it provided over one third of the production finance required and that a very substantial profit already seems assured.

What a pity that the size of our National Film Finance Corporation's resources did not enable it to contemplate a similar investment.

Yours very truly, JOHN TERRY,

Denning House, 90 Chancery Lane, WC2 April 20.

Aid to Third World

From Mr L. C. V. Walker Sir, Professors Bauer and Yamey

(feature, April 11) should visit Thailand to see refinted the attacks they make on foreign aid. The results of foreign grants and special loans are clearly to be seen in infrastructural improvements to the economy, higher productivity in agriculture and improvements in the health and welfare of all sections of the population, especially the rural

These things would, without doubt, have happened without foreign aid, but they would have taken decades longer to accomplish. Foreign aid, properly and prudently applied by successive governments, has promoted industrial development, has relieved rural poverty.

Also, though the Thais look to the West basically because of their passionate belief in the freedom of the individual, the fact that they have received aid has undoubtedly strengthened the practical bonds between Thailand and the West Economic stability and growth has helped provide the military strength that gives the clout to make them a friend of the West to be reckoned with in the turbulent regional political scene. General Marshall, who was in a position to judge, certainly did not share the professors' views on the military and

security value (to the West) of aid. Three of the professors' dogustic statements are clearly disproved here. The fourth, that "aid is neither

that channelled through intering unemployment in the West" is national agencies. The professors complain that "aid does not make friends for the West". But aid can and does make friends for Britain or Germany or Sweden or wherever - if the British or Germans or Swedes are involved. People can relate much more strongly to Their fifth point, that "aid is specific countries and people than to the impersonal "West" represented by an international agency staffed by

polygiot bureaucrais. New methods of implementation should be examined and tried. An emphasis on specific projects, where marginal viability can be made positive by a combination of outright grants and soft loans, could be a promising route to follow. The use of guarantees rather than grants or loans is another.

International aid is one of the great concepts of the postwar world and in spite of many failures has benefited enormously the West and the recipient countries. A certain, degree of cynicism about it and about the ways in which it has come to be implemented is understandable and, indeed, desirable. But to call for its abolition or curtailment seems to justify the classic definition-of a cynic as "someone who knows the price of everything and the value of nothing".

Yours faithfully, L. C. V. WALKER, 2/1 Soi St. Louis 1, Sathorn Road South, Bangkok 12, Thailand

Getting it right in industry

From the Bishop of Lincoln

brutal dictator, who was convinced Sir, Your leading article, "Recovery that his Reich would last for a without inflation" (April 16) suggests that there are two economic alternatives for this country - low inflation with unemployment above "the natural rate" or fuller employment with higher inflation.

But in between these two abstractions are millions of people in managements, trade unions and on shop and office floors. The paradoxically almost-Marxist determinism of your article seems to ignore the factor of industrial relations - ie. the understandings and agreements and bargains these millions can make between themselves and the atmosphere of trust or distrust that can be engendered between them to., the good or ill of productivity.

Your article states ". . . the Government cannot in the long run do anything - except by improving the workings of the labour market to promote full employment anyway. ..." But surely a Government can and should promote at least fuller employment by encouraging more enlightened industrial

Leaving it all to the market will simply result in the old, irresponsible see-saw of whoever gains the tactical power on the shop floor getting what they want - management with unemployment, work-force when employment is full. This is because the market is a place full of people and not an abstraction in economists' minds. There is a politics and not just an economics of recovery, and this your article seems

One would have hoped that the severity of the recession might have wonderfully concentrated the minds of all parties in industry to establish ... better mutual arrangements and that any Government would energeti-cally encourage and support them. Present Government labour legislation seems a distraction from this central issue.

Some current troubles look just like the old ones we are so wearily used to. At the same time companies which are seriously trying to grasp the nettle show signs of being the ones that will prosper themselves ... and benefit the community.

surprising since the majority of Yours faithfully, **TSIMON LINCOLN.** Bishop's House, · Eastgate, Lincoln. April 21.

Post-coital pill

From the Chairman of LIFE Sir, Professor Glanville Williams (April 13) stoops to the tactic of attributing juvenile ideas to us "outand-out anti-abortionists" in order to mock them.

Sir, On April 20 you carried a report We pro-lifers do not argue that the fertilised ovum must be protected to attend and address the Prague "because the soul entered with fertilisation". We do not talk From this, your leader writer on April 21 draws the meretricious theology (interestingly, it is he who invokes a rather silly report by one of the innumerable working parties of the British Council of Churches!). We simply accept the massive evidence of modern science that human life begins at conception (fertilisation). As embryology, the astonishing recent development of genetics and equally astonishing achievement of so-called test-tube. babies prove, fertilisation is the only event of which one can say, "that is when I began being me - and I have been me, a human being, ever since"

> Modern science finally makes it ... impossible to propose any alternative starting-point. Implantation (like "quickening" and birth) is an incident in a unique human life aiready begun. It can successfully occur only and precisely because what is implanted is already a living human being.

We do not call a newly fertilised human embryo a "child" simpliciter, But it is a human being - an embryonic person, a child (and an adult) in the making. We do not call an acorn an oak. But once it has started to sprout it is becoming a

Professor Williams wants the law to be "sensible" (i.e. to agree with him). But the law does not discriminate against the small and . the young. It and democracy reject the idea of second-class, "sort of" ... human beings and says that human life is human life, regardless of size and age. Hence the law should provide just protection before as well as after the incident of implantation.

The alternative is to abandon justice and democracy, as well as to fly in the face of modern science. On this occasion, as always before, is not abortionism muddleheaded and retrogressive?

Yours faithfully J. J. SCARISBRICK, Chairman,

appropriate nor necessary for relievclearly debatable. The fact is, however, that this developing country is a substantially greater importer of goods from the West than it would have been without aid. Surely this must have benefited the exporting countries.

neither appropriate nor necessary for solving the so-called international financial crisis", is hardly to the point. The present crisis (socalled or not) is largely due to commercial loans made in the frenzy of competitive lending which characterized the intenational banking scene until comparatively recently. It is difficult to see the justification for dragging in this irrelevancy. Are the professors setting up an Aunt Sally so as to be able to knock it down, to somehow associate a commercial banking

disaster with the aid they so clearly oppose in principle? There is certainly a need for a reappraisal of the ways in which foreign aid is implemented in some, perhaps many, of the recipient countries. But the call is for a review of methods and monitoring. In many countries there is misuse and corruption - including the use of foreign aid for local political ends. This can be avoided by the mutually agreed monitoring of specific projects in place of unconditional

Aid by bilateral agreement with representatives of the donor country. involved. becoming genuinely would be better, in most cases, than April 16.

Judge holds court in gold mine

From Our Correspondent.

Dolgellau A judge changed his judicial robes for a sweater, anorak and vellow safety helmet yesterday to take a jury and court officials into a Welsh gold mine.

Judge Morgan Hughes was hearing a case involving two former directors of the Clogau David's gold mine near Dolgellau, who face deception charges involving mining equipment valued at £80,000.

He agreed to a prosecution request that they should visit the mine where the gold was obtained for royal wedding rings. The party travelled the 45 miles by coach from Caernarion Crown Court to Dolgellau and transferred to a fleet of police

Outside the mine the judge held a meeting in chambers with counsel as the clerk took notes while leaning on a fence.

Once inside, the judge and jury inspected vehicle tracks and an area where there had been drilling for gold. The jurors, in wellington boots, were given police torches for their Hawkins. quarter-mile trek into the mine. Long

The court was later recon-vened at a car park near by successful pursuit and he was to where Mr Gerry Williams, a share the victory in the Daytona mining expert, continued his 24 Hours no fewer than four evidence in the open air. Somerset win at bridge festival

By a Bridge Correspondent

By a Bridge Correspondent
There was a record entry for the
fifth Cartmore Jersey Festival of
Bridge. A large contingent of players
from the mainland occupied the
leading places in the Channel
Islands pairs championship.
Past winners, Douglas Romain,
of Jersey, and Gerard Faulkner, of
Essex, had established a commanding lead at half-time, but then fell
away so badly that they finished
nearly 200 points behind the
winners, who were G. J. Heal and T.
E. Girdlestone, of Somerset.
Changionship pairs:
1. G.J. Hasal, T. E. Girdlestone (Somerseo)

C. Offlictonic, of Somerser.

Championable pairs:

OBITUARY SIR RALPH TURNER Major contributor to Sanskritic studies

University, and from 1937 to son.
1957 was its Director. He made many important contributions to Sanskritic studies.

Raiph Lilley Turner was born on October 5, 1888, and educated at the Perse Grammar School and Christ's College, Cambridge. He took a first class in both the Classical Tripos and the Oriental Languages Tripos and won the Brotherton Memorial Sanskrit Prize. He was given a Fellowship at Christ's in

He joined the Indian Educational Service and at the close of 1913 was appointed Lecturer in Sanskrit at Queen's College, Benares, which soon after was transformed into the Benares Hindu University. In 1915 be joined the Indian Officers' Reserve, was attached to the 2/3rd QAO Gurkha Rifles and won the MC. This experience attracted him to a close study of Nepali, and some years later he compiled a Comparative and Etymological Dictionary of that

language. In 1923 Turner retired from the Indian Educational Service. A few months earlier he had begun his long connexion with the recently established School of Oriental and African Studies in London, as head of the department of Ancient India. Among the studies which he contributed were Gujarati Phonology, The Position of

Sir Ralph Turner, MC, one of Romani in Hindu-Aryan, and the leading orientalists of his The Gavimath and Palkigundu day, died on April 22 at his Inscriptions of Asoka. He also home in Bishop's Stortford. He edited Indian Studies, presented was 94. For some 34 years he to Professor E. J. Rapson, and was at the School of Oriental Indian and Iranian Studies. and African Studies, London presented to Sir George Grier-

Sir Denison Ross, the first Director of the School, retired in 1936, and Turner was appointed his successor. He combined the directorship with the Chair of Sanskrit of the University, which he held continuously from 1922 to 1954.

The 1939-45 War imposed a heavy strain upon the School because of the need for intensive and necessarily brief linguistic studies for fighting officers and men designated for Asia and Africa. But the requirements were met and Turner also did valuable work as a member of the Linguists' Committee of the Ministry of Labour and National Service. He was knighted in 1950 and in the same year became an honorary fellow of Christ's. He became Professor Emeritus of Sankskrit in 1954.

Turner was a Fellow of the British Academy, and held honorary degrees from several universities. He was President of the Philological Society from 1939 to 1943. From 1952 to 1955 he was President of the Royal Asiatic Society and was awarded its triennial Gold Medal in 1953.

He married in 1920 Dorothy Rivers, who died in 1972. They had one son and three daughters.

DR MARY ELLIS

Dr Mary Jenny Lake Ellis, Senior Medical Officer in HM Prison Service, and a leading figure in adolescent psychiatry in this country, died on April 19, aged 62, a few months

before retirement. She was born Mary Taylor in London but spent the first four years of life in India: she often spoke of these early years and how they did much to colour and influence her vital ap-proach to life. She was educated at the Hall School, Weybridge and read Medicine at the Royal Free Hospital, London School of Medical Women, throughout the war years, qualifying in 1944 and taking her degree in 1946.

In 1947 she became resident surgical officer in the Neurosurgical Unit at Bristol, working with and inspired by Diana Beck, the first woman Consultant in Neurosurgery in England. Marriage and children soon followed with further interruption to her career when she contracted poliomyelitis in 1957 which left her with some residual disability in the right leg. She decided to specialize in psychiatry and following clinical appointments at Powick Hospital, Worcester, she took the Diploma in Psychological Medicine in 1965.

No doubt inspired by her

sister-in-law, Dr Charity Taylor, and her outstanding contri-bution as Governor of HMP Holloway, she decided to join the Prison Medical Service. Her full-time appointment was to HM Borstal Institution at Feltham, Middlesex where she remained throughout her 18 years of service.
Following her medical exam-

Prison Service it was Outer Mongolia to gaze u recommended that she should and identify some rare bird. not be posted to a prison as the climbing up and down stairs to three children.

reach all areas on the various landings and galleries of the Victorian buildings housing the adult male population would be too taxing. Because of this a whole generation of adolescent delinquents benefitted from her expertise in the training, management and treatment in an institutional setting.

One of her favourite quotations came from Dr Johnson: I dogmatize and am contradicted and in this conflict of opinion and sentiment, I find delight". She was the innovator and architect in the thinking and planning of the new Feltkam Borstal which will emerge over the next decade - a lasting memorial to her vision, enthusiasm, vitality, intelli-gence and humanism.

She was Chairman of the Association for the Psychiatric Study of Adolescents (APSA) and Editor of the Prisor Medical Journal from 1975 and again from 1978-1982 -She shared with the founder and 0 co-editor of the journal theis absolute necessity and importay ance of communicating via theor written contribution with colleagues, the need to share e methods of care and treatmenter in the special prison environ at ment. Her innumerable reported to Home Office Committees 5, and Annual reports are buried in official documents in the Prison Department and will be a source of constant reference

over the years.

Her other great interest was
Ornithology. She was a member of the Royal Society for the Protection of Birds and her delight in bird watching took ther to South America and Africa and only last month si ination for admission to the Prison Service it was Outer Mongolia to gaze upoil

She is survived by her ag exhausting duties involved in husband Mr Norman Ellis, and on

HOW TO STOP CAPITAL EQUIPMENT ENDANGERING YOUR COMPANY.

Safety first.

It is a sad fact of business life that last year more companies went bust through lack of cash than any other single reason. And one of the prime causes of cash starvation was the purchase of capital equipment out of cash reserves (or bank overdraft facilities).

So before you decide to buy any more capital equipment, put safety first and, as the Governor of the Bank of England has suggested, look at all the options open to you.

To help you we would like to introduce you to one of the most important and most widely used of these options: medium term equipment finance from Mercantile Credit.

Keeping the cash flow healthy.

The logic of it is inescapable: instead of

Funds are almost always available for good projects, large or small, but owners and managers may often not be aware of the full range of sources of funds nor the best means of access to them. As a business expands, it is important to the continuing success of the enterprise that it is able to identify both the type and the amount of finance it needs. This means that a businessman must be conversant with the sources of finance appropriate to his purpose and equally must understand the attitudes and requirements of those who are to provide the funds.

Gordon Richardson, Governor of the Bank of England. handing over a large cash sum – or increasingyour liability to your bank – you take out a leasing or purchase plan to spread the load.

You choose the equipment yourself (and it can range from a company car to an oil rig) and we pay for it.

You then pay us on a pre-arranged schedule which ideally should fit your cash flow painlessly.

Making the most of incentives.

But the plans don't only release cash. They can also help you take account of your tax situation and make the most of the investment incentives available. Indeed it is possible that you could have more cash after acquiring the equipment than before.

No additional security is required.

In most cases, you needn't give us security for any capital equipment you may wish

to acquire (the equipment itself is security enough).

This is well worth bearing in mind if you're weighing up equipment finance against borrowing from the bank. Because a bank loan will almost invariably be conditional and may involve a charge over part of the business, which can impose certain restrictions.

We move quickly.

Instalment finance, for the consumer as well as industry, is all we do. So we know what we're doing. And naturally, we do it very quickly.

After our first discussion on your home ground (yes, we believe since you're the customer that we should come to see you) we should be able to give you a decision within a week or so.

We have the resources to match the experience. We're part of the Barclays Group and last year alone helped British industry acquire equipment to the tune of some £628 million.

Before you buy talk.

It's easy to rush into new equipment. You suddenly see the need, there seems to be enough cash around at the moment, you know exactly what you want and – hey presto – a cash crisis.

Before you make a move, give us a ring. There is probably no-one in the whole UK financial market closer to the problems and pressures of new equipment purchasing.

Phone your local Director now – you'll find his name and number listed below.

M Mercantile Credit

MARKET REPORT • by Michael Clark

Minster rally curbed

ACCOUNT DAY: Dealingsbegan, April 25. Dealings and, May 6: Contengo Day, May 9, Settlement Day, May 16.

Earlier, the shares were up by 21p to 117p fuelled by speculation that Minster was about to become a dawn raid victim and later by news of a North Sea drilling find.

However, Minster warned that further drilling would be required to evaluate significance of a find on block 29/5A in the North Sea and that a per cent by St Louis Bank in 23 gain made most of the running after a bullish circular from brokers, Rowe & Pitman, and strong overseas buying, particular from the US and Middle after a shaky start which saw the shares fall by £5½ to £13½ a gainst earlier forecasts in the company helped the shares raily to close at £17½. Sister companies fell in sympathy: Cornell Dresses, down 270 at 1412 and

United States interest rates.

The American money supply figures on Friday had been better than forecasts, and the prime rate cut by St Louis helped sentiment. By the city is the long and of the the rises in the long end of the market were up to ½ of a point, mediums were as much as ½ better – although the market did market were up to ½ of a point, mediums were as much as ½ shares rising by 8p to 470p on the day ahead of Thursday's which was up by 45p at 713p and test the tap and shorts were as much as ½ a point higher.

Among the leaders GEC Holdings was in the news again

ICI also continued its recent helped bolster shares of Exco, which was up by 45p at 713p and British & Commonwealth, which was up by 40p at 870p.

In contrast London & Liverpool Trust shares remained

1982-83 ligh Low Company

with light volume, although prices firmed reflecting both technical conditions in the market and the hopes for lower United States interest rates.

The American money supply figures on Friday had been better than forecasts, and the prime rate cut by St Louis halved continent. By the close

ICI also continued its recent

1982.83 High Low Company

Pleasurama in casino talks

Pleasurama, which is bidding for Trident Television, has confirmed that it is negotiating to sell its one-quarter share in four London and provincial casinos to Grand Metropolitan. But it says that any reorganiza-tion would "have due regard to the importance of maintaining Pleasurama's profitability." The stake in the casinos provided £4.1m of Pleasurama's total profits of £9.5m last year. The key to a deal taking place

is a reference to the Monopolies and Mergers Commission: Lord Cockfield, Secretary for Trade is expected to make a decision m about 10 days. Any deal is conditional on approval by Pleasurama's shareholders, which include Grand Metropolitan with 29 per cent, on the offer for Trident Television going unconditional and on consultations with the gaming ● £9m PLACEMENT: In-

surance broker Reed Stenhouse has raised \$Can17m (£9m) through a private placement with institutional investors of 1.1 million shares. The placement, which will reduce Stenhouse Holdings proportion of Reed Stenhouse issued equity from 52.4 per cent to 49 per cent, will enable Reed Stenhouse to make an acquisition "probably in North America", the company said.

 BPCC DEAL. Mr Robert Maxwell, chairman of British Printing and Communications Corporation, and Mr Richard Hewett, managing director of the Reader's Digest, have signed a 10-year contract worth £25m for BPCC to produce the British edition of the Reader's Digest.

VIDEO DEAL: The French state-owned firm Thomson is to start providing video tane recorders jointly made with TVC of Japan by the end of the

Analysts said that investors remained bullish and that many simply stepped away from the market rather than sell stocks

The Dow Jones industrial average was ahead about 11/2 points at 1197.95 after having been up more than five points during the morning. Declining issues held a narrow lead over advances, and the NYSE composite stock index pointed

Smithkline Beckman rose 14 to 69 after reporting a 10 per cent rise in first quarter net. Zenith gained a point to 18. It

was profitable in the first quarter compared with a loss in the same period last year. IBM fell one to 116, although it raised the quarterly dividend.

President Reagan has approved in principle a plan that would result in sweeping reforms of United States trade policy by creating a new department of international trade to focus heavily on increased exports.

Court win

for Lonrho

directors

By Our Financial Staff

First blood went to Londo

esterday in the battle over

vhether Harrods of Knights-

bridge should be demerged

from the rest of the House of

Fraser department stores group.

It was able to claim victory in

the legal skirmishes being

fought with the main Frases

Lonrho's legal victory was only one of a series of

developments which saw Pro-fessor Roland Smith, Fraser's

chairman, indicate an interest

in buying the Allders depart-

ment store chain from United

Drapery Stores and predict that

the group's porfits in five years

would be "more than £75m", provided shareholders stuck

with the main board's trading

strategy and threw out Lonrho's

proposal that Harrods be split

off into a separate company.

A claim by the main House

of Fraser board that two

documents circulated to Fraser

shareholders by Lourho directors Mr Roland "Tiny" Rowland

intended to deceive and mislead

them, was rejected by the Court of Session in Edinburgh.

The two Lonrho directors.

who also sit on the Fraser

board, had put their case for demerger under the store group's own letter heading.

Lonrho also obtained an

injunction preventing the main House of Fraser board bringing forward a meeting to consider

the group's yearly results from next Thursday to today.

The two Lonrho directors on the Fraser board claimed that

they had had insufficient time

to consider the profit figures.

Professor Smith's reason for attempting to bring forward the board meeting remained un-

Rowland's time", did say that when the yearly figures are announced they will give some indication of the dividends

already being paid by the group's new trading strategy.

He said that pretax profits in five years' time would be more

than double the level of last year which is yet to be announced. Later he said that in

five years, profits would be more than £75m. This did not,

stock market is expecting a

figure considerably below this.

Professor Smith indicated

that House of Fraser was interested in buying a chain of

stores like the Allders depart-

Investment earnings almost match car-making profits

Ford of Britain lending £1,000m to American parent company

By Edward Towns **Industrial Correspondent**

Ford of America, which only now beginning to return to profitability after years of big losses, last year borrowed almost £1,000m from its United Kingdom operation, it was revealed yesterday.

The 1982 accounts for Ford of Britain show that, while promissory notes from Ford US declined to £387m at the end of last year from £656m a year earlier, the American parent received a substantial boost from a £574m original issue discount note.

The note, the first of its type to be issued by Ford UK, has a

maturity date not later than January 28, 1987, and the discount was calculated on a normal commercial basis".

Ford of Britain is not paying

a dividend to the parent company for the fourth year in succession, but it has been called upon to support the US growing amounts of loans, often at commercial rates of interest. The result is that Ford UK is earning almost as much money from its investments as it is from making and selling cars and trucks. Operating profit for

Sterling closed at its highest point this year on its trade-

veighted value against other

eading currencies after rising

sharply on the foreign exchange

markets yesterday: Reports of oil price rises from

the Soviet Union and Egypt

were behind the rise and the

pound closed 0.8 point up at

84.0 on its trade-weighted

Dealers said that high real

interests rates in the United

Kingdom and continuing hopes

of an early Conservative victory at the polls also helped the pound which ended 2.05 cents

up against the dollar at \$1.5660

and 41/4 pfennigs firmer against the Deutsche mark at DM3.83.

The dollar began the day

weak after last Friday's good

figures. This led to hopes that

United States money supply

US interest rates may soon fall and one of the small US banks,

Southwest Bank of St Louis,

yesterday cut its prime rate by $\frac{1}{2}$ per cent to 10 per cent. Southwest Bank has often led

Dealers remained uncon-

vinced that the big US banks would soon follow the lead and

with fears about the US funding

programme and budget deficit reasserting themselves the dol-

lar came off the bottom However, the US money

most of which came from the Interest income was cut by foreign exchange adjustments to £85m, giving the British company a pretax profit of £194m against £220m in 1982.

Mr Sam Toy, the chairman

No time

Nobody will have been observing the recent extraordinary rally in oil shares with more interest than Mr Nigel Lawson, the Secretary of State for Energy. Having disposed of Britoil, and moved seven-eighths of the way towards dispos-ing of British Gas's halfshare in Wytch Farm, Mr Lawson is now thinking seriously about pressing ahead with his pledge to disperse of the gas corporation's offshore oil inter-

British Gas has effectively (and grudgingly) put its North Sea oilfields into a package that can be transfered to the Secretary of State's name. Once he has control of the assets, it is only a matter of 1 me before Mr Lawson orders the privatization.

Whether he decides to opt for the route of share sales à la Britoil or a straight asset sale à la Wytch Farm is something that can be decided later. Having ridden the storm

of Britoil's unhappy launch into the private sector and seen the shares rebound to just a few pence off their original issue price, Mr Lawson must be relishing the opportunity of redeeming his battered reputation by selling Brit-isb Gas's oil interests to a revitalized stock market.

will inevitably again raise the charges of selling off assets on the cheap, pointing to the fact that some outside estimates put the value of the corporation's oil assets at nearly £1,000m - whereas the sale is unlikely to net much more than £500m, even allowing for the rally in the In practice, there seems

little chance of the preparations for sale being completed before the election, unless Mrs Thatcher holds out until next spring. The rally in oil share

prices since Opec reached its fragile new pricing agreement has more than made up for the previous setbacks, and seems to be taking an extraordinarily obtimistic view of I price movements. But then the market

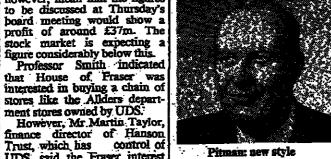

only has itself to blame if it lands another great slap of oil stock that fails to perform. Investors should tread with caution.

conditions beyond their control.

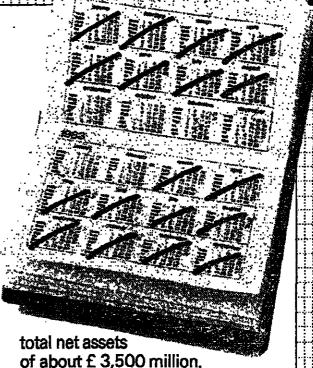

Between end-August 1982 and end-February 1983 Rolinco shares rose by 19% in Dutch Guilders (the base currency), or 38% in Sterling terms.

This satisfactory performance largely results from the favourable stock climate in the United States, Japan and The Netherlands, Rolinco's main investment countries.

The Report goes on to analyse in detail the policy pursued to achieve this investment result.

Rolinco is an equity-based trust, concentrating on attaining the maximum capital growth consistent with prudent investment.

Rolinco forms part of the Robeco Group of investment companies, which has its headquarters in Rotterdam, Holland, and manages

of about £ 3,500 million.

Rolinco shares are listed on the London Stock Exchange, as also are its sister companies Robeco and Rorento.

Future and deferred taxation	3.8	2.7
	118.1	110.6

The 1982 accounts above are abridged versions of the audited accounts which will be filed with the Registrar of Companies and for which the report of the auditors was unqualified.

Remarks by the chairman,

Harry Harrison In the face of three years of declining eco-

nomic activity in the UK and a deepening world recession in 1982, it is no small achievement to have slightly increased profit before tax and extraordinary items.

For all our companies, trading conditions have been difficult and low world levels of demand have intensified the squeeze on margins from international competitors, all with surplus capacity to fill.

In the circumstances it was inevitable that some of our units were unable to repeat their profit performance of last year. In particular, the continuing decline in investment in food processing machinery put our Food Engineering Group under severe pressures and its small increase in turnover was at the cost of much slimmer margins. The Oil Services Group, with its principal markets in the USA, felt the immediate impact of the dramatic decline in the levels of oil services and drilling activity in that

With the benefits of its diverse operating base the Manufacturing Group held its turnover reasonably well but again on tighter margins. The Merchanting and Storage Group, though affected in both revenue and margin terms by the general recession in the oil and chemical industries, benefited from the considerable investment in storage we have made in recent years in

expanding its facilities. In the Process Plant Contracting Group some companies had a very difficult year but others did well and brought to profitable completion a number of long-term contracts. With the inclusion of the first full year's profits from Koger & Boxill and Simon-Carves (Africa) as a full subsidiary, the

contribution from this group was good. Overall, our wide spread of interests has again helped us to produce a reasonable result in another year of deep recession. Profit at the trading level showed a small decline but this was made up by an improvement in net interest receivable

and, in total, we have been able to continue our pre-tax profit growth albeit marginally.

The extraordinary items reported this year arose partly from the costs of rationalising and restructuring certain activities to improve their competitiveness and partly from the closure, after critical examination, of our drilling muds operation in the USA which incurred heavy losses following the collapse in oil drilling activity referred to earlier.

The profit results, the improvement in our cash position and the strength of our balance sheet are all measures of the great effort from our managers and employees throughout the Group during yet another demanding trading year. We are consequently in a strong position to take advantage of any upturn in trade and also of suitable opportunities for growth by

The recovery for which the whole world has been looking is difficult to forecast with any certainty but there do now appear to be more consistent signs that the world economy, led by the USA, is on the upturn. No one is predicting or expecting that we shall quickly return to rapid growth, and in any case it will take time for any improvement to have a sizeable impact on companies supplying capital goods. Nonetheless,

the outlook appears more encouraging. An improvement in world investment and world trade now would be of more benefit to 1984 results than to the current year. Even so, on the assumption that a consistent upturn has truly started, we are looking for a reasonable outcome for 1983.

INVESTORS' NOTEBOOK edited by Sally White

lammerson reveals £912m assets

The market has a clearer idea of Hammerson's true value after valuation of the group's property assets. Hammerson's investment portfolio stands at almost £912m, according to the directors' figures, placing the group about third in the property league behind Land Securities and MEPC.

The group performed well last year. Pre-tax profits up a third at £20m.405m were higher surged 20\$ at one point to 725p. reflecting the market's pleasure. Hammerson's advance was on the back of a hefty uplift in gross rental income which rose from £50.8m to £68.153m. Most of this increase came from important rent reviews at Brent Cross, the 800,000 sq ft shopping centre in North

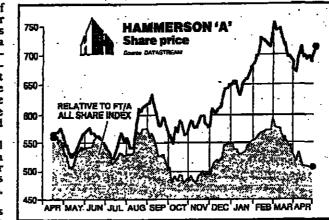

properties. Hammerson has spent £41m since 1980 on buying out minority interests in 14 of its buildings in Australia and now a further £6.6m is being earmarked for the acquisition of Australian Mutual Provident Society's mortgages and min-ority share interests in certain of the group's subsidiaries. Only one building - an office block in

London, and from Australian

group's full control. Shareholders will be fairly pleased by a final 10p dividend, taking the year's total to 13p, although some may have been looking for a larger share in the company's success: Hammerson's cautious and

Melbourne - is not under the

selective development policy means the group can only benefit from any uplift in the economy, with the consequent increase in demand Even with the price around

a hefty discount to the net asset value, which the company estimates at 977p. Further growth can be expected as more rent reviews and reversions fall due and present developments

Simon Engineering

start to produce income.

Pretax profit £20.6m (£20.20m) Stated earnings 51.1p (53.6p) Turnover £362.6m (£339.8m) Net final dividend 9.25p making 13.25p (12.6p) Share price 42.4p. Yield 4.5%

International overcapacity in the engineering industry put pressure on Simon Engineering's margins last year, but the strength of the balance sheet has produced net cash of £5.5m to bring the pretax profit to a barely changed £20.6m.

At the attributable level, however, profits are down from Now, the company is work-

book, but it would be a mistake to expect this to show through in this year's profits.

Simon should win the main contract for a £400m chemical complex in Indonesia, and other international contracts are in the pipeline.

The lower sterling level is of more immediate benefit, Old will affect the translation of overseas earnings, margins and orders. Normally very con-servative in its statements. Simon says that it expects the outcome this year to be reasonable, with the international outlook at present seeming more encouraging.

The major squeeze was in food engineering, with profits at £316,000, against £1.4m on sales up from £68m to £73m. Oil services were another difficult area, with profits down from £2m to £1m on sales down from £21m to £17m.

The disappearance of profits in the American oil industry held back acquisition plans last year, and the company is reappraising this year, although

At the end of the year the company was in a net cash position with £50m. Leaving out cash the gearing was 19 per cent. Capital spending was down slightly last year, but should be steady this year. Simon has been cutting costs, figures. and there is a £5m extraordin

Simon's wide range of business places it well to improve margins as the recession ends. But this is already in the share price. Progress could be held back by uncertainty on the direction of the acquisitions referred to in the company's

But with hopes of £22m pretax this year, putting earnings prospectively at 37.7p prospectively, the rating looks modest and is enhanced by

Unilever

A past favourite of the Americans, Unilever has been noticably absent from the buying lists in the present wave transatlantic activity in London.

The annual report, published today, restates the company's belief that it must plan on the basis that there will be no improvement in econinic conditions this year. That is why the share price remains duli, not inflows rose even though the rating is on a discount of a third to Proctor

Investment

Anecdotal evidence suggests that the heavy outflow of securities eased off considerably in the last couple of months as sterling fell. However, the latest Central Statistical Office figures on institutional flows of funds paint a vivid picture of how the institutions responded to sterling's weakness at the end of last

During the final quarter pension funds invested £513m in overseas equities - considerably more than the £302m they pumped into the gilts market and more than the £468m

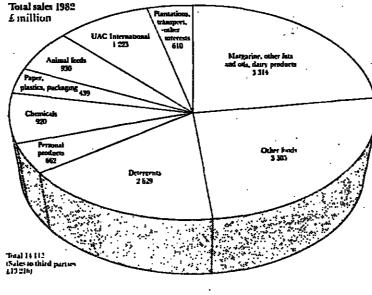

invested in equities.

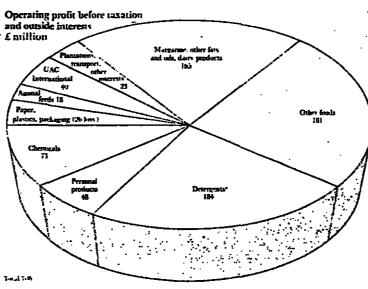

The investment trusts, net sellers of equities to the tune of £536m last year, stepped up overseas equity investment to £169m in the final quarter of

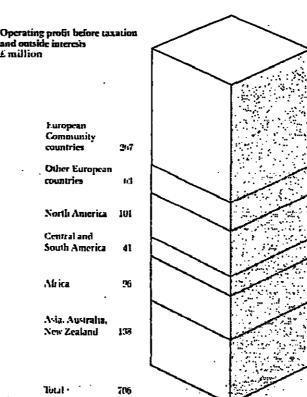

last vear. The net inflow assurance and pension funds in the final quarter of last year was iess than expected at £3,200m and for the whole of last year net inflows rose by only 2 per

Lump sum pension payments after redundancies and a high volume of life assurance policy surrenders have accounted for this. However, once these outflows begin to ease the picture could look very different. Simon & Coates, for instance, still expects net inflows to reach about £15,500m

UNILEVER HELD STEADY IN 1982

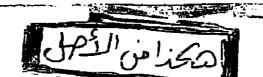

For the year 1982 our sales to third parties at closing rates of exchange were £13,216 million compared with £11,889 million in 1981. Sales volume was little changed.

Our results in sterling at £706 million were only just above those in 1981 but a significant factor affecting these results was the high level of restructuring costs, particularly in Europe. These costs, however, made a worthwhile contribution to an increase in productivity of 4% during 1982 in Unilever as a whole. We see these costs as part of the long term investment we are making in the future: a number of our operations improved their performance this year through steps taken in previous years to increase efficiency.

Our Annual Report indicates that we do not expect any significant improvement in world economic conditions in 1983. Nevertheless Unilever is ready to take advantage of any improvement in the world's economies as and when they come.

Why world banks are safe and sound

countries ove international banks about \$300 non-(£196,000m) which is about 30 per cent of net international bank lending. Of this perhaps £180,000m is at risk, so that the international banking system has about 18 per cent of its balance sheet exposed to sovereign risk. Banks are understandably cautious about revealing this information but it is estimated that their equity capital is \$180,000m.

If the worst came to the worst and all of the \$180,000m were subject to default, the equity capital would be inadequate and the international banking system would col-lapse. Alternatively, \$30,000m of extra equity capital would have to be raised to save the

My contention is that provided the international banking system is fundamen-tally healthy, this extra equity capital would be forthcom and the world capital market will effectively write off the bad debts thus preventing the baby from being thrown out with the bath water.

As our own case of the Smith St. Aubyn discount house demonstrates, the capital market is prepared to write off bad debts as long as the business is fundamentally tally unsound, this will not happen and the banks will

The worst is unlikely to happen. However, it is con-ceivable that a large international bank will suffer a default that will threaten its existence. If the bank is otherwise sound, the capital market will be prepared to write off its debts and the necessary equity will be

But what happens if it is unsound and the capital market allows it to collapse? The conventional view is that the rest of the banking system will collapse in sympathy for two reasons. First, depositors will take fright that an epidemic is about to spread

multiple bank closures.

Secondly, there will be knock-on effects through the interbank market insofar as other banks have lent to the bank which has failed. Deposit fright would only be justified if the interbank network would indeed trigger domino effects. If bank X has failed and bank Y has lent part of its assets to bank X, bank Y must make provisions for those bad debts. As long as bank Y is entally sound the capi-

tal market will, if necessary, generate sufficient equity and it will continue in business. In this respect banks are no lifferent to other corporations. The logic of interbank transactions no more implies the demise of the international financial system when one bank or even a clutch of banks fail, than does the logic of interindustry transactions imply the demise of the entire

my when one company or

group of companies fail. So what is all the fuss about? Because of their exnosure, hankers are understandably trying to protect themselves by putting pressure on governments and international agencies which are all too ready to assume new powers to help them out. They proclaim the gravity of the "crisis" and gest ingenious schemes to

All lobyists are essentially similar and bankers are no exception. In the meanwhile, we are being panicked into reforms of the international financial system which we will live to regret.

Once the veil of ignorance comes down it is very difficult to draw back. My fear is that we are talking ourselves into a crisis that need not happen. If we all persuade ourselves that a default must cause the entire system to collapse, then it will. The point is that there is no ental reason why this

Michael Beenstock The author is Professor of Finance and Investment at the University Business The conflict between Britain's two leading lawnmower manufacturers that has become so public in the past two weeks is a classic example of the primitive and sophisticated sides of a

marketing world red in tooth and claw. People do not use the terms "marketing battles" and "advertising campaigns" lightly: the only difference between these war games and those played in the home is that in this world millions of pounds and thousands of jobs are at stake.

What is unusual about the battle between Qualcast and Flymo - in which each claims market leadership and disputes the other's product performance and advertising claims - is that for the past three years it has been fought in the full gaze of the public, with editorial cover-

age as well as advertising.
The reason this conflict has become public is that one of those taking part decided to make it so. As a significant part of its market strategy it decided to take advantage of the relaxation of the rules governing comparative advertising that took place in the 1970s in order to challenge its rival head-on.

dominated Britain's lawnmower market with its cylinder machines, but by the end of the 1970s it was facing problems as Flymo's revolutionary new "hover" mowers, with their rotary cutting action, captured the public's imagination. By 1979, the cylinder sector was declining significantly, while the hovers, which were seen as more modern, were taking an increasing share of the market.

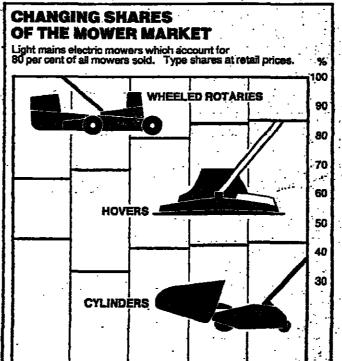

That year, Qualcast ap-pointed a new advertising agency, Wight Collins Ruther-ford Scott, which carried out research among lawnmower users to see how the electric cylinder mowers were seen in

comparison with the hovers. "The research confirmed our worst fears," says the agency's report of the Qualcast case history. The hover/Flymo proposition had a firm grip on the consumer mind, spelling out lightness and total manoeuvrapility (side to side back and forth), thereby making grass cutting an extension of house-

comparative advertising in the press, stressing the speed of the hover and maintaining that there was no need to collect the clippings as they formed a beneficial mulch on the lawn. Qualcast complained to the Advertising Standards Authority about this campaign and had its complaints upheld.

Mr Peter Mostyn, marketing director says: "Prior to the start of our campaign in 1980, the cylinder sector was declining significantly. We stopped that decline and started the growth of cylinder mowers again. We're not denying that

hover sales are continuing to in his enunciation of the grow and so is their share of the Qualcast advertising. "We think market. But the source of their campaign is their knocking growth is changing and it now comes at the expense of the try and half their declining wheeled roters movers and not market chare" he said wheeled rotary mowers and not market share," he said: at ours." The campaign won Mr Bullock maintains that Qualcast and Wight Collins an the pre Qualcast commercial.

ish what he sees as "misconceptions" about lawn mowing that grew up with the hovers. "One myth was that it wasn't necessary to pick up the cuttings because they acted as a mulch it doesn't, it simply leaves a the rival claims about the mess. It has taken three years market share, since both comfor us to get this message

It is the Flymo grass-collecting mowers - and their performance - that has led to the latest row, for Qualcast, having seen its rival respond to its criticisms by improving its product, has again taken the issue head-on. It maintains that the Flymo XE28, its most popular grass-collecting hover, leaves 40 per cent of the clippings on the lawn and is hard to pushin grass two-and-half inches long and it has said as much - and claims to show it - in us new commental.

What has given strength to the Qualcast television commercials over the past three years is the fact that all claims made in the advertisments have to be verified and Wight Collins has given the Independent Television Companies Associ-ation (ITCA) mounds of evidence from independent tests, conducted by the Production Engineering Research Associ-ation (PERA), to back up its claims. The present commercial goes further in "knocking" its rival than any previous one, yet it still received ITCA approval.

Flymo disputes the evidence, however, and even accuses the ITCA and PERA of taking Qualcast's side in the dispute. It has succeeded in getting two changes to the wording

Last week at a press conference to mark Flymo's Queen's Award for Technological Achievement - given for its use of robots in building the mowers - Mr Peter Bullock managing director was scathing

Effectiveness even with its corrections, is still misleading in that it shows the Mr Mostyn maintains that by Flymo being used at a different using comparative advertising cutting level than that recommended by the manufacture. information in order to demol- turers. In addition, Flymo has just brought out a revolutionary grass-collecting hover, the XE38, that performs far better than the XE28 and really does

"Hoover" up the cuttings. What is certainly confusing is market share, since both companies maintain they have market leadership - Qualcast says it has 47 per cent of the total mower market, Flymo 31 per cent and Black and Decker 18 per cent, while Flying maintains that its own share of the power mower market, which accounts for 95 per cent of all mowers sold, is 35 per cent, against Qualcast's 32 per cent and Black & Decker's 20 per

The market in Britain is worth about £60m a year, with 1.3 million mowers being sold last year, but it is heavily dependent on the weather Where Flymo really scores is in its export performance. About 25 to 30 per cent of the 750,000 mowers it sold last year went overseas. It claims 20 per cent of the European market, won the Queen's Award for Exports last year and is about to tackle the enormous American market. A subsidiary of the edish Electrolux group, it has

worldwide patents on many of

its developments, including the

rear-suction process on its new

Mr Mostyn agrees that the XE38 is a far better product than the XE28 shown in the Qualcast commercial but he maintains that there are still other misconceptions that must be tackled. "We would love everyone to be able to do their own comparative test between the Concorde and the hovers. Meanwhile, the revival of the controversy - with a little help lawnmower sales dramatically.

"Investing in Success" Equities PLC

24th ANNUAL REPORT Year to 31 January 1983

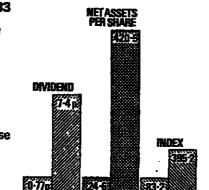

Successful long term growth since 1959

Dividend has increased 861% Net asset value per share has increased 1609%

Our investment policy remains unchanged There are many excellent companies in the U.K. whose profits grow year by year and which are as well managed and as efficient as anywhere else in the world. There are also many excellent companies in Japan and the U.S.A. to enable us to continue our policy of 'Investing in Success'

COMMODITIES LONDON METAL EXCHANG

Australian ruling confirms hard line on foreign cash

From Tony Dubondin, Melbourne

than

The new Labour government has clearly indicated over the past few weeks the tough position it will be adopting on foreign investment in Australia. The federal government has rejected a foreign land sale, the second time it has done this since it came to power early last

In the latest action, Mr Paul Keating, the Treasurer, ordered a family which lives in France owns near Nosoa Heads in gains Queensland back to Austra-

(£119,000) each, was bought in 1979 and 1980 by Messrs F. and A. Hatoun. The previous government approved the purchase on the basis that the properties were to be developed

for cattle and deer raising. However, Mr Keating said that neither property had been developed and that the government did not approve proposals for the foreign purchase of rural land intended purely for capital

The chance for the governlians.

The land, in two parcels of family sought to transfer owner-ship of the properties from one

company to another, technically sale under the foreign investment rules.

Announcing his decision, Mr Keating said: "An objective of policy is majority Australian participation in new projects." Earlier the federal government moved to block the sale to the Australian subsidiary of the British group Cadbury Schweppes and the Nelson group of the local confectionery com-

pany Allen's. The government also stepped in to stop the sale of part of the food operations of the Elders IXL group to the Anglo-Dutch company Unilever.

Hyman's losses up

The hoped-for "acceptable results" at I & J Hyman, the Manchester foam manufacturer, for the full year have failed to materialize after huge second half losses in the computer

The total loss last year was £424,000, against £346,000 after a small half way profit. The computer division's "severe and abnormal" problems were aggravated by a slower-thanexpected improvement in demand for Hyman's tra-

ditional products.

After extraordinary items otalling £490,000, the attributable loss was £658,000, against £281,000. The extraordinary debits were a loss on overseas investments of nearly £800,000 offset by property profits in Britain of more than £400,000. i & J Hyman Year to 31.12.82 Pretax loss £424,000 (£346,000) Stated loss 0.81p (0.81p) Turnover £22.2m (20.7m) Net dividend 0.1p (0.1p) Share price 191,0 down 3 Dividend payable 20.6.83

The interest charge was increased from £497,000 to £775,000 reflecting the investment in new technology.

The first quarter of this year was "very satisfactory" and all the company's subsidiaries were profitable except for the computer division.

Much of the investment in new technology was written off.
A nominal dividend is being paid for the second year

Imports of shoes up

By Derek Harris Britain's footwear manufac turers are facing a renewed threat from growing imports. imports were comparatively stable in the second half of last year at about 50 per cent of the British market in volume terms But in January imports jumped 10 per cent on annual comparison according to the British Footwear Manufacturers' Fed-

eration. Italy, the largest single source of imports, increased its exports to Britain in January by 28 per cent compared with the same month a year ago. Imports from Taiwan, third largest foreign supplier to Britain, jumped 62

SUN ALLIAN INSURANCE GROUP

Comments by the Chairman - Lord Aldington

The world insurance markets were in a bad way in 1982, very much as we had warned; and Sun Alliance's underwriting losses rose sharply, as happened in other insurance companies. Despite those losses there was a healthy gain to your Company's financial strength based on the market value of its assets, and our solvency margin at the end of the year was 112%. You have my assurance that this strong asset position does not reduce in any way our resolve to underwrite responsibly. Indeed: a proper return on your assets can be achieved only if we do so.

For a long time now we have had our expenses under close control and we completed a further reorganisation in 1982; throughout we have maintained a prudent underwriters are quoting too low rates and paying insufficient attention to changes in risks and in the amount of compensation being awarded in courts of law. I hope that those who say they detect signs of improvement in these matters are correct. As conditions improve you may be sure that we shall seize every opportunity for expansion allowed by our high solvency margin.

Underwriting experience in 1982 deteriorated for two principal reasons: competition in nearly all the world's insurance markets became more intense and continuing economic recession reduced world trade and therefore the amount of insurance The exceptionally severe weather in the early months of the year gave rise to claims

on the Group of £23.5m in the United Kingdom alone. Net of reinsurance, the cost was £15.5m and our own underwriting loss for the year increased to £70.9m compared with £36.8m in 1981.

Mainly because our investment income grew by £19m our profit before tax was not reduced so much -£56.8m against £70.9m.

It is fair to say that the investment experience of insurers during 1982 has been exceptionally profitable. The effect of falling, but still high real, interest rates and strongly rising fixed interest and equity values in the world's principal markets may seem to justify those who are prepared to

accept underwriting losses and rely upon investment returns outweighing them. The position has been reached, however, in many markets and classes of insurance where investment income is already more than offset by the underwriting losses generated by the business and reliance upon stock markets to maintain the solvency and indeed viability of insurers has its obvious

I have previously stressed in these Statements that Sun Alliance believe that underwriting profit is necessary for the long term health and stability of the industry and that we aim and strive to achieve it. The impossibility of doing so in present conditions remains a matter of concern to me which is not lessened by the knowledge that many very reputable insurers are faring worse than the Sun Alliance.

dangers.

In the United Kingdom heavy fire losses, poor liability and private motor results, a much increased loss in the Republic of Ireland and weather losses all helped to turn our traditionally profitable home business into sizeable loss. The outcome was. however, better than we might have expected from the results for the first six months. The serious loss in Canada was

disappointing and our United States underwriting loss was doubled by the need to increase reserves against long outstanding medical malpractice claims as we reported last September.

Continuing remedial action bore fruit in a number of overseas countries. However, Australian losses, whilst staunched, are still unacceptably high.

Reinsurance business produced intolerable results. Much has been discontinued but because of the long-tail nature of the account further serious losses will continue for some time.

The deficit on our Marine operations was attributable to the results of our overseas subsidiaries for 1982. Although our main Marine and Aviation account for 1980 closed in 1982 with a loss, this had already been covered by existing reserves.

After a slow start, life new business picked up as the year progressed and continues to be buoyant. The annual valuation produced an increased transfer to profit and loss account.

Lack of growth and the loss experience restricted cash flow in the general funds. Investment income none the less rose by some 19%, or 14% after eliminating the effect of exchange movements.

The financial strength of the Group was further reinforced during 1982 by the marked rise in fixed interest and equity stock markets. After bringing into account an increase of £32m resulting from the revaluation of properties, unrealised appreciation and exchange adjustments amounted to almost £200m, Together with retained profits and realised investment gains, the shareholders' funds rose from £646m to £883m.

In the long run we must not drift into reliance upon investment operations for our annual profit but the Group's prosperity will always depend heavily upon them. We are fortunate in being particularly well served in this field.

Other Income

Dividend

Profit Retained

Earnings per Share

Dividend per Share

The directors have resolved to declare a total dividend of 48p per share which compares with 43p paid for 1981 - an increase of 11.6%. An interim dividend of 19.5p was paid in January and the final dividend of 28.5p will be paid on 5th July next.

You will know from my earlier Statements that your Board has always been anxious to see that the dividend should at least keep abreast of inflation and whenever possible and justifiable move towards restoring more

of its former purchasing power.

The immediate outlook is difficult to discern. The industry's trading prospects in so many of our markets continue to be most unsatisfactory or poor and fundamental improvement is certainly necessary. Ills, however, often ultimately produce remedies and a few signs are appearing that more sensible and responsible views are prevailing in falling rates of inflation and in reinsurance markets.

We can with justification hope that some of the exceptional losses that we suffered last year will not be repeated in 1983 and that the hard work that is going on all over the Group will be properly rewarded.

I stated last year that the continuing deterioration in the reinsurance market was a matter of great concern, not only to us but to the entire insurance community. I added "increasingly the credibility of a growing part of the excessive reinsurance capacity is being questioned." Even though there is evidence of some corrective action by reinsurers, little has happened in the past twelve months to lessen our concern and we hope that many lessons are being learned. Insurance depends both on expertise and enterprise, and the maintenance of the highest standards of integrity in reinsurance no less than primary insurance. Concern has been expressed that practices recently exposed and doubts about reinsurance voiced by many, form, as it were, the tip of a very large iceberg. That would not be correct. In all but small sections of the market standards are being fully maintained and expertise and enterprise certainlysharpened.

- APPOINTMENTS

Mr David Moxley has been Thorn EMI Instruments at dected managing director of Dover, Kent He succeeds Mr Touche Ross International. He will continue as managing partner of Touche Ross & Co. Mr Michael R. M. Foster has been appointed to the board of

Courage as marketing director.

Sandy McLachlan looks at elusive wonder of Woolies

Woolworth still in search of a winning strategy

F. W. Woolworth completed two years of record profits in Britain in 1974. But followers of the retail scene were not impressed by the US-controlled company's performance.

The most extreme comment came from a stockbroking analyst who said that Woolworth was a "buy" recommendation. His reason was that "the situation is now so bad that it can only be a matter of time: before the US parent, at long last, picks up the UK disaster area, shakes it by the scruff of the neck and drops it after a large intravenous injection of

top flight management". Almost 10 years on. Woolworth is in a not dissimilar situation. The American connexion has been severed, the owned, and it has just produced a set of figures that prompted the market to push the shares up by 20p to a new high of 277p.

But the new British management has done little in its threemonth period of tenure to change this retailing leviathan. The latest figures which excited the market so much reflect little more than the better figures reported by the rest of the retail trade for the last quarter of

So what is The Wonder of Woolies? In spite of the market's view, it is hard to see. The group has the right-sized stores in the wrong positions; more importantly, it has the wrong-sized stores in the right

The group has the right-sized stores in wrong places

positions. Its product range, and its image in the eyes of the consumer are both still suspect. and Mr John Beckett, its new chairman, admits that the company is not going to be turned round by a short-term

miracle.
In fact, all that has really changed is that the new management has openly admitted the problems that exist. Mr Beckett himself pinpoints areas that others have been preaching for years: "The original brilliant retailing concept of Frank Woolworth has become blunted and diluted over the years and progressively less related to the need of the modern consumer." In today's retailing terms, that means that Woolworth is Paternoster Stores last autumn sull a "variety store", falling set out on a the much-publi-

Mr John Beckett (left), new chairman, with Mr Victor Blank, who advised the consortium that bought

retail specialists in specific fields et al.

This point is highlighted by another remark by Mr Beckett. "The confusion of purpose had a number of consequences, one of which was a proliferation of merchandise". The group has had a number of false dawns aimed at moving into new areas standing promise of home-(for example Woolco and 21st, grown products emerging as Century Shopping), but has never really got to grips with deciding what to sell in its 1,000 or so traditional outlets.

That, in turn, leads to another dilemma, which Mr Beckett is prepared to bring into the open: the property value of the group. ... we were not satisfied that the property disposal programme started by the previous board would be consistent with new trading policies. The property portfolio is the single most important physical asset possessed by the

business. Property sales have been halted while a review of the property potfolio is undertaken. It may be unkind to take the view that this stance means Woolworth is more valuable as a property exercise than a retailing chain. But it is not a view that can be written off

altogether.
The new Woolworth manage ment team, which started life as

etween the various stools of cized search for a "miracle change a group like Woolworth worker' chief executive to put (and other) problems right. But the failure to find this "messiah" has had little adverse reaction on the stock market's faith in Woolworth.

It is prepared to accept the promise of imports of bright young retailers in senior positions together with the management high-flyers.

Coming down to earth still further, perhaps the most important factor underlying the further, share price is the apparent acceptance of the 80/20 principle by the Woolworth management. This is a favourite management concept in most businesses, and at Woolworth it

The old concept has become blunted and diluted

means that four-fifths of the trading lines are staying too long on the shelf.

number of suppliers used and probably most indicative - the number of buyers employed by the company. These are tangible impilovements. remains incontrovertible,

overnight. Under new management, the group has a new capital structure. In financial terms this is obviously important because extra bank and loan-stock interest make the new parent company, Wool-worth Holdings, a highly geared

But in the long-term the future of Woolworth in the high street will depend on its ability to find a trading image that will pull in not just customers - but also their money. For the last decade at least, Woolworth has had a very high volume of customer throughput, but the average amount spent has been pilifully low compared with Marks & Spencer or British

Mr Beckett will not say that the planned divisionalization of the Woolworth management structure will lead to, or be accompanied by, divisionalization of the group in the retail outlets. But the B & Q do-ityourself branches have contribinted most to the group's improving profit record, and it That Woolworth is trying to is hard to see how Woolworth get to grips with this problem is can get its trading aspect right evidenced by the reduction in without stores specialization, no the number of lines stocked, the matter how good its manage-

Both size and location are an inheritance from the past, and today's retailing structure offers little joy for a traditional variety however, that you do not high-street site.

1982 - A particularly successful year for Equity & Law

Extracts from the statement by the Chairman, Mr P D J H Cox, circulated with the Report and Accounts for 1982:

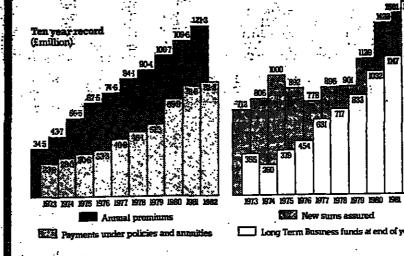

- Shareholders' earnings rose by 25% and the dividend has been increased from 15.0p to 18.5p per share.
- New annual premiums rose from £25.1m to £27.1m despite a drop of £2.5m in increments under existing pension schemes; new single premiums were £46.6m compared with £27.6m
- * Our overseas operations now make a significant contribution to the Society's new business mostly from Holland but with an increasing proportion from Germany. In 1982 17% of our total new annual premium income arose overseas and more than a third of our new single premiums.

Highlights of the Year	1982	1981
	£ million	£ million
New Sums Assured	1,501	1,422.
New Annual Premiums	27.1	25.1
Total Premium Income	168.1	137.7
Payments to Policyholders	81.2	78.8
Group Net Assets	1,724	1,273
Investment Reserve	130	123
Dividend for the Year	3.72	3.01

- The Society's individual with-profit new business, with new annual premiums rising from £5.6m to £9.0m and new single-premiums of £3.7m, should contribute particularly to future profits.
- * Invested assets increased 37% to over £1,750m.
- Equity & Law is strong financially, it has an expert staff and it offers a wide range of modern products. I am confident, therefore, that 1983 will be another very successful year.

Copies of the Report and Accounts can be obtained from the Secretary, Equity & Law Life Assurance Society plc, 20 Lincoln's Inn Fields,

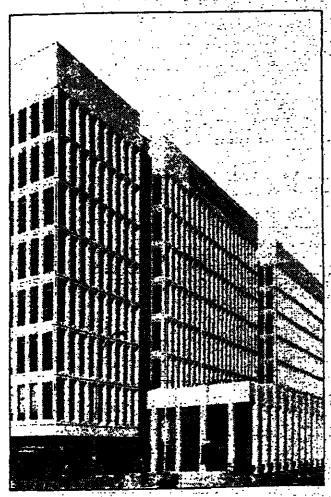

London WC2A 3ES

Extracts from the Chairman's Statement.

Building Society seeks more mergers and greater co-operation with other financial institutions.

Head Office: Provincial House, Bradford.

Following National & Provincial's successful merger between the Burnley and Provincial in December, the new society is already looking towards the next.

In his statement to members at the Society's Annual General Meeting on 25 April, Chairman Mr. Dennis Howroyd predicts that further mergers will be sought. He says:

"The merger between national societies of the size of The Burnley and Provincial was a major financial event and one which provided a strong indication of the beliefs we hold regarding the future structure and requirements of our Industry. Having demonstrated an ability to achieve a major merger we have strengthened our appeal to other societies who take a similar view of the future. We will therefore continue an active search for further partners as a matter of priority."

Commenting on the future role of building societies he said:

"Powers for Societies to set up Banks and Insurance Companies do not, I feel, sit easily, with the

views which I have already expressed on the need for mergers within our Industry particularly bearing in mind the need to avoid costly duplication of effort. There is a strong case for exploring the common ground between financial institutions in order to avoid a serious fragmentation of effort leading to higher costs for the consumer."

Extracts from the 1982 Results

- More to homebuyers. The two constituent societies lent over £700m which enabled over 38,000 families to buy their own homes.

- More for home improvements. £62m lent to existing customers.

- More investors. 290,000 new accounts were opened during the year which increased the total in number at 31 December to over 16 million.

- More growth, Assets increased by 17.7% to £3,365m.

- More convenience.

Customers needs are now serviced by 372 branches and 1018 agents.

"I commend these results to you in this, the first year of National & Provincial Building Society. May I say that I look forward with optimism to even greater progress in the years ahead in the full knowledge that our merger has given us the added size and strength we need to ensure our future success."

-Dennis Howroyd, Chairman.

Copies of the Chairman's Statement are available on request from A.J.E. Kidd, Secretary, National & Provincial Building Society, Chief Office, Provincial House, Bradford BD1 INL.

Malaysia orders GEC videotext system

By Clive Cookson, Technology Correspondent

GEC Computers has won a £2.7m contract to install a public videotext system in Malaysia_on similiar lines to Britain's Prestel.

The order, which was won against intense competition from Japan, Canada and par-ticularly from France, puts Britain in a strong position to dominate the huge potential market for telephone-based information systems in the Far

Hongkong already runs a British vidotext system, also supplied by GEC, and Singapore is expected to place a big

order this year.

Mr Frank Burgess, general manager of Prestel, said that a British consortium, headed by Aregon, the computer software company was "well placed" to win the Singapore contract. He said it would be for a

more sophisticated system than that ordered by Malaysian, combining teletext, broadcast Oracle and Ceefax in Britain, videotext, transmitted over the telephone network like

GEC Will supply Malaysia with a complete "turnkey" videotext system running on its 4000 series computers with British Telecom's Prestel software. Staff from Jabatan Telekom Malaysia, the national telecommunications authority, will train to operate the service at GEC Computers' headquarters in Borehamwood, Hertfordshire,

Wiltron, a fast-growing Californian electronics company, is to establish its European research and development centre on the Melbourn Science Park near Cambridge, with the help of an innovation grant from the Department of Industry.

Initially, the centre will radio-frequency test systems for the European market.

Why Bank America is buying troubled Washington bank

Los Angeles (NYT)-Bank-America has framed its agreed takeover bid for Seafirst in such a way as to narrow its own potential losses from any loan problems that might develop at Seafirst.

On balance the deal is a good one for BankAmerica, according to Mr Lawrence Cohn, senior banking analyst at Dean Witter Reynolds. BankAmerica is fully protected against future loan losses and Washington state, where Seafirst operates, is a market that has generated pretty good growth in the past. The agreement would make Seafirst and its principal unit. Scattle-First National Bank, an independent subsidiary of the

BankAmerica Corporation. The merger, valued at \$15.40 share in an equal combination of cash and non-voting pre-ferred stock, would give Ban-kAmverica its first banking operations in the United States outside its home state of BankAmerica, though the world's biggest international bank, is the second-largest bank holding company, after Citicorp, in the United States, and had \$122,200m in assets at the close \$100.000 for the second states.

The Seafirst takeover will be holding company by an out-ofstate bank holding company- if it is approved by the federal reserve board, the comptroller of the currency, shareholders of expected within 60 days) and Washington State Senate.

A Senate Bill would permit investments by out-of-state financial institutions in more than 5 per cent of the equity of bank holding companies based in the state. The Bill is opposed by some of the state's other banking companies. The senate was holding its last scheduled meeting of the present legislative session on Sunday.

Under the BankAmerica offer, Seafirst shareholders would receive \$7.70 in cash and three-tenths of a new issue of non-voting BankAmerica preferred shares, redeemable in Seafirst discloses huge losses as takeover bid is announced

quarter of 1983.

San Francisco - The world's biggest international bank, Bankamerica Corporation, has made an agreed \$400m (£260m) takeover bid for Seafirst Cor-

Seafirst, the biggest banking group in Washington State, has been seriously weakened by loan

weekend, will be one of the largest in US banking history and will be the most significant move so far to relax US rules restricting interstate banking. BankAmerica is the parent company of Bank of America, which is based in California.

1990 at \$25 each. The value is about \$15.40 a share. Trading in Seafirst's stock was halted on Thursday on the New York stock exchange at \$14.25. The shares traded earlier that day at a low of \$12.625 and a high of \$15.75.

Seafirst shareholders were lucky to have the BankAmerica offer. He said that without a clear the largest acquisition of a bank agreement to shore up Seafirst's eroding capital base, large depositors at Seattle-First might have rushed to withdraw savings from the bank after Seafirst's disclosure of its huge

> BankAmerica, in addition to pledging \$250m in exchange for Seafirst's 16.2 million shares outstanding, also agreed to prop up Seattle-First with \$150m in fresh capital once the merger is That is critical for Seafirst. Its

first-quarter loss of \$133m nearly triple the amount forecast by analysts - came after a loss of \$91.3m last year, and pushed its capital to \$323m, or 3.4 per cent of its \$9.600m assets. Bank regulators vary in the level of equity they tolerate for banks, but a figure below 5 per cent is considered precari-

energy specialists from Arthur Andersen & Company, the accountants. The specialists looked at all the loans and gave Seafirst the most likely estimate As the rescue plan was announced, Seafirst disclosed losses of \$133m for the first if oil did not go below \$25 a barrel, he said. He noted that Seafirst had been active in energy-lending only in the last The group had intensified its

search for a merger partner after reporting a 1982 net loss of The Bank's energy-loan port-folio rose at the end of 1980 to S93.1m. Seafirst attributed most of its \$1,200m at the end of 1982. This, according to Mr Cohn, was uncontrolled growth and troubles to the \$1,000m it had lent to the energy sector. But Mr Samuel Armacost, Banka-merica president, said that he was confident Seafirst's probthe bank just did not know what it was doing. Seafirst's troubles centre on

defaults on its energy-related loans. It has acquired \$400m in lems were containable. BankAmerica will inject \$150m of capital into Seafirst in loans from the Penn Square Bank of Oklahoma City, which addition to the \$400m it is collapsed last July. paying in cash and stock.

Mr Dudley came to Seafirst as chairman and chief executive on January 3 replacing Mr William Jenkins, who took early retirement. The vicedanger of failing, Mr Richard P. Cooley, its chairman and chief executive, said after its group's chairman Mr Joseph Curtis and the president, Richard G lachning also retired early.

Mr Corley said that the
Anderson study was the first

Law Report April 26 1983 Queen's Bench Division

Police parade did not qualify for overtime payments

Cowan and Another v Thames Valley Police Authority and Another

Before Mr Justice Forbes [Judgment delivered April 21]

Police constables were not entitled to be remunerated in respect of 15-minute periods which performing a continuous tour of eight hours duty, Mr Justice Forbes held in the Queen's Bench Division when dismissing their claim for declarations.
Paragraph 57 of the Sta

Orders of the Thames Valley Police
Force provides:

"A constable performing a
continuous tour of eight hours duty
will parade fifteen minutes before

will parade fifteen minutes before
the time designated as the commencement of the tour."
Regulation 24(2) of the Police
Regulations (SI 1971 No 156)
provides: "The normal daily period
of dury... shall be eight hours and,
in addition, any time occupied in
reporting to the appointed place for
dury before a tour of duty begins."
Regulation 25 provides:
"(1)... where a member of a police
force to whom regulation 24 applies,
... remains on duty after his tour of
duty ends or is recalled to duty

duty ends or is recalled to duty between two tours of duty, he shall be granted... in respect of each unit of time during which he so remains on duty after his tour of

duty ends or after being so recalled (...referred to as overtime)...an

Mr David Eady, QC, for the police constables, Mr Keith Simpson for the police authority.

MR JUSTICE FORBES said that it was the practice of some police forces to require constables to come

tour of eight hours duty.

The purpose of requiring such attendance was so that the constables could be inspected, given their duties, told of incidents which had eccusted on their beat and of their period of refirshment. That ensured operational efficiency and equipped the constables properly for their tours of duty,

The practice of requiring that parade before a tour of duty had ceased in Thames Valley police

parace-neutra a mar of entry and ceased in Thames Valley police force in October 1979.

The two police constables seeking the declarations had come for duty for the extra 15 minutes before the practice ceased and were asking for a declaration, that there should be

The key phirase to be considered was "any time occupied in reporting at the appointed place for duty before a tour of duty begins" in resolution 34(1).

special meaning in police practice to make certain that a constable could properly start his tour of duty. Regulation 25 provided 1

units of a quarter hour. If a constable was required to parade for was spent on reporting then that would result in one period of overtime. If he was required to parade for 15 minutes, then the time spent after five minutes' reporting

overtime.

A constable required to parade a quarter of an hour before a tour of phrase used in regulation 24(2) referred to the time occupied in ensuring that a constable was fit to

The normal daily period of duty was eight hours and the time taken for such processes that ensured that a constable was ready for a tour of

Divisional Court

Appeal procedure not exhausted

Regina v Battle Justices, Exparte Shepherd and Another Before Lord Justice Robert Goff and

[Judgment delivered April 21] Magistrates' Court Act 1980 and section 9(2) and (4) of the Courts
Act 1971, a statutory framework
existed for the hearing of appeals
against sentence from the magistrates courts to the crown court, but instead an applicant chose to make an application to the Queen's Bench Divisional Court, without exhausting that existing statutory frame-work, then it was difficult to conceive of circumstances in which

efusing applications by Miss D. J. hepherd and Miss D. M. Shepherd to quasir a compensation order made by the Bartle Justices on December 6, 1982.

Mr Roger Bartlett for the applicants: Mr Richard Carr for the

the justices had deserted sen-tence until December 6, 1982, when, having taken into account the applicants conduct during the interlude, they imposed sentences of two years probation and 60 hours community service on each of them.

In addition, a compensation order of £214.10 was imposed on each applicant, to be paid at a rate of £1 per week. It would take them about four years to pay off the whole

The applicants appealed to the crown court but when the judge mentioned that he had power to review the whole sentence, not just

They now applied to nal Court. It was accepted on both sides that the court had a discretion whether or not to entertain the application.

What troubled his Lordship was the fact that there already existed a LORD JUSTICE ROBERT against sentence from the magistrates courts. That was provided by were aged 19 and 17, had come section 108 of the Magistrates before the justices on July 7, 1982, Courts Act 1980, and by section 9 (2) and (4) of the Courts Act 1971, which his Lordship read.
Had the appeal proceeded in the

crown court, the court would have had power fully to review the whole matter, with all the material in the sought to persuade their Lordships was that they could pick out one matter and concentrate on that only.

There was no question of the strices having no jurisdiction or of justices having no jurisdiction or or their being in breach of natural justice. All he said was that on the principles set out in R v St Albans Crown Court, Ex parte Cinnamond [1981] 1 QB 480) and R v Tottenham Justices, Ex parte Josh [1982] 1 WLR 631) the compensation order was in the circumsation order was, in the circum-stances, harsh and oppressive. But

in both those cases the existing procedure had been exhausted. circumstances where it would be proper for the court to exercise its discretion discretion to entertain such an application where, as in the present case, the matter could only be properly dealt with within the statutory framework available, and accordingly his Lordship did not think it right to entertain

Mr Justice Mann agreed. Solicitors: Perring & Co. Hast-nes: Mr Logan A. Edgar, Hastings.

required counsel's consent. Lord Lane, Lord Chief Justice, in R v Newton ([1983] Crim L R 198) had laid down the courses available to a

judge in the crown court where facts

relevant to sentence were in dispute. The principle extended to appeals to

Court must hear issues relevant to sentence

Before Lord Justice Robert Goff and

[Judgment delivered April 25] Where on an appeal against sentence to the crown court there was a dispute on issues of fact which were relevant to sentence, the court was not entitled to make findings on such issues without first hearing either evidence or submissions of

nunsel thereon.

Lord Justice Robert Goff, sitting with Mr Justice Mann in the Queen's Bench Divisional Court, so Queen's Bench Divisional Court, so held in allowing an appeal by way of case stated against Mr Derek Williams, of Swinton, and quashing winding of symbol, and quasting a sentence of six months' imprisonment imposed by Judge Taylor in Manchester Crown Court in an appeal against a sentence of three months imprisonment imposed by Eccles Justices on the appellant for unlawfully inflicting grievous bodily harm contrary to section 20 of the Offences against the Person Act

Mr Barrie Searle, who did not appear below for Mr Williams, Mr John R. Beaumont for the

LORD JUSTICE ROBERT GOFF said that the appellant had been found guilty of inflicting grievous bodily harm upon a man with whom he had had a homosexual relationship for five years. He had pushed him down some stone steps outside his council

against his santante in the cavon court, and at the hearing the prosecution opened with evidence of oral admissions made by the appellant to the police that he had assaulted the victim in a similar

The judge asked the appellant's counsel if she wished the issue to be tried. She replied that she did not, but stated that the appellant denied that such incidents had occurred.

The judge found that they had occurred, and dismissed the appeal, increasing the contents to

THE REMARKABLE BURROUGHS

Most people to the because there's a computer company that see than Burroughs, that automatically makes the company than Burroughs.

That's not

In since the inputers, for example the Burroughs B20 is the fifthe most versatile easy to use, expandable, multi-functional workstations in the industry.

With its powerful 16-bit processor and up to 640K bytes of RAM in each workstation, the Burroughs. B20 gives each user his own computer, but with the power, data base and storage that were once associated only with mainframes.

More importantly, the B20 can be networked with other B20's and communicate with other systems, including IBM, so everyone is always working with the latest, up-to-date information. And the B20 can have multiple work-

stations sharing storage, printing and other facilities.
You can have four built-in high level languages (BASIC, FORTRAN, ascal, and COBOL), an outstanding graphics capability with integrated financial

modeling, and a full U.K. word processing keyboard. If you need any help, just call the Burroughs Resource Control Centre. More than 1,000 trained Burroughs computer specialists are available to help you with any problem—whether it's our hardware, software, or operating systems. (Being in the office equipment business in Britain for 87

MAZ A COS

years has taught us a little something about service and support.) So, if you're in the market for a small business computer, your

decision shouldn't be based on a company's size. But rather, on the company's quality.

Burroughs

THE QUESTION ISN'T WHO'S BIGGER. IT'S WHO'S BETTER.

chemistry, English and biology

How Mr Berg became a mastermind

At first glance there is little deck to similarity between a spoken program of about 60k to be word cassette of One hour with loaded in small sections into a Edgar Allen Poe" and a micro computer program. "Know your own personality" by Prof London University.

The link between the two is software publisher Ivan Berg, for such subjects as maths, who, with a background of chemistry, English and biology, journalism. TV scriptwriting Using the knowledge he and publishing audio tapes, has become a leading supplier of ducational and home entertainment software.

Mr Berg's interest in comuters began at Christmas 1981 when he bought his son a VIC 20 home computer, and discovered that, apart from the ubiquitous invader games, there was a dearth of programs With the aid of the instruc-

tion manual, he set about exploring BASIC and discovered that it was not dissimilar to learning a new language: soon he had mastered it and started writing his own prog-

Realizing that nobody was filling his perceived gap in the market, he approached Commodore with his ideas for new "non-games" software, and with their help, set up a research team to develop them.

The first program to evolve was "Mastermind", based on the BBC favourite. It uses the

for maths,

16k machine.

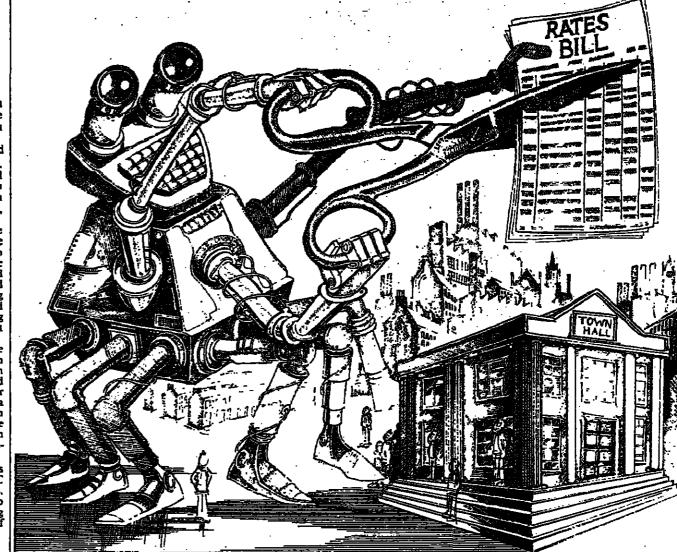

By autumn 1982 he had published 14 quiz, educational, and home utility programs, and is now firmly established with his boxed tapes of GCE revision chemistry. English and biology.
Using the knowledge he
acquired while selling tapes, he

has just concluded a deal to distribute educational software through conventional and tape outlets; the record industry, with its dwindling sales, was very receptive and display racks should be finding their way into High Street record stores within the month. Mr Berg's latest titles include

teach and test tapes for children aged four to eight, written in association with Hodder and Stoughton, and, using the power of the new Commodore 64, a program written jointly with astronomer Patrick Moore. He will display any given sky on arium to the living room. He has just concluded deals

with Acorn, makers of the BBC micro, and Texas Instruments, for a radically new approach to education, with programs being sold under the collective title of

Geoffrey Ellis

A new line in software at the town hall

The Xerox Marathon produced a new range of copiers every office should find room for

THE XEROX In the course of the marathon research and development programme that produced our new 10 Series copiers, we were striving

for new levels of efficiency and reliability. But more than that, we were seeking to embody these virtues in a range of machines that would include the perfect copier for any situation.

So at one end of the scale we've produced large multi-function copiers capable of handling huge volumes of work and all the various copying operations that a big office might demand.

At the other end of the scale we produced the Xerox 1020.

The 1020 is the lightest, smallest copier we've ever made.

And yet it's robust and simple.

It produces up to eleven copies a minute as well as taking computer printouts and other large originals up to B4.

And its five-position contrast control ensures high quality copies.

All this from a copier that fits into the space of an average typewriter.

Despite its small size the 1020 has been through the same exhaustive research programme as have all the other copiers in the range. The Xerox Marathon.

The most extensive testing programme ever mounted by Xerox.

We ran the 1020 for months on end, to see how it stood up to continual use. We checked and re-checked every

single feature.

We subjected it to demands no copier would normally be expected to meet. As we wanted any failings to be exposed in our laboratories, not in

And we went on changing, modifying and perfecting, but we still weren't totally satisfied.

We took it out of our laboratories and put it into everyday use to see how it stood the pace.

We asked people who hadn't used a copier before to try the Xerox 1020 to ensure that it was easy to use.

And, even with its extremely advanced technology, it proved to be

simplicity itself. The result, a more compact, more efficient, more reliable, top quality small copier which will find a place almost anywhere in your office.

It's one of the new 10 Series range of copiers from Xerox. The new state of the art in copying.

The Xerox Family of Marathon Copiers

Everyone in for the revolution

The main problem for the important change was dropping computerized council of Traf- the training scheme. This ford is that everyone wants a means that all staff are proterminal in the office to look at ducers and not supervisors. his own data. It is an indication of the success the strategy and Mr Laws has borough, in the Greater Manchester area, has achieved in getting to grips with its new

In March 1978, George Laws, acting treasurer, was given overall responsibility for the council's computer resources. in a number of areas.

On the personnel side, there were systems development staff on the establishment but, because their grades were too low, it was difficult to recruit suitable workers.

Trafford had tried training programmers in-house but found that, largely because of better salaries in industry, they left as soon as they were of any real value. This problem is one that all sections of the computer industry have to face, though it is not always directly related to resulting from being bogged down with boring maintenance work was a big factor, and often

Senior staff were also spending too much time checking the work of trainees and with maintenance. Like most of the computer industry, 70 per cent of staff time was spent on maintaining existing systems while only 30 per cent was spent on developing new applications. Because of the lack of pace

and vitality in development. extra hardware was needed to maintain the existing service. the private sector, problems had been temporarily solved by cobbling up many proprietary software packages. This put Trafford at the

crossroads in computing terms.
Councillors were told by Mr
Laws they had two options: either to stand still with current staffing levels, hardware and existing systems or to enter into a commitment to full computer development When the real issues were presented to the councillors, a

positive response was received and a commitment to develop the computer services at the borough to its fullest potential

On energy management alone, the system has saved £750,000 a year out of a budget of £2,500,000. Mr Laws estimated his descriptions were best of the system o mates his department would have to double in size if it were not for the systems so far developed. This would cost an extra £12m a year.

The only way to beat the

maintenance backlog was to buy in fourth generation software tools that would develop more efficient systems more quickly and to turn the com-puter from being a mere high speed adding machine into a management information system. The council has a 6 megabyte IBM 3031 at present and is upgrading to an IBM 3083E under MVS.

First, on the staffing side there was an urgent need to get and keep better quality people. While at first glance this could be seen as pushing up labour costs, it was not so in practice. Higher calibre staff produce more lines of code more quickly so the employer needs fewer or, in Trafford's case, no extra staff. in 1974 Trafford employed 27 people in its DP department. Again this was on a par with many private sector instal-

lations of about the same size. It now employs 21. This means fewer people are concerned with data input and more with teleprocessing work. The staff costs in 1974 were £187,000. In 1982 they had only risen about £1,000 to £188,000. The most

Second, the council needed a

strategy and Mr Laws had a vision whereby the information necessary to enable management and workers to function efficiently would be readily having to know anything about computers and any more effort than merely asking for it. In 1978, Mr Laws found the was to develop personal DP facilities on as simple a basis as possible using video terminals. ford needed a viable database for storing information that could be used by more than one council department. There were two main reasons for this. One was that without the infor-mation being held on the computer, it would not be possible for many access points to obtain it and the other was Mr Laws's conviction that this was a major route to cutting down routine maintenance. A shortlist of five products

was drawn up. These were: Adabas, DL/I, IDMS, Ramis II and Total. Ramis II was picked because Mr Laws found it had the shortest learning curve and hence would be the easiest to use as well as tying up the least

More than 20 major applications have been completed

The aim of the system was to make the best use of energy consumption by climinating waste. This would then liberate resources for more effective provision of community needs.

It also identifies managerial responsibility and consumption targets. Every year, the 10 buildings with the highest energy costs per square metre and cost/consumption per occupant are easily identified and Trafford's fuel efficiency engincer then concentrates on improving them to bring down costs. It also enables the council to plan capital schemes and architects' briefs for all projects far more coherently. It coversmains gas and electricity, oil, water, calor gas, coal and telephones. The council can also examine more closely monthly accounts from sup-

The system also identified the following errors:

The energy bills of a building administered by an-

other local authority were being paid for by Trafford;

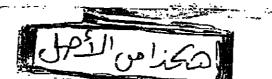

Trafford was being over-charged 100,000 service units per quarter over a seven year period on a block of flats. period on a block of flats.

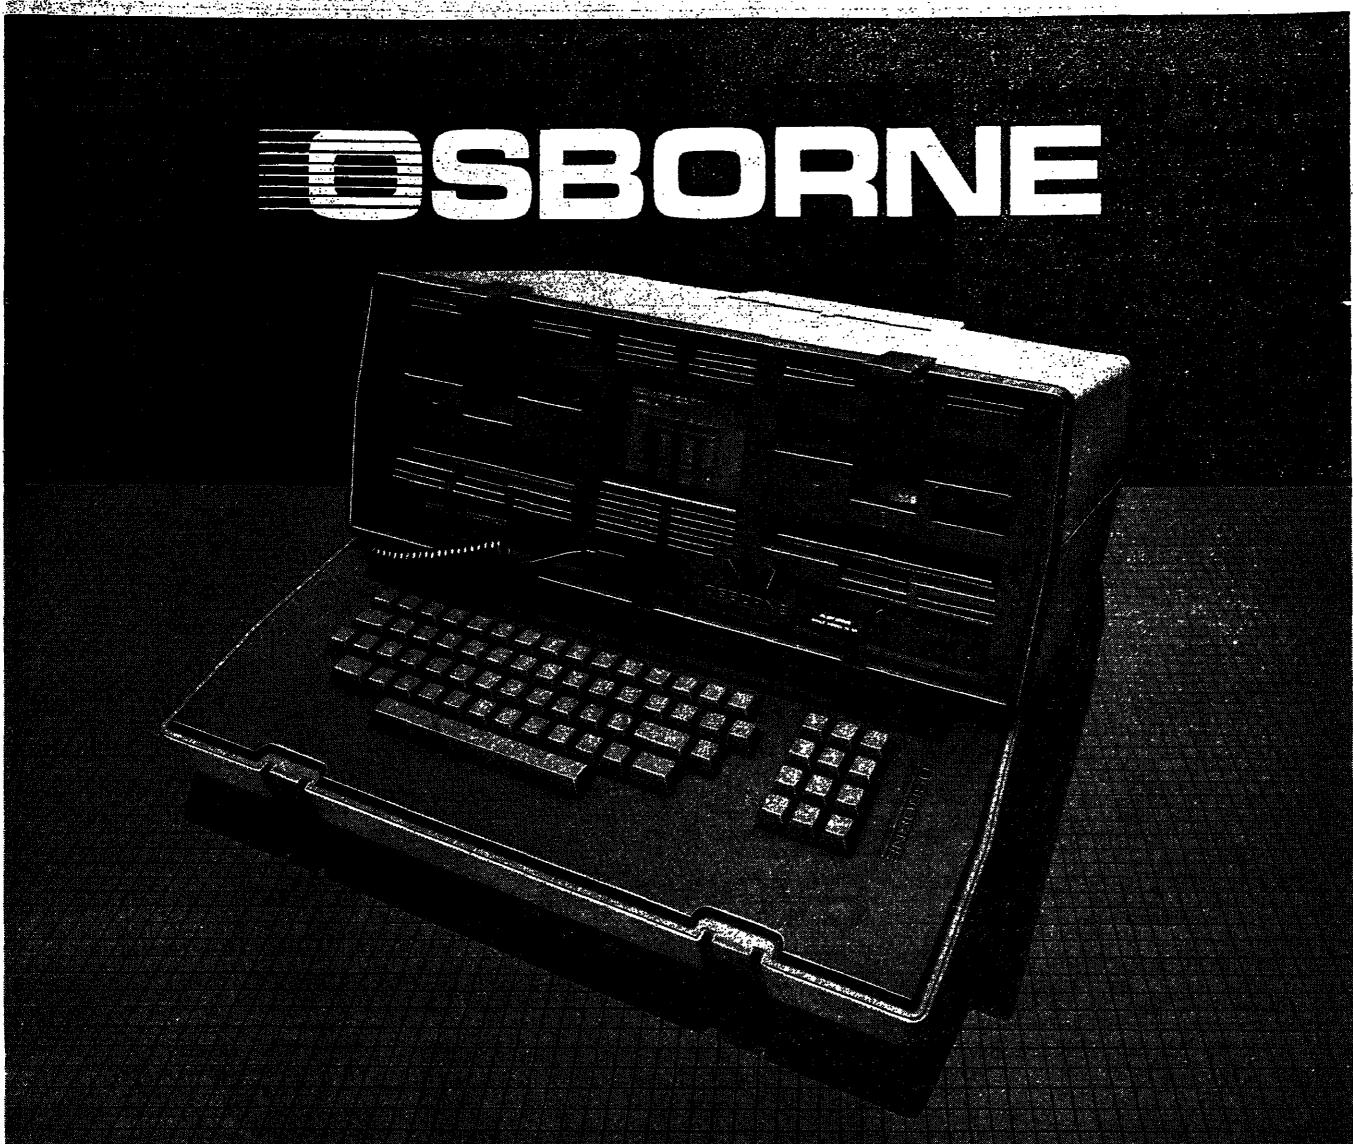

The electricity bills for a police communications signal booster were being debited to

Computer manager at Trafford is Bill Hough who pioneered the use of UFO. This s a software tool supplied by Systems Resources at Coventry that enables teleprocessing jobs to be written more quickly compared with IBM's own product, Cics. Another problem with Cics is that there are very few staff in the industry who know how to use it and consequently they attract very high salaries.

Hough said: "I have yet to hear a valid reason for not using UFO. I think it is the concept of the way we work that has changed things at Trafford K was brought in by Mr Laws to get applications moving and what has counted is the attitude of PD staffs to getting the best out of the tools available."

Efor £, lb for lb nothing comes close!

i wish to take advantage of the DBase 1 software offer, and I understand that this voucher entitles

discount on the purchase price of £385 + VAT

Nature of Business.

The remarkable Osborne 1. The first portable personal business computer. And, the first to include a comprehensive range of software in the asking price. Around £800 worth of software. In fact, everything you need to work faster and better with words, numbers and ideas.

Not bad when you consider the Osborne 1 is only £1,375 + VAT.

inclusive Software Package

- ★ SUPERCALC® for electronic spreadsheets
- ★ WORDSTAR® for word processing with MAILMERGE®
- ★ CP/M® the control program that gives you access to the world's biggest library of software options
- ★ CBASIC® and MBASIC® for programming

TODAY OSBORNE offers you an added bonus.

Between now and May 31st, save over £200 on the price of DBase 1/8 – the best selling Data Base System from Ashton-Tate.

With DBase (® your Osborne 1 has the power of a mainframe to help you tackle a wide range of information handling tasks.

Address lists, Sales ledgers, Time sheets. Inventory control and so on. But this offer lasts only until May 31st, 1983.

So take the attached DBase 10 voucher into your local participating Osborne dealer now, and take away the world's best selling portable computer!

By the way if you are fortunate enough to already own the Osborne 1, you can still benefit from the DBase (® offer.

For your nearest participating dealer see the list shown, or contact Osborne for further information.

Here is news of a major breakthrough for all floppy disk users - a floppy disk that is error free, reliable. accurate and guaranteed forever!

You told us you needed a reliable floppy disk.

When we asked you — the floppy disk user — what you needed, you told us "reliability and accuracy." After nearly two years of research and testing together with a major manufacturer, we can now offer you a floppy disk that is so reliable and accurate, that we can guarantee it for your lifetime! Should an Inmac Plus disk ever fail to perform to your satisfaction, we will replace it immediately! If it fails an initializing or formatting routine, we will replace it with two disks!! How can we make such a shattering claim? The secret is advanced technology...

The Secret of Inmac Plus Reliability.

1. Inmac Plus works first time, every time. The first thing you will notice that is different about Inmac Plus is the blue hub ring. There is no better protection for vour diskette against the warps, dents, burrs and tears caused by your drive's clamping

90%					4	ldot

50%	0 21					00 1200
No. of passes (× 10°) After 11 million passes, inmac Plus disks						
(top trace) retain nearly 100% of their original output. The lower trace repre- sents a typical competitive brand						

2. Flake proof oxide coating gives your

data effective protection. Diskettes normally have hard coatings that gradually break down and flake under everyday stress of drive heads and pressure pads: this causes costly read/write errors and can damage your disk drives. Inmac Plus disks have a flexible oxide coating which resists breakdown over time.

3. Inmac Plus does not wear down like other disks. Friction from drive heads and pressure pads is a major cause of wear and tear to a diskette. The Immac Plus disk has a special cured lubricant that lasts and lasts.

4. 100% Error Free. The mylar substrate of the floppy undergoes a special annealing process in manufacture which improves reliability by resisting expansion and contraction due to variations in temperature and humidity. Inmac's unique testing routines are to stringent specifica-tions to ensure Inmac Plus floppies are 100% error free.

For the full story behind Inmac Plus -

read the Inmac catalogue - out now!

Immac Plus 5¼" and 8" floppy disks are available only through the Immac Catalogue; in a variety of formats and up to quad density. Read all about them and 859 cables, accessories and supplies in our new free 64 page catalogue. It is packed with exciting new ideas and products for your computer operation. You will find floppy disks for over 300 models of computers and word processors; ribbons for over 400 printers; cables and connectors for RS-232, Apple, Commodore, DEC. DG, HP, IBM. Osborne, Systime, Tandy.

And Inmac gives you our now famous promise of 30 days risk-FREE trial, a minimum of 12 months guarantee and next day delivery of your order!

Any old computers for sale?

It looks like the usual Saturday jumble sale battle; in fact, this was the one-day bring-and-buy sale at the London Festival of Computing, writes Geoffrey Ellis. Goods

for sale included old printed circuit boards, chips, keyboards, instruction books for old machines - even a vintage teleprinter. The enthusiasm of this year's visitors has

ensured a three-day booking in April nea year of the Central Hall, Westminster. This year about £6 000 was raised for the Association of London Computer Clubs:

And the confusion surrounding personal computers, widespread. Because the term 'personal' computer now stretches to include a multitude of machines, with a diverse range of functions and capabilities.

So let's set the record straight. And get down to business.

Over the past quarter century Digital's main objective has been to personalise the computer Permitting direct access to real computing power to whoever wants it

And in that time Digital have introduced minicomputer power into banks, mines, steel plants, farms, refineries, aviation, broadcasting, universities and assembly lines to name but a few.

Digital were also the first company to mass produce minicomputers, and the PDP-11 is, in fact, the world's most popular minicomputer today.

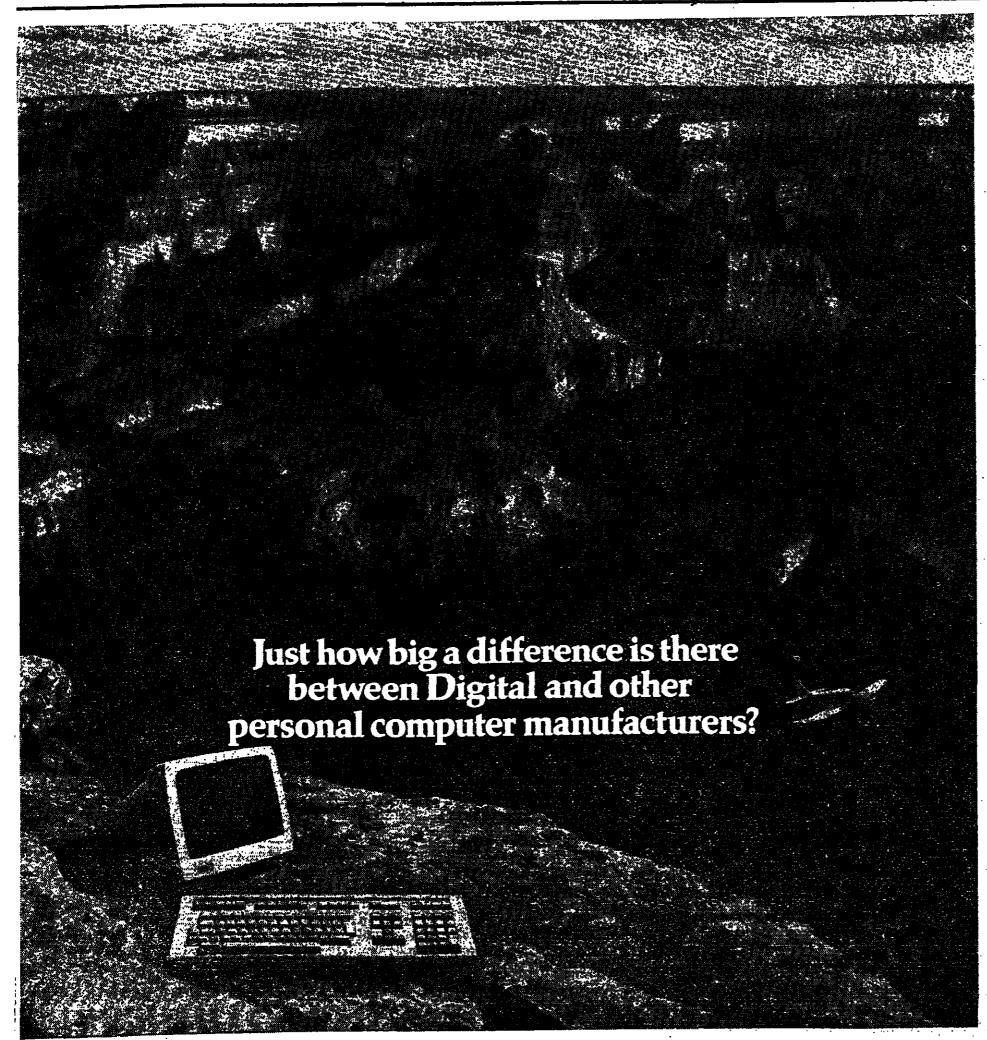

A fact that makes Digital the world's largest manufacturer of minicomputers. Which, in turn, makes it less of a surprise that Digital have now developed a range of personal computers unrivalled in their ability to meet today's professional requirements. At all levels. Because from the dual microprocessor Digital Rainbow to the highly advanced Digital Professionals, the first personal computers with the ability to perform numerous functions at once, there's a Digital personal computer to suit practically any need.

And the Digital difference becomes even wider when you consider Digital's unique service back-up, which includes access to our Customer Information Centre, service support, software services and maintenance. And in the unlikely event of anything going wrong, Digital guarantee to deal with any problem, on site, within 8 working hours anywhere on the UK mainland.

Plus you automatically get a free 12 month warranty to cover all our hardware and software.

It's a service record that is, in fact, unrivalled by any If you'd like further information about Digital professional personal computers ring Digital on Basingstoke (0256) 59200 then compare the facts with any other machines to see just how wide that chasmof difference really is.

You'll end up on our side every time. Doing more. The Digital difference.

THE TIMES TUESDAY APRIL 26 1983 **COMPUTER HORIZONS**

People/Tom Fitzpatrick and David Johns of CPU Computers

Tom Fitzpatrick and David Johns are one of the computer industry's double acts. They have been partners in CPU Computers since starting it in 1973, and bring a new dimension. sion to the role of joint managing director. They ex-plain their activities in alternate sentences, amplifying each other's statements, never disagreeing they are the cross-talk performers of the computer.

The first five years of the business was all investment? says Johns (or it could have been Fitzpatrick). "You can't look at our growth and say we

are any sort of shooting star."
"Steady growth has been one of the cornerstones of our success", adds Fitzpatrick (or was it Johns?). "There was no outside capital available, so we had to finance ourselves out of profits. That does curtail your

Just like the regular turns of the old music hall circuit. Fitzpatrick and Johns (left in the picture) started near the bottom of the bill. Their first year's turnover was £40,000. They have climbed as a result of hard work and solid achievement, and if not yet stars, they are certainly established.

The pair met when they both worked for Varian, a US-based scientific equipment company which had a brief flirtation with minicomputers. Varian formed a team to look at European and Johns were involved.

"We were going to see a couple of companies here and a couple of companies there", they retail, "and we thought representative for Varian. Then, facturers, Shugart, gave CPU maybe we ought to do it on a trip to America, Johns the British agency, but there ourselves."

CPU Computers began as a drives. A deal with the manuse made.

"In the first year we sold 120", says Fitzpatrick.

The Shugart deal gave CPU Computers a solid grounding in the peripherals business, which is still the major activity, but before long the company was launched into manufacturing as well. The appearance of the first microcomputers in 1976 convinced the two partners that they could produce a Britishmade small system with floppydisk drives as a backing store.

introduced in 1977. During the next four years 600 systems were sold; now a range of computers is made and mar-keted by a subsidiary, LSI Computers.

Recently Johns and Fitz-patrick have been adding to the ousiness with acquisitions in Britain and West Germany. Turnover is expected to reach £14m this year, but present success does not disguise the bootstrap efforts of the past.

David Johns recalls with scorn how a bank responded to the young company's need for finance by offering an overdraft of £3,500. Even if more funds had been available, though, the pair have personal reservations about owing money.

"We felt earlier that we lost several opportunities because we were unwilling to borrow", admits Fitzpatrick "Now things have changed, and the company can grow very quick-

"We feel we now have a company which will be around for a long time to come", adds

Roger Woolnough

IT and the Iron Lady

Continued from page 23

Palace of Westminster four years ago. There are now nine different systems within the palace and facilities for acces-

sing several others outside.

The one-day courses Morganhas instituted are run by the National Computing Centre, and give members first-hand experience in using microcomputors. They have met with enthusiastic response, and there is a waiting list of members wanting to attend them,

Next, there is the complex problem of how best to provide members with IT equipment. The difficulties here are the wide diversity of members' secretarial arrangements, a chronic shortage of office accommodation, and the fact that MPs do not get an allowance for buying office equipment. Their secretarial allowance of £8,500 a year is sufficient only to cover the cost of the secretary herself.

As far back as 1976 the Review Body on Top Salaries recommended that MPs begin an allowance to help them buy and maintain office equipment The idea was rejected.

Last month, the problem came a step nearer solution when the Commons Services Committee sanctioned an independent study on members' IT requirements. The consultants commissioned to do the study are expected to report on their findings and recommendations this autumn.

One MP who hopes the report will be published before the general election is Eric Ogden, Social Democrat chairman of the House computer subcommittee that initiated the study. "We have been laying the foundations of information technology policy in this Parlia-ment, and have achieved a lot. There is now a general recog nition of the importance of IT in Parliament and of the Computer Development Offic-

er's post," he said.
"It would be nice if we could get the report's recommen-dations before the end of the present session, so that mem-bers in the next Parliament will have something positive to work on."

No expense spared on new technology

Ogden estimates there will be around 100 new members in the next Parliament. Each one will get only a desk, a telephone and the use of communal photocopying machines. He wants to see three or four pilot groups each trying out a particular make of equipment which the subcommittee would obtain on three-months trial.

Barry Henderson, chairman of the all-party information technology group Pitcom, thinks the solution lies in a local-area network (LAN), i.e. a system which links computers and word processors with a common multi-way cable so that they can share resources.

problems of agreeing on a specification which will meet the very diverse needs of members. Well over a dozen different secretarial arrange-ments have to be satisfied, depending on member's circumstances and relationships with their constituencies and, in some cases, with the trade unions that sponsor them.

A local area network also poses the problem of installing the cable in what is already a jungle of wires at Westminster. But this could be simplified by including the necessary cabling with that of the new telephone exchange for the Houses of Parliament which is due to come into operation in 1984/85.

Indeed, some consider that because the new exchange will be a digital one - it will handle telephone voice signals in the form of pulses similar to those handled by computers - there will be no need for separate LAN cabling because the exchange will also be able to handle the data traffic between MPs' terminals or personal computers, their secretaries' terminals, and resources such as printers and data storage

Any IT data-handling ability the exchange may have, how-ever, would be exploited after the exchange has been brought into operation, and undertaken as a separately-funded project, Morgan says. Thus, IT facilities based on the new telephone exchange would not be available to MPs until 1985/86.

Although a members II network is still some way off. Henderson is optimistic: "One consolation is that while progress seems agonizingly slow, its pace is building up. In reality, more has been achieved in the past few years than in the past

It is certainly true that while the present Parliament has a reputation for cutting government expenditure, it has spared no expense on investing in new technologies for increasing the efficiency of government and industry. The Supply Estimates 1983-84 published last month, for example, increased the computer services budget for the Houses of Parliament by 32 per cent to £710,000.

As one member put it: "Margaret Thatcher could well be remembered as the IT Lady as well as the Iron Lady, and the Information Minister Kenneth Baker, and his junior industry minister, John Butcher, as her

RUGBY UNION

One final try for captain Johnson

Rugby Correspondent

Steve Johnson, the Leicester captain and former England B flanker, will play his last game for the club in the John Player Cup final against Bristol at Twickenham on Saturday. Johnson, aged 33, has decided to retire, which will give his club one more reason to do well: in their last match of the season Leicester can claim their thirty-fourth win, which would top their previous highest total, and if they scored 10 points they would pass 1,000 for the first time. A fourth cup win seems almost incidental.

It was a cosmopolitan gathering at the annual pre-tinal encounter at Twickenahm's Rose Room yester day. Leicester sent a large deputation, primarily composed of their promising young forwards. Bristol had knibbs their 18-year-old centre to represent the players and a clutch of officials, the match sponsors had a large (but stuffed) tiger and, with the assistance of Chipperfield Circus, a small (but live) tiger cub and a baby chimpanzee. The Rugby Football Union president-elect and officers were also in attendance, but were harmy to relay second Stelle.

were happy to play second fiddle to the rest of the band. Bristol. as they have done all season after being drawn away in every round, will travel on Friday and stay overnight at Maidenhead.
It has, they say, become a habit, an embellishment has been finding a horse racing connexion after calling at a stables en route to West. at a statics on training at Warwick raccourse before their semi-final with Coventry. They are loking into possibilities at Ascot or Epsom this

They will be happy to go into the Incy will be happy to go into the final as underdogs.

In reaching the final they have scored 16 tries, their opponents 19. Both clubs selected late last night, but Bristol must wait to see if Duggan, their full-back, has recovered from fluid on the knee. Leicester are happier with the condition of Gilingham (twisted ankle) and Barnwell (groin strain), than with Dodge and Smith, the hamstring victims. Final decisions can be left until final training on

Swansea make a Swift switch

Tony Swift, the Englang wing, plays in the centre for Swansea against Pontypool in Saturday's Welsh Cup Final in Cardiff. He replaces David Richards, the Wales Centre and club captain.

Mark Davies, the flank forward take over the captaincy. Paul Gallacher, aged 21, from Blaina in Gwent, in his first season for Swansen, replaces Swift on the right

Barbarian style: Gerber (left) and Tobias, who have demonstrated that the art of centre threequarter play is far from dead

Only a handful of teams now committed to 15-man rugby

Back play decline caused by coach's changed role

ters, Danie Gerber and Errol more absored in organizing Tobias, for the Barbarians their sides to win particular against Scotland, Cardiff and games than in concentrating on Swansea demonstrated, at least in the first two games, that the threequarters alike. There is art of centre play is far from only a handful of sides currently

Both Springboks were fortunate that, in all their matches, attack was the watchword of both sides. Consequently, their games were more relaxed and exciting, even if sometimes the basic skills. particularly tack-couple of quick, flat passes ling, were not always in the top enable Hare to give his wingers, drawer. This led to Gerber and Tobias being afforded more space to manoeuvre than they would have enjoyed had they been playing in an inter-

Much consternation was expressed after this season's international matches, and the poverty of the back play. It was only in January that England were reputed to have the best threequarter line for the five nations championship. Yet they second centre, and so on, with managed to score only one try.

I believe that the major cause

the decline in threequarter make that crucial overlap.

committed to a 15-man appraoch, and of these Leicester,

Bristol and Bath head the list. Budge Rogers, chairman of the England selectors, has said of Leicester. "Few clubs have learned from their success. A Barnwell and Evans, ample room to move.

In the early 1970s, attacking rugby started with the full back entering the line to make an extra man. This is now being countered to some extent by the opposition threequarters adopting a "drift defence". Instead of marking man for man, he opposition's stand off shuffles across to take the first centre. In turn, the first centre takes the the result that the full back no longer finds he has been able to

play is a gradual change over Defences adopting the drift the past five years in the role of method have been vulnerable to the club coach. The cumber- attack around their stand-off. In some merit-table procedures, order to overcome that particuwhich lead to qualification for lar problem, back row forwards

The inspired inclusion of the the John Player Cup, have have changed their angle of south African three-quarmeant that coaches have been running. Thus, apparently - so the story goes - scoring tries from set pieces has become almost impossible. This theory the basic skills of forwards and is turned on its head when one realizes that England's try against Wales at Cardiff this year came from such a position and, what is more, involved the timely intervention in the line

of the full back, Dusty Hare. Mike Gibson, the doyen of centres, was a regular visitor to the athletic track in and out of season. I doubt if more than a handful of backs in Britain currently emulate the old master. Speed, too, requires consistent track practice. This, coupled with alignment and passing routines, would soon restore our faith in back play.

In the final analysis, how-ever, it is not just a question of practice, but of attitude of mind. International rugby only mirrors what is underneath it. I would contend that few coaches at the moment have a sufficient appreciation of the potential of 15-a-side rugby. This, at a time when there have never been so many qualified Rugby Football Union coaches, is slightly worrying for the future of the game in England.

Derek Wyatt

Douglas ranked seventh in world

TABLE TENNIS

By a Special Correspondent

Desmond Douglas has been levated to No. 7 his highest world ranking in the latest International ranking in the latest International Table Tennis Federation classification list. The seedings for the world championships, which start in Tokyo on Thursday, have been taken directly from the list which means that the England No. 1 has his best chance of reaching the quarter-finals for the first time.

Four Chinese players, one apanese - the former world hampion, Seiji Ono - and one Swede - the European champion Mikael Appelgren - are now the only players above Douglas and of those he has usually been able to get the better of Ono. He is above two other former world champions.
Istvan Jonyer, of Hungary, and
Stellan Bengtston, of Sweden, and
above no fewer than five former European champions. Donglas has always desired, occasionally de-served, the European title but never come closer to it than his semi-final defeat by Jonyer in Duisburg in 1978.

All this is reward for success with All this is reward for success with quicksilver reflexes, sometimes described as the quickest in the world. Douglas won the Lambert and Butler invitation tournament for the second year in succession at Wembley in November, maintained his record as the leading player in the international-flavoured German Bundastiga, and finished second in the Emopean Top Twelve event at Cleveland in February.

The Experience with bunder now

The Birmingham left-hander now has to make sure that there are no sip-ups in Tokyo, especially as his record in the Far East is not as impressive as it might be. He should find his way past a qualifier in the first round, and Alan Griffiths, the leading Weishman, in the second. He is then likely to face the dangerous Jindrich Pansky, the Czech with the fierce forehand and a world ranking of twenty-eighth, to whom he has lost before.

EQUESTRIANISM

Staying away from Rome

Britain are not sending a team to the Rome International Show from May 3 to 8. In a break from tradition the British Show Jumping Association have decided that it will not be practicable to send riders who have just completed the World Cup finals in Vienna or a less experienced team with little chance of winning the Nations Cup.

The British team's first big effort of the season will be in their own official Nations Cup meeting at Hickstead from May 27 to 30.

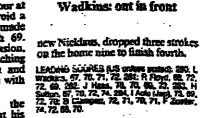

Wadkins is back in Ryder Cup team after repeat victory

Lamy Wadkins just held off a fierce charge by Raymood Floyd to keep his Tournament of Champions title on Sunday and then spoke of how delighted he was to be in the Ryder Cup team again for the matches against Europe at the PGA headquarters in Palm Beach Gardens, Florida on October 14 to 16.

by three strokes. This time he faltered slightly in the home straight, dropping strokes at the sixteenth and seventeenth holes. That meant he needed a par four at the 437-area schementh to award a "It's going to be a lot of fun and I'm delighted to be back", said. Walkins, echoing the sentiments of most United States professionals who relish playing for their country rather than themselves in this most the 432-yard eighteenth to avoid a play-off with Floyd, who had made a typical late challenge with 69. Wadkins was equal to the occasion, driving straight and sure, pitching into the centre of the green and coasing the ball into the hole with two notes.

rather than themselves in this most individualistic of sporting careers. Wadkins, aged 33, a Virginian who started his golf career on a sports scholarship at Wake Forest University in North Carolina, also the alma mater of the young Arnold Palmer, had a distinguished amateur career which culminated in the Walfert One His victory, which was the twelveth of his career, brought his prize-money this year to \$229,048 (£48,000) and his career total to more than \$1 \text{year} (£968,000).

He has had a fine season, winning the Greensbero Open the week before the Masters, in which he tied for eighth place. He was also second in Tucsun and Los Angeles. He is the fifth player to win this thic in successive years: the others were Gene Littler, Jack Nicklaus, Arnold Palmer and Tom Nicken. amateur career which culminated in appearances in the Walker Cup matches of 1969 and 1971. After turning professional in 1971 he played in the Ryder Cup teams of 1977 and 1979, but missed the last encounter at Walton Heath in 1981. The 70 points he gained as the winner here gave him a large lead in the Cup points table; 374 to Floyd's 337. Tom Kite, Iay Haas, Craig Stadler, Gil Morgan and Bob Gilder also took certainties with Curis Strange, Frank Zoeller and Calvain Peete strong contenders. There are Palmer and Tom Watson.
Nicklaus redeemed himself after his 77 in the third round with a 75 that hauled him up to joint 10th place. Hal Sutton, who is being described by some optimises as the

The LPGA tournament at St Petersburg, Florida, was won by Hollis Stary, whose 72 gave her an 11-under-par total of 277, and a first prize of \$22,500 (£14,500), for a victory by six shots over Patty Sheeban and Deedee Lasker.

Hull City final likely

By Paul Harrison

Speedwell Rucanor, of Bristol, have a new name to face in the final of the Mikasa Cup on Sunday at the Britamia Leisure Centre, Shore-disch. Kelly Girl Internationals have

had their name change to Capital City Spikers accepted by the English Volleyball Association in time for the final. The South London side lost their sponsorship, after three years, at the end of last season, but years, at the end of last season, but continued to use the Kelly Girl name for most of this season.

Mike Warwick, the Spikers' manager, said: "We kept the name on basically because people know the name and associated us with Kelly Girl. We are still looking for a sponsorship." The new name was chosen by the players.

The Spikers was Spikers and Spikers are said.

sponsorship." The new name was chosen by the players.

The Spikers, who finished second in the league behind Speedwell, came nearer than any other British club to beating them this season, going down 3-2 at Bath, and having match points in the fourth set.

With a full squad, and the knowledge that they have nothing to lose, they could stretch Speedwell. Speedwell are going for the double, having established themselves as the best club side in Britain.

VOLLEYBALL

New name

for finalists

RUGBY LEAGUE

thiery Park, the Hull City

Boothderry Park, the Hull City ground, will almost cartainly stage the premiership final on Saturday. May 14, if Hull and Hull Kingston Rovers go through in next weekend's semi-finals. This would be the first time the foothall ground has staged a Rugby League trophy final. It staged Hull v the New Zealanders in 1986 and the Great Britain v Australia international last winter.

Final sominations have been received for the annual player of the year awards, sponsored by Transan's Steel, which will take place at Wakefield on Manday week. The nominations are:

First division: Bob Eccles (Warrington), Reith Mundby (Bradford Northern), David Toplies (Hull). Second division: Tommy David (Carthiff City), Mike Lampkowski (Wakefield Trinity), Steve Nash (Salfond). Young player: Rosmie Dunne (Warthern). Coach of the year: Arthur Brothen (Hull) bolder) Northern). Conch of the year.

Overt, the world 1500 metres record holder, showed he is ready to reestablish himself after a season of illness and injury, when he came second in a 10 kilometres road race in Oslo on Souday in impo

His previous mile race in England colours was at Gateshead in June, 1981, and he last competed at this distance in Sydney, Australia, in October of that year.

England's opponents in a track match will be Poland. Austria and Belgium. These will also be a full match of field events between England and Poland.

Tomorrow

David Miller reports from Cape Town. He has watched and spoken to the outstanding South African athletes and puts their performances in international perspective.

Higgins loses momentum after

heated argument with referee

The tension steadily gathering around the tables at the Crucible Theatre. Sheffield, was reflected in

yesterday's quarter final match of the world championship, sponsored by Embassy, between Alex Higgins, the title-holder, and Bill Werbeniuk,

Higgins, by his gestures, clearly disagreed with the decision of the referee, John Williams, who penalized him sax points in the third

frame which Higgins eventually lost after starting it with a break of 40. Werbeniuk finished with a break of

and he went back to win the next frame and jase his lead to 3-1.

The atmosphere was a little more tranquil at about 3.50 am yesterday when Chiff Thorburn saged with relief after beating Terry Griffiths 13-12 in the second round. About

200 people stayed on to witness the climax to a match which took 13

hours three minutes to complete,

his composure to compile a match-winning break of 75 and the ordes!

start of vesterday's press confer-"Yes, that's right," he

The only position that has not been disrupted so far is goalkeeper. Midfield, although Bryan Robson is perhaps crucially unavailable as well as Rix. is still strongly represented, but the cover at left back, in the middle of the defence and in attack has been taken away by the injuries suffered by Statham, Osman and Wood-

Robson was forced, therefore, to look even further down his list of preferences to find three more players. Kennedy, of Liverpool, Roberts, of Totten-ham Hotspur, and Shaw, of Aston Villa, have been asked to stand by to travel to the training headquarters at Bisham Abbey. required. They have gained not a single senior international cap between them.

Robson admitted that they were not necessarily his first choices. Caton, for instance, would have been called up as the reserve central defender but he is injured as well. So is Bennett. Several others who might have been summoned are in the under-21 party to play against the Hungarians in Newcastle tonight and Robson felt it wrong to disturb them.

Kennedy, though, is there on merit. Robson considers him, "the third best left back in the country. He impressed me during the tour to Austrana a few years ago, he has the experience of playing in Europe and has been a part of an goalscorers, the left winger, Poloskei, and the midfield during the tour to Australia a

attack in the European champion-ship against Bulgaria at Wrexham tomorrow. Rush, who has scored 30 goals this season for Liverpool, has

missed the last two league games with a groin injury, but after visiting a specialist yesterday, he persuaded the Football League champions-cleet that he was fit enough to figure in the Welch plant.

"Liverpool agreed to let lan join us after he had a workout at the club," confirmed the delighted

very heartening news." Wales, have given their word that Rush will not be risked if his injury flares up again. "Ian will train with us tomorrow and on Wednesday

morning and if there is the slightest

reaction to the injury then he will not be considered." England said.

Chester's proposals may be rejected

second division clubs were represented at a private meeting of club chairmen at Stamford Bridge yesterday. They gathered to agree their policy for the extraordinary general meeting of the Football League in London today at which clubs will vote on the recommendations of the Chester report, and the indications were that the the indications were that the report, as it stands, will be rejected.

The Chelsea chairman, Ken

The question was whether Higgins, using the rest, had hit the pink off the cushion. Most people thought that he had. He left the arena, protresting strongly asked the tournament promoter, Mike Watterson, for a change of referee. But Mr Watterson calmed him down and he want best to win the next. The Chelsea chairman, Ken Bates, said: "There was a general feeling today that the principles of the report should be implemented. But whether they will be implemented in a particular way we do not know. There is more than esse way of killing a cat".

Mr Bates also said that the clubs present were of the opinion that the third and fourth division clubs should decide for themselves whether to be reorganized as suggested in the report. Higgins began the match well, making a break of 109 in the first frame and recovering ground to win the second. Higgins increased his lead to 4-1 before Werbeniuk pulled a frame back and then won the next

clubs abould decide for themselves whether to be reorganized as suggested in the report.

"The first and second division clubs do not necessarily know the problems of the lower divisions and perhaps should not impose solutions on them," Mr Bates said. "Maybe they should be allowed to run their own affairs."

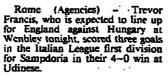

So, with second division clubs and less successful sides in the top section unfikely to vote for the reduction of the first division from 22 to 20 clubs. Today's meeting may turn down the report's most significant plans. Even less revolutionary ideas, like insisting that all transfer fees should be paid within three mouths instead of 12, are unlikely to find favour. "It was pointed out that we have not had the 12-mouths rate for long. Perhaps we should wait longer and see how it works," Mr Bates added. The meeting was the continuation of a similar one in Coventry recently and it is hoped that such meetings will be repeated regularly in the fature. hours three minutes to complete, the longest on record at this venue.

Later in the day Griffiths described the match as thoroughly enjoyable, looking more relaxed than he was in the closing minutes of the match when he turned to the crowd and said: "Is there anyone here with a brain?" Thorburn was more erudite in his reflections. "I have certainly been through the mill

have certainly been through the mill and if I have to go through this all over again I shall end up insane." Griffiths added that he had won many matches coming from behind and his fighting qualities were again revealed when, after trailing 9-12, he levelled the score at 12-12 with a clearance break of 97. Thorburn, overcome by the tension, had earlier missed some easy shots. However, in the deciding frame he recovered

Director wins injunction

An injunction freezing a block of disputed shares and thus preventing a merger of Reading and Oxford United football clubs, was imposed by a High court judge yesterday. The temporary injunction was granted to Roy Tranter, a director and shareholder of Reading, who is opposed to the merger plan of Robert Maxwell, chairman of Oxford.

He scored his first after 17 minutes after a series of elaborate passes cracked the Udinese defence and he struck again in the fifty-ninth minute. Maggiora scored the third goal shortly afterwards and Francis scored his third goal two minutes from time.

Another foreign import, Platini, the inspiration of France in the World Cup, was also in goalscoring form for his club, Juventus, who edged a point closer to Roma, the league leaders,

Juventus, thie European Cup finalists, found themselves a goal down against Catanzaro, the bottom-of-the-table side, Platini equalized with a penalty and scored

Penny for his thoughts: Charlton stands and takes stock

This must have been the longest weekend in the history of world snooker at the Crucible. The match between Steve Davis and Dennis Taylor (Davis winning 13-11) took 11 hours to complete. Eddie Charlton and John Spencer were locked in combat for 12 hours eight minutes before Charlton won 13-11. The final period of play in the Thorburn-Griffiths match lasted seven hours, with is also the longest on record. on record

The average time taken to complete a frame has increased, compared with last year, from 18 minutes to 25, the slow pairs having become slower. By mid-afternoon yesterday Chariton was involved in a grinding quarter-final against Davis, who at the end of the first period of this 25-frame match which

continues today, led 5-3. In the lifth frame Charlton, however, made a brilliant clearance break of 115. Tony Meo, who beat Jimmy White 10-8 in one of the fastest and best matches so far, went into a 5-3 best matches so far, went into a 3-3 lead over Doug Mountjoy in their second round match. Meo went 2-0 ahead with a break of 65 in the second frame but Mountjoy levelled the scores, only to see Meo increase his advantage to two frames will lively break of 45.

RUGBY UNION: Knee ligament damage has ruled out the prop. Jon Curry, from the Gosforth side for their Northumberland Cup final against Ainwick tomorrow night.
The injury threatens Curry's chances of going on the England under-23 tour to Romania next month. Curry damaged the knee in Gosforth's 24-15 win at Bedford where he scored a try, and he will miss Gosforth's 18th successive Northumberland Cup final appear-

Gregorio Benito, a retired Real player.

France on July 10, has been cancelled because of lack of television coverage.
BOXING: Alexis BOXING: Alexis Arguello, of Nicaragua, stopped Claude Noel of Trinidad, in the third round of a lightweight contest in Atlantic City.

Noel retired because of hip injury.

Later Noel said he believed he had dislocated his hip in the second round, 'I was hurt and I pre keep on living," he said. He was floored in the first round with a left book to the head.

BOXING: BRUNO LEARNS TO FIGHT THE GOOD FIGHT AT THE PATTERSON PUNCH-IN

The ring master and his pupil

Real heavyweights are rather like

the lips when having to make do with an inferior modern brew. So when Floyd Patterson came to London vesterday it was a welcome vintage stuff. Patterson aged 48 and astonish-ingly only 3lb over his fighting weight of 13 stones, remains

unharmed by age or punches, unlike some of those who have followed him as world heavyweight cham-He talks a marvellously fight-better, in fact, than during his 20-year span in the ring from 1952 to 1972 "Freudian Floyd" they

called him then because of his many complexes and penchant for adopting disguise-usually a beard and dark glasses to escape recognition after defeat. Coming to terms with adversity is, according to Patterson, the most important lesson to be learnt in

boxing. It is one he hopes to impart to the young British prospect. Frank Bruno, whose growing reputation has caught his ear.

has caught his car.

The magazine, The Ring has voted Bruno the outstanding heavyweight "hope" of the year and roday Patterson should be able to validate that assessment in an initial gymnasium tutorial. Those guiding the fortunes of the Londoner believe a word from the ringwise is what Bruno needs before meeting his most experienced opponent. Scott Ledoux of the United States, at Wembley next Tuesday.

Hence the importation of the man who was heavyweight champion from 1959 to 1962 save for the
vear after his 1959 defeat by

Patterson combines his visit here with a fund-raising dinner for one of his British contemporaries. Don Cockell, who is seriously ill.
Looking at the still trim
Patterson, it is bard to imagine how

such a heavyweight midget became champion, for he seems barely more than the boyish middleweight who won the Olympic title in 1952. It is perhaps easier, though, to underthat brutal giant, Liston, and could never get within an arm's length of

This is one attribute he and Bruno have in common but, characteristically, Patternson wants to concentrate on the psychology of the sport in his Canning Town teach-in. "I know little about Bruno but everything I've heard is good," he said after their first meeting over a buffet lunch yesterday. "He is unbeaten and that's good,

too. But the most important thing he has to learn is how to lose. He's got to know what it is like to be knocked down and to force himself

Peek-a-boo: the Patterson panache rubs off on Bruno. Photograph by Bill Warhurst. proceeded to become the first in Losing can be the beginning and not history to regain. Patterson's law comes from his own experience of such adversity. But he also plans to be positive. "When I see the boy work out I'll be

able to tell him a thousand things," he said. If just one of them rubs off Bruno and his manager, Terry Lawless, will be amply satisfied. "Whether it is about boxing or about life is immaterial." Lawless said. "Floyd was not only a great stand now why he was no match for champion but a perfect gentleman that brutal giant, Liston, and could and there could not be a better example for Frank to follow." It may turn out that Patterson has

less to impart academically than psychologically. Two years ago he saw similar potential in another young heavyweight, Anders Eck-lund, of Sweden. He invited him to New York but Ecklund, now an unbeaten professional of 25, explained recently why it did not Floyd's peek-2-boo style, to be on the defensive all the time. I sensed they were trying to turn me into another Patterson and I can never

Neither can Bruno, who is

longed. The Boxing Commissioner for New York for the past six years, Patterson admits his ambition is to school a young heavyweight champion and he senses that time and commodity may be running out in his nome city, where there are fewer than 3.000 licensed professionals Patterson was active. He has his own gymnasium on his 40-acre estate in upstate New York, when e trains several youngsters. But this is largely a social exercise in a drug-He is not sure whether he will get

the ring with Bruno today because he gave up sparring some time ago. "At my age it could be dangerous." he confessed. "You could end up with brain damage." Patterson was 37 when he retired in 1972 after his second losing bout with Ali, If he had known then what he knows now he would probably have quit earlier.

That is why Bruno is not the only British heavyweight to whom he is offering advice. "Joe Bugner should learn a lesson from those who tried to come back, tike Clay [he still calls

meeting at Southwell and today's at Nottingham have been called off because of waterlogging and there is a 7.30 inspection at Plumpton. Even worse, though, the excellent eard at Ascot tomorrow is in serious doubt An 8.0 inspection this morning will decide, but Nicholas Beaumont, the clerk of the course, said yesterday. "We had 0.6 in of rain last night and

rights and that filly ran Favoridge
who, admittedly, had something
n hand - to a length and a half in
the Neil Gwyn Stakes at Newmarket
couple of weeks ago.

Jeremy Tree: fancled runners at Bath and Thirsk

comfortably on his debute at Nottingham, faces aformidable rival in Peter Easterby's dual winner, Loch Pearl, while Rock's Gate, who just caught Broad Beam at Wolverhampton last week, will not find sailor's Dance and Gildoran easy prey. However, both look above average and should stay

A more speculative bot, but one A more speculative bet, but one that could oblige at rewarding odds, is Commonly in the Empire Handicap at Bath, James Bethell's five-year-old loves soft ground and judged on the form he showed when taking a well-contested event at Condend loves authorized event at the state of the showed love Goodwood last autumn is well Goodwood last antinin is wenthandicaped. Another trainer in form Kim Brassey, should bring off a two-year-old double with Puente Romano (2.15 Thirsk) and Jack Tar (2.30 Bath).

Matt McCormack, the Want-

age trainer, said (yesterday) that Horage had no better than a 50-50 chance of running in Saturday's 2.000 Guineas at Newmarket.

Dicks to safety

Richard Quinn followed up his double at Lercester on Saturday with an eight-length victory on particular of a mile out after hanging on the filly's neck roden style for a furlong and a half. He control to lead at the distance and angles across the horse's back.

Dicks. shakes here in Richard Quinn followed up his double at Lercester on Saturday with an eight-length victory on Dabdoub in the Sidney Thompson Memorial Stakes. Quinn produced the control to lead at the distance and angles across the horse's back. An drew Dicks, an apparation rider, marrowly escaped serious injury in a fall from Porto Irene in the Conflans Handicap at Brighton yesterday. Dicks crashed to the

of horses behind me at the time, and I was hoping I could hang on long enough to let them all get past me. I was in trouble for about a furlong and a half, but if I had fallen straight away I could have been trampled. It was a frightening experience and I

The race went to Be My Darling who led two furlongs out. The siewards held an inquiry into the incident and after interviewing both Dicks and trainer, Donald Tucker, accepted their explanations that the saddle slipped. They were also satisfied that the filly left the parade ring properly saddled and that the girths were checked at the start.

The stewards held another inquiry into the dismal performance of the Lester Piggott-ridden Mount Kellett, the 11-4 favourite. He was slowly away and soon tailed off. They accepted his explanation that the colt broke from the stalls

Allverton for Newmarket

Following another gallop vester-day, Francois Boutin has decided to send Aliverton for the 2,000 Guineas on Saturday, Desmond Stomeham writes. The colt will be ridden by Cash Asmussen, who will wear the colours of Stavros Niarchos. Aliverton was backward when third to Pluralisme in the recent Prix de Colche.

Allverton galloped with Pascal Bary's Deep Roots, who has now been withdrawn from the 2,600.

and was never going well.
Richard Quinn followed up his Dicks, shaken but unhurt, was able to walk back unaided and said:

"I felt the saddle here to the saddle her able to walk back unaided and said: guineas at Newmarket on Thursday "I felt the saidle begin to go and caught her neck. There were plenty trainer of Dahdoub.

Stanley the Baron continued Kim Brassey's fine start to the season with a five-length victory over Barbican Aire in the Orleans Stakes Bryn Crossley reported that the colt did not really handle the bends and would prefer a straight track. Brassey is likely to send him to Salisbury next week, but says that he would like to see Stanley the Baron tested to find out how good he is.

"While I can find these easy races I will keep running him in them, but the real aim is a Royal Ascot race, probably the Windsor Castle Stakes, Bassey said.

Guy Harwood and Greville Starkey gained some compensation for Sackford's defeat in France

vesterday when Fawg landed the Prince of Wales Stakes in a threeway photo by a head from Lochboisdale with High Hawk 2

Zino, and Allverton will be trying to make up for Nureyev, who was disqualified after winning the Guineas for Niarchos in 1980. Ma Biche had her final work-on

before the 1,000 Guineas at Chantilly yesterday meming and went "marvellously well", according to her trainer, Criquette Head. This morning, Ma Biche, the current favourite for the English classic, will be fleet from the English classic, will been withdrawn from the 2,000. be flown from Beauvais to Stansted Boutin won the race last year with

CYCLING

Doyle: automatic choice

Sealink comes of age

By John Wilcockson

For British cycling, and for the sponsors, last week's Sealink International race was an unqualimicroauonal race was an inquali-fied success. At a banquet in the Cutiers Hall, Sheffield, on Saunday, night Gordon Wragg, the Lord Mayor, said the city would be pleased to host the race again; Peter Happe, the marketing director of Scalink UK, confirmed his company's commitment to the event in

Speaking on behalf of the BBC televison crew which covered every stage in its Pebble Mill at One programme, the presenter, Bob Langley, said that cycle racing "has been a revelation to both myself and my colleagues, and we hope that our efforts have brought attention to this wholly absorbing sport".

Coverage of the event by television, radio and press has given the Sealink race a status of its own and it can no longer be considered simply as a warm-up event for the Tour of Britain Milk Race. However, the proximity of this country's principal cycle race is now uppermost in the minds of those responsible for selecting Britain's two teams, one amateur, one professional

The best of the British amateurs in the Sealink were Bob Downs who finished tenth, and Malcolm Ellion, twentieth. Downs, from Essex, infiltrated one of the four crucial breaks, all of which were missed by Ellion. This She rider, aged 22, proved his individual worth by winning both the prologue time-trial on the Isle of Wight and a similar test which closed the race in his home town. But he seemed a the other stages.

The team's performance was not helped by both Phil Bateman and Jeff Williams retiring on Friday, suffering from stomach upsets. In contrast to the dearth of talented amateurs, there is an embarrassment of riches for the

selectors of the professional team.
Tony Doyle, second in the Sealink, and Phil Bayton, fifth, seem automatic choices, but it will be a gamble to select Bill Nickson, who retired on Thursday when a fractured scaphoid was diagnosed

after a crash.

It would be pleasing to see a place reserved for Sid Barras, at 35 the oldest of the British professionals. He last rode in the Milk Race as an amateur in 1969. On Saturday, Barras Saiched third in the Said Barras finished third in the final time-trial for an overall position of eleventh. "I had raced only three times this season before starting the shop in Harrogate, said. The other placings in the six-man Milk Race team will be between two other experienced Yorkshire riders, Keith Lambert and Dudley Hayton,

Spaniard leads

Vicila (Reuter) - Marino Lejarreta (Spain) won the 147-mile sixth stage of the Tour of Spain cycle race in 7hr 38min 26sec yesterday to take the overall lead from Bernard Hinault (France). Julian Gorospe and Pedro Delgado, both of Spain were second and third.

YACHTING

Calmly out of the **Doldrums**

By Barry Pickthall

Philippe Jeanaot, aged 30, an oil rig diver from Concarnean, France, who holds an 11-day lead in the singlehanded Round the World race, sponsored by BOC, slipped through the Doldrums without a halt over the weekend. With 2,500 miles to go to the finishing line in Newport, he has built up a 200-mile lead over Bertie Reed Africa, on this last leg of the 27,000

Richard Broadhead, of Britain, sailing the 52 foot Perseverance of Medine, is in third place, 360 miles astern of the Frenchman, with A search was organized for a Czechoslovak competitor, Richard czenostovak competitor, Richard Konkolski, after the satellite tracking transponder fitted on his 44-foot yacht, Nike III. stopped transmitting and other yachts failed to raise him on the radio. Konkolski, who defected to the United States last year to take part in this race, had voiced concern in Rio de Janeiro that one of the Eastern block navies might choose to use him as target practice, particularly as ownership of his

yacht is in dispute.

Gosson, who was 60 miles northeast of Nike's last-known position off Brazil's northern coast, was diverted and the Brazilian Navy and coastguard services joined in the search. Almost 24 hours after the alert had been given Konkolsk came up on the inter-vacht networ malfunction, all was well, While Konkolski continues to

lead class two on this leg, a race is developing between Francis Stokes, of the United States, sailing the 39-foot Moonshine, and the Japanese sailor, Yukoh Tada, abourd the 44foor Koden Okera V. At the start of this final leg from Rio two weeks ago Tada held a two KIO two weeks ago 1 ada heid a two-day advantage over Stokes in the overall positions, but is now 160 miles behind his rival and may have fost his grip on the \$25,000 prize-money that goes to each class winner. **EMPLOYMENT**

LAW SOLICITOR We are looking for a solicitor with or without Employ-ment Law experience, who is willing to specialise in this field within our Employment Law Department.

The work is interesting and demanding and encompasses contemious and non-contemious aspects. The successful applicant is likely to be energetic, enthusiastic, able to cope with substantial responsibility, enjoy client contact and thrive on a heavy workload.

Please apply with full details to: Mrs. V. Ferrents, McKenna & Co., inveresk House, 1 Aldwych, London, WC2R OHF.

looking for a more dynamic environment...

TWO DIFFERENT JOBS FOR

Digital are the world's No. 2 in the computer industry and acknowledged leaders in the field of municomputers. This underlines excellent caree. prospects for professionally qualified lawyers able to provide practical legal advice to all levels of management. Digital, as a company, encourages considerable personal initiative and the Legal Department actively assists business management and

In this dynamic environment, the key to success is the confidence in giving a practical solution based on sound legal principles, which are explained promptly, succincily and clearly.

Senior Legal Assistant

Assisting and reporting to the Company Legal Advisor. this is a new position due to increasing demand for legal services. It provides an opportunity for someone with a first-class degree and preferably experience in a city law firm or major industrial concern to become involved

You will assist in the review of current trading terms and conditions, with particular reference to software licensing; manage and co-ordinate significant litigation with outside lawyers; advise on and ensure compliance with all aspects of Competition Law. You will also take responsibility for advising Middle East Group on distribution, agency and joint venture agreements and generally assist in the negotiation of major contracts.

Contracts Negotiator

Reporting to the Contracts Manager, you will negotiate and draft complex high-value contracts on a domestic and UK-based multi-national level, involving Government agencies and major commercial customers. This will cover sales, leasing, licensing and servicing of the Company's products.

You must, therefore, have the ability to advise, guide and where necessary, train internal departments in contractual procedures. Experience of negotiating contracts and firming up negotiations in a supportive role with the sales team is essential, as a considerable amount of your effort will be placed in this vital activity. Your experience, preferably with a technical bias, was probably gained in a large company, in a closely related field. This is your opportunity to apply your knowledge to maximum effect and develop your career into larger. greener fields

Both positions are for professional young lawyers in their late 20s-early 30s. Salaries, commensurate with the seniority of the positions will be offered, plus a substantial benefits package, which includes a company car and assistance with relocation where appropriate.

For further details please contact: Mr M. Redhouse, on Reading (0734) 868711. Digital Equipment Co. Limited, PO Box 131. Reading. Berks RG2 0TS. Ref. PCB6B2.

PARLIAMENTARY COUNSEL

Work of Unique Interest and Importance for Able Young Lawyers

Parliamentary Counsel are specialists, working in their own Office in Writtehali, mainly on the drafting of government bills and related parliamentary business. In the preparation and passing of bills they are responsible for all questions of law and form, and they provide the Government with advice on questions of parliamentary procedure. The duties include attendance at stating of both Houses of Parliament and co-operation with Officers of both Houses.

entary Coursel also do similar work for the Law Commiss The work is demanding but stimulating, and is critical for the processes of law-making and of government. The posts provide a challenging opportunity for those seeking a career calling for a very high level of ability and legal skill.

Candidates must be young barristers or solicitors qualified in England. They should normally have had several years of profession experience, but a similar period of post-graduate academic experience is acceptable. They should have a good honours degree (which need not be in law) or show evidence of comparable

to a period of probation.

Salary, as Assistant Counsel, £15,065 - £19,725; starting salary may be above minimum for those aged 30 or over. Promotion to Senior Assistant Counsel (£20,525 – £23,420) should come within 5 - 7 years for the really able lawyer.

There are further prospects of promotion to Parliamentary Counsel (max. £30,250); and the post of Pirst Parliamentary Counsel carries a salary of £37,750.

There are up to 3 vacancies to be filled. Written details and application forms may be obtained from the Senate of the inns of Court and the Bat, from the Law Society's Appaintments Registry, from the Parliamentary Coursel Office, 36 Whitehall, Landon SW1 (01-273 4468), or from the Civil Service Commission, Alencon Link, Busingstoke, Hants, RG21 1/8 (telephone Basingstoke 68551; answering service operates outside office hours). Any enquiries should be made of the Parliamentary Coursel Office. The closing date is 17 May 1983.

Please quote ref: G/3954/1.

CLYDE & CO. have vacancies in their London & Guildford offices for

Young Solicitors for Reinsurance Litigation

They require Solicitors, recently qualified or with up to three years post-qualification experience, to conduct international insurance, reinsurance, shipping and transport cases, including advising on and handling disputes in this country and in many foreign jurisdictions, involving a wide variety of legal and commercial problems and travel abroad.

Previous experience of reinsurance disputes or other types of substantial commercial litigation will be a distinct advantage. The rewards and prospects are excellent.

Candidates should apply in writing, enclosing a comprehensive curriculum vitae and quoting reference 2064 to Mrs. Indira Brown, Corporate Resourcing Group, 6 Westminster Palace Gardens, Artillery Row, London SW1P 1RL. Telephone: 01-222 5555.

OXFORD INSTITUTE

NUFFIELD COLLEGE ST ANTONY'S COLLEGE

RESEARCH FELLOWSHIPS IN ECONOMICS

The institute proposes to appoint two research officers in economics, who may also hold non-stipendarly research fellowships at either Nuffield or St Antony's College. Nufficid or Si Antony's College. The appointments will be for a puriod of 3 years beginning on 1 October 1983, and may be catended for a further 2 year. Salary is on the Opford University opertelaids scale for University Lecturers, 26.375 (aged 24 years) plus University Superannuation. One post will suit an industrial economics will suit an industrial economics will such as negative the economics willing to research the economics. ist willing to research the econom behaviour of oil companies for research programme on the world petroleum market. The second post would suit a general economist. An interest in working on the demand for energy would be an advantage. An appointment at a Senior level to An appointment at a senior level to these posts may be considered by

Applications stating age, degrees, experience, publications and the names of two referoes should be submitted by 5 May 1983 to Robert Mabro. St Antony's College, Oxford OX2 6.IF. For further details interphane (0865) 56930.

From Nicholas Ashford Washington

A panel of prominent American specialists on arms control has concluded that the prospects for agreement between the United States and the Soviet Union in either of the negotiations taking place in Geneva are "bleak" unless the Reagan adminstration abandons its present approach of seeking big re-ductions in the Soviet nuclear

In a report released yesterday by the Carnegie Endowment the panel attributes the stagnation in both the strategic arms reduction talks (Start) and the negotiations on medium-range missiles in Europe on the "sweeping nature" of the American proposals.

These proposals seek "major reductions ... in those categories of weaponry where the Soviets have their largest investment and strategic advan-

However Mr William Hyland, the panel's chairman, conceded during a press conference that the recent American decision to set aside its "zero-zero" proposals for the total elimination of medium-range missiles in Europe, and instead seek an interim solution, may produce a serious Soviet re-

"My impression is that there is a lot of tough bargaining ahead, particularly on the Pershings," he said. "But I think the Russians are going to have to come up with a counter-

Last month President Reagan offered to cut back the planned deployment of 572 Pershing 2 and cruise missiles in Europe if the Soviet Union agrees to reduce the number of warheads on its medium-range missiles to an equal number. Moscow rejected this new offer.

Among the panel's 30 members is retired General Brent Scowcroft who is also chairman of President Reagan's commission on strategic weapons.

This commission has rec-ommended the basing of 100 multi-warheaded intercontinental ballistic missiles in existing Minuteman silos pending the development of a new small mobile single warheaded missile. It also suggested that in future arms control agreements should be based on attaining an equal number of warheads rather than equal levels missile launchers.

Hubbub at conference on Hitler diaries

Continued from page 1

diaries were forgeries: "For the moment we can accept the provisional conclusion that they are genuine," although there were many questions still to be asked.

A Stern spokesman said last night that if Lord Dacre wanted to reexamine the manuscripts he would certainly be allowed to do so.

Stern saw no reason to interrupt its preparations to publish the diaries because of saw were written by Hitler. Lord Dacre's reservations exhistorians, another official said. "The conference has only served to confirm our judgment firmed that they thought them

Professor Weinberg, who also spent three hours in the Zurich vault reading extracts from about 15 volumes, complained at the press conference that the handwriting analysts com-missioned by Stern had worked only in pages taken from the separate volumes Hitler had kept on the Hess affair.

To establish absolute proof, he wanted similar analyses to be carried out on the main diary volumes as well as thorough examination by German his-

Herr Peter Koch Stern's Editor, said the paper submitted for chemical tests had been taken from two separate vol-umes - 1933 and 1941 - and more handwriting comparisons were now under way. Tests had already been carried out by Mr Ordway Hilton, the American handwriting expert who dis-covered the forgery of Howard Hughes' will and who stated categorically that the samples he

The press conference was pressed at the press conference interrupted by Mr David Irving, and doubts raised by other who made a long statement who made a long statement disputing the diaries authen-ticity and producing other Hitler documents which he said that the diaries are genuine", he did not tally with Stern's find. said. "Both historians con- He said these had already been

"You have your sources who supply you with forgeries, and Stern has its sources who supplied us with genuine documents," Herr Koch retorted.

Irving giving a rival press conference in the same room. The hubbub lasted for some

Writing Mein Kampf was 'a struggle' for Hitler

claimed last night that Hitler did not write Mein Kampf personally, but dictated his political and autobiographical testament to stenographers.
Professor Donald Cameron

Watt, who spent six years working on German govern-As a throng of cameramen and reporters pressed round Mr Irving, a fight broke out when Siern's staff tried to provide the signed by the Kahamana and military documents of the Hitler era seized by the Allies after the war, also said he recollected very little material signed by the Kahamana and military documents of the Hitler era seized by the Signed by the Kahamana and military documents of the Hitler era seized by the Signed by the Kahamana and military documents of the Hitler era seized by the Signed by the Sign

"It was a devil of a job to get Mein Kampf out of Hitler. It was dictated in two chunks, the first while he was in jall when

Where it all began: Herr Gerd Heidemann (top), of "Stern", the grave of the pilot who was flying the ill-fated Junkers (bottom) which crashed with the diaries on board.

An eminent British historian he had nothing to do, and the aimed last night that Hitler second two years later, when as a result of some disturbances around his speeches he was forbidden to speak publicly for six months.

"His publisher dragged him back to a desk and again provided a stenographer who wrote down what he said." Professor Cameron Watt, the Stevenson Professor of

International History at the University of Landon, said his impression was that Hitler was not normally a man who put pen to paper. "It is very odd if he did write

Poll debate off to an abusive start

Continued from page 1 They are talking about a £2.5m "war chest" for the campaign, most of the money coming from the trade unions. About £750,000 has already been gathered in.

Mr Johnny Wright, whose firm handles Labour's advertising, said he had been in regular touch with the Walworth Road headquarters and his men were

ready to go into action.
"If an election was called tomorrow for May, let alone June, we would be ready," he said. "But it is not as though we are sitting in a war bunker, waiting for someone to press the

button."
With the left wing demanding that there shall be no blurring of commitments, there could still be some trouble over the drafting of the Labour mani-

festo.

The Liberal and Social Democratic Parties are in no such dilemma. Their party manager say that the joint manifesto will be ready within a few days of Mrs Thatcher making the announcement. They have 637 candidates

Mr Foot last night gave Mr Foot last night gave notice that he intends to make

the Government's record on law and order an issue in the election campaign, Philip Web-At a meeting at the Com-mons of the Tribune Group of

left-wing Labour MPs, Mr Foot said that Labour had an excellent chance of winning the election, whenever it was called. Mr Roy Jenkins, the SDP leader, last night called on the Prime Minister to announce the

election date with all speed. In an uncharacteristic personal attack, he said in Leeds that Mrs Thatcher's resolute approach and determination to go to the end of the road both stopped when she came to make a politician's calculation about the election date and therefore

her own future.
"On this subject she is as tricky as Sir Harold Wilson, as uncertain on the brink as Mr Callaghan, as petulant as Sir Anthony Eden.

 Labour would lose control of the Greater London Council if there was an election

now, according to an opinion poll published yesterday.

The poll, conducted by Market and opinion Research International (MORI) and published in the London Standard, shows that the Conservatives shows that the Conservatives now lead Labour by 10 per cent in the capital with 42 per cent. The Alliance would receive 24 per cent. Cartoon, page 2

Frank Johnson in the Commons

Halesowen major grabs a celluloid tiger

Mr John Stokes, the Con-servative member for Haleswowen, who speaks for both Halesowen and England on such matters, yesterday broke his silence on the subject of Gandhi. At last the Empire had struck back.

Mr Stokes is one of the few remaining Tory backbenchers with the self-confidence to appear ridiculous. President of the Monarchist Association in 1937, according to his entry in Who's Who; Dakar Expedition, 1940 (a comrade perhaps of Evelyn Waugh's Brigadier Ritchie Hook) Major, Royal Fusiliers. "Recognitions gardening travel reations: gardening, travel. English history, church affairs. A sound man.

One would no longer go into the jungle with most Conservative backbenchers. Indeed, one would not go into a small, leafy glade with them. But Mr Stokes has a good bearing and a small brush moustache and his word of command is crisp and distinct. With such qualities, he is a man marked out never to get anywhere in politics.

Yesterday he managed to slip Gandhi into question time to the Minister for Overseas Aid. This is normally an occasion of great gentility. Some of the most hopeless cases, greatest despotisms, and self-righteous posturers among the nations of the earth are referred to on both sides of the House with reverential tones.

Labour members put down questions demanding to know how much money we are giving to whatever regime has lately taken their fancy. The answer from the minister - at present Mr Timothy Raison is always the same; a lot. So too are the Labour members' supplementary questions; not enough. Honour is satisfied all

Yesterday, for a few min-utes, India was the topic. The two sides of the House exchanged the usual pictics. Then Mr Stokes, manifestly disdainful of the petty charge of irrelevance, admirably blundered in with: "How much aid by the British taxpayer was used in making the film, Gandhi?"

At this there was much scoffing from the rather middle class Labour and SDP members who tend to pre-dominate at overseas aid question time. (Their more proletarian colleagues tend to stay away.) These genteel

members are living proof of the dangerous effect of middie-brow films on the impressionable classes. Among such MPs a half-naked Mr Ben Kingsley, walking about in Gandhi, arouses almost as much awe as does a half-naked Miss Joan Collins, walking about in *Dynasty*, among the proletarian members. We all have our odd little preferenc-

But was the scoffing justified? Hardly. Mr Stokes was making a good point. About a third of the cost of the film. apparently, was provided by the Indians, which could help explain why Indians come rather better out of the film than Muslims or Britons. We give aid to a Government which, despite its country's poverty, finds it amusing to spend a lot of money on a film. That was the point which Mr Stokes succeeded graphi-cally in illustrating. Can he really be such a fool?

Mr Raison replied that he was "not aware" that any of our aid for India had been spent on the film, thus missing the point that Mr Stokes was really making. But he said he would write to Mr Stokes if that answer were wrong.

During the same period of question time, Mr Tam Dalyell, the Labour back-bencher who is still fighting the Falkland war, asked what had been the total expenditure of the Foreign and Commonwealth Office, the department to which the Minister Of Overseas Aid is part, on the Falklands, Mr Raison gave the figures which, like all figures of this kind, sounded large and meaningless and need not detain us here.

Mr Dalyeli complained that, with so much being spent on the islanders, "it demeans both us and them when they place such obstacles in the way of the Argentine beareaved going to the islands. "He added: "Did she not have a cavalcade of cameras when she went?" At which such Stodesite Tory backbenchers as Sir Anthony Fell protested: 'She? She? Who do you mean. she?" Presumably they, and Mr Dalyell, had the same woman in mind.

Mr Raisom said Mr Dalyell's question was not about aid, which was true, because all Mr Dalyell's questions, whatever the subiect, are about the Falklands.

Road closed, diversion signposted. A96: Tempor ary diversion south-east of Black

Aberdeenshire. A90: Forth

burn, Aberdeenshire. A90: Forth Road Bridge, carriageway closures The papers

In leading articles, the Daily Express pursues a concern with conflicting propaganda and philos-ophies, East and West. First, it describes the "so-called Visite discipar" a "manufacture of the con-Hitler diaries" as "probably fakes, produced in East Germany" and says the suggestions that Hitler allowed British forces to escape at Dunkirk, and approved Rudolph Hess's flight to Scotland shows that in the propaganda war, history has a part to play."

a part to play."

The paper then considers Soviet industrial espionage, in the light of what it calls "the total failure of communism" to provide economic success. It advises the Soviet Union:

"Adore goaldlism" 'Adopt capitalisa Finally, the Duily Express moves to what it sees as an economic success, and hails the two-cent recovery of the pound as vindi-cation of Mrs Thatcher's policies. The Daily Star says that if Mrs Thatcher is true to herself and her

instincts, there can be no quesion of

The pound

a June election.
